The objective of designation is to preserve or enhance the character or appearance of areas of special architectural or historic interest, as distinct from individual buildings, to control developments in such areas and to stimulate and encourage measures to improve the environment. The primary effects of conservation area status are that the demolition of certain buildings is brought within conservation area control and consent must first be sought from the planning authority, that it becomes an offence to cut down, lop or carry out any other works to certain trees within the area without proper consent from the planning authority; and that planning applications for development which, in the opinion of the planning authority, would affect the character or appearance of the conservation area, must be advertised. A plan showing the areas subject to these designations is available for public inspection at the Town Planning Advice Centre, 10 Acre Lane, Brixton, London SW2 5LL (opening hours 9.30 am - 4.30 pm).
