Introduction

Lambeth's annual Housing Development Pipeline Report provides data on changes in Lambeth's housing supply between 1 April 2010 and 31 March 2011. It does this by listing and summarising all new housing from new build, conversions of properties and change of use of commercial properties in Lambeth that were completed, under construction or had valid planning permissions for the 2010/2011 financial year.

Information in this report will be used to monitor the effectiveness of the policies in the current Local Development Framework Core Strategy and saved Unitary Development Plan and build the evidence required for future polices in the Local Development Framework. Additionally it assesses the progress Lambeth is making towards the housing targets laid out for it in the London Plan and provides the evidence required to demonstrate the council's five year supply of housing.

Information on housing completions was compiled by examining Building Control records, the returns received from the National Housebuilders Confederation (NHBC), the council tax property valuation website, Homes and Community Agency returns and site visits.

The information is presented in a series of summary tables and then listing the sites individually in schedules under the various categories of the development pipeline.

In this way it meets the requirement in Planning Policy Statement 3 (Housing) in setting out the council's five year housing supply.

Progress in relation to London Plan targets

Performance in the last five years has exceeded the minimum target figure in the London Plan.

The monitoring figure for housing supply is set by the London Plan (February 2008). The figure for Lambeth is a total of 11,000 additional dwellings in the 10 year period 2007/08 to 2016/17. The annual monitoring figure is therefore 1,100 additional (net) dwellings per year. The London Plan target includes conventional and non-conventional housing supply. Non-conventional housing involves homes that were previously vacant being brought back into use and non-self contained accommodation.

This report only provides information on conventional housing as this is the housing supply that planning policy and the operation of the planning system can directly affect. Also the assessment/identification of five year supply is expressed/related to just conventional housing.

In 2010/11 1289 net additional dwellings were completed. In addition there were 313 dwellings of non-conventional supply, made up of 0 non-self contained units and 313 vacant private sector properties* brought back into use, making a total for monitoring purposes of 1,602.

In 2009/10 1152 net additional dwellings were completed. In addition there were 337 dwellings of non-conventional supply, made up of a loss of 7 non-self contained units and 344 vacant private sector properties* brought back into use, making a total for monitoring purposes of 1,489.

In 2008/09 1095 net additional dwellings were completed. In addition there were 317 dwellings of non-conventional supply, made up of a gain of 8 non-self contained units and 309 vacant private sector properties* brought back into use, making a total for monitoring purposes of 1,412.

In 2007/08 1,207 net additional dwellings were completed. In addition there were 252 dwellings of non-conventional supply, made up of a gain of 30 non-self contained units and 222 vacant private sector properties* brought back into use, making a total for monitoring purposes of 1,495.

In 2006/07 1,127 net additional dwellings were completed. In addition there were 161 dwellings of non-conventional supply, made up of a loss of 36 non-self contained units and 197 vacant private sector properties* brought back into use, making a total for monitoring purposes of 1,288.

In 2005/06 1,151 dwellings were completed. In addition there were 188 dwellings of non-conventional supply, made up of a loss of 4 non-self contained units and 192 vacant private sector properties* brought back into use, making a total for monitoring purposes of 1,340.

* Please note that the council has used the methodology of former Best Value Indicator 64 (BVI64) to indicate the number of vacant private sector properties returned to use, whereas the GLA have used the difference between overall numbers of vacant properties in consecutive years as recorded on the Housing Strategy Statistical Appendix (HSSA) form submitted annually by the council. For 2010/11 the BVI64 methodology figure is 313, the HSSA figure could not be confirmed at the time of publication.

Five Year Supply – For there to be a five year supply there needs to be at least a total of 5,500 additional homes under construction or with planning permission.

As at 31 March 2011, there were a total of 5,545 net additional dwellings under construction or with unimplemented planning permissions.

This amounts to 5 years' supply.

In addition there are a further 22 sites (see Table 26) which are estimated to have a capacity for an additional 2,167 homes that were identified in the Greater London Authority (GLA) Housing Capacity Study (2004) which have not yet come forward. However these sites have not been included in the estimate of housing supply.

If you have any questions or require any further information please contact the Senior Information and Research Officer Edd Rowe on 020 79261259 or erowe@lambeth.gov.uk.

Lambeth Housing Pipeline Report 2010/2011 - Published July 2011.

Explanations and abbreviations used

Net and Gross

- The 'gross' number of units from a housing development is simply the number of units created by the development.
- The 'net' figure is the number of housing units created minus any existing units lost due to the development.
- For example if a house is converted into three flats the gross number of units is three, whereas the net number is two. Alternatively if a block of 15 flats was demolished and the site redeveloped for 5 high quality houses the gross number of units would be 5 and the net figure would be minus 10.
- Where existing housing has been lost through demolition or the loss of housing to another use this has been recorded. The overall total figures for additional housing take this into account.

The abbreviations used for Developer Type are:

| | |
|------------|---|
| P | Private Developer |
| LA | Local Authority |
| RSL | Registered Social Landlord |
| O | Other Developer (Church Groups, YMCA, Etc). |

The abbreviations used for Borough Ward are:

| | | | | | |
|-----------|----------------|-----------|----------------|-----------|-----------------|
| B | Bishops | HH | Herne Hill | SL | St Leonards |
| BH | Brixton Hill | KH | Knights Hill | SS | Streatham South |
| C | Coldharbour | L | Larkhall | SW | Streatham Wells |
| CC | Clapham Common | O | Oval | T | Thornton |
| CT | Clapham Town | P | Princes | TH | Tulse Hill |
| F | Ferndale | S | Stockwell | TP | Thurlow Park |
| GH | Gipsy Hill | SH | Streatham Hill | V | Vassal |

*Please note that for the purposes of this affordable housing schedule the 'Net Affordable' column reflects the net number of affordable units gained. That is the number of new affordable units minus any existing affordable that was previously on the site. It is not a reflection of the overall net change of the scheme.
