Introduction

1. This is a list of Tree Preservation Orders (TPOs) in Lambeth Council's area, listed alphabetically by road. "Address" is road name, followed by house number / or description of the site, "TPO No." is the Lambeth Tree Preservation Order reference number, "Tree No." is taken from the TPO documentation and comprises a number prefixed by a letter T, G, A or W. "T" denotes an individual Tree, "G" denotes a Group of trees, "A" denotes an Area of trees; and "W" denotes Woodland. "Species" is species of the tree / trees protected.

2. If the original TPO papers have been lost, the TPO was not confirmed, was revoked, was added to this schedule in error, or was varied (resulting in the removal of some trees), the entry relating to any de-designated tree is ~~struck through~~ in the schedule. See separate list on next page explaining these on a case-by-case basis. Please note: these trees, although no longer subject to a TPO, may still be protected by conservation area designation.

3. Where addresses have changed or properties have been redeveloped, the TPO may be entered twice – under its original address and under the current site address.

4. For completeness, as well as using this schedule, it is recommended that an address search is also undertaken using the Council's planning database. TPO's should come up in the 'constraint' tab in the property search results.

5. Whilst we endeavour to keep it up -to-date, the London Borough of Lambeth makes no warranties, expressed or implied, regarding the accuracy, completeness, or currency of this dataset and accepts no liability for any loss or damage arising from its use.

6. If you require clarification, spot an error in this document, or need a copy of a Tree Preservation Order please e-mail planningconservation@lambeth.gov.uk

Trees in Conservation Areas

7. This schedule does not identify trees in conservation areas which are protected under separate legislation. To check if a tree is in a conservation area, please do a property search on the Council's planning database. If relevant, the conservation area name will come up in the 'constraint' tab in the property search results. It is advisable to then double check the tree location on the relevant boundary map for the conservation area

List of TPOs that have been struck through

If an entry has been ~~struck through~~ in this schedule it means that the tree protection no longer applies. When TPOs are made they are 'provisional' and must be confirmed within six months. If a TPO is not confirmed the TPO is no longer valid. TPOs can also be varied (at confirmation stage or after) or revoked. If the original TPO paperwork is lost, the TPO is also considered not valid. The list below outlines the Tree Preservation Orders (or individual trees within a TPO designation) that have been struck through on this schedule and explains why.
