

Lot 1 – Part G

Ticketing of Incorrectly Parked Vehicles on Council Housing Estates Specification

There is no specification for this as yet but the Tenderers should be aware that this could be a possibility during the term of the contract.

A specification will be prepared as and when required along the lines of the BPA Code of Practice for Parking Enforcement on Private Land and Unregulated Public Car Parks – Part 2 Parking Tickets, together with practical influences and systems from the RTA 91 service in other parts of this Lot

The Contractor would be required to prepare a proposal for this work for negotiation with the Council/ALMO. Subject to this being satisfactory the work would be commissioned. If it is unsatisfactory then the Council/ALMO reserves the right to seek alternative proposals from alternative suppliers.
