1 Summary

- 1.1 This report tests the ability of developments in Lambeth to accommodate emerging policies in the Draft Lambeth Local Plan and alternative amounts of Community Infrastructure Levy ('CIL') to the rates contained in the Council's adopted Charging Schedule.
- 1.2 The study takes account of the cumulative impact of the Council's planning requirements, in line with the requirements of the National Planning Policy Framework ('NPPF') and the Local Housing Delivery Group guidance '*Viability Testing Local Plans: Advice for planning practitioners*'.

Methodology

- 1.3 The study methodology compares the residual land values of a range of development typologies reflecting the types of developments expected to come forward in the borough over the life of a new Local Plan and a replacement charging schedule. The appraisals compare the residual land values generated by those developments (with varying levels of affordable housing and CIL contributions) to a benchmark land value to reflect the existing value of land prior to redevelopment. If a development incorporating a certain level of CIL and the Council's emerging policy requirements generates a higher residual land value than the benchmark land value, then it can be judged that the site is viable and deliverable. Following the adoption of policies, developers will need to reflect policy requirements in their bids for sites, in line with requirements set out in the Mayor of London's supplementary planning guidance on 'Affordable Housing and Viability' and in the RICS Guidance on '*Financial Viability in Planning*'¹.
- 1.4 The study utilises the residual land value method of calculating the value of each development. This method is used by developers when determining how much to bid for land and involves calculating the value of the completed scheme and deducting development costs (construction, fees, finance, sustainability requirements and CIL) and developer's profit. The residual amount is the sum left after these costs have been deducted from the value of the development, and guides a developer in determining an appropriate offer price for the site.
- 1.5 The housing and commercial property markets are inherently cyclical and the Council is testing the viability of potential development sites at a time when the market has experienced a period of sustained growth. Forecasts for future house price growth point to continuing growth in mainstream London housing markets, although there is a degree of short term uncertainty following the referendum on the UK's membership of the European Union. We have allowed for this medium term growth over the plan period by running a sensitivity analysis which applies growth to sales values and inflation on costs to provide an indication of the extent of improvement to viability that might result. The assumed growth rates for this sensitivity analysis are outlined in Section 4.
- 1.6 This sensitivity analysis is indicative only, but is intended to assist the Council in understanding the viability of potential development sites on a high level basis, both in today's terms but also in the future.

Key findings

- 1.7 The key findings of the study are as follows:
 - **Affordable housing:** We have appraised residential schemes with 35% and 50% affordable housing in line with revised Policy H2 which seeks to maximise delivery of affordable housing in accordance with London Plan policy H6. We have tested the schemes with a range of tenure scenarios and there is a clear tension between the overall level of affordable housing and the affordability of the units provided.

¹ This guidance notes that when considering site-specific viability "*Site Value should equate to the market value subject to the following assumption: that the value has regard to development plan policies and all other material planning considerations and disregards that which is contrary to the development plan*". Providing therefore that Site Value does not fall below a site's existing use value, there should be no reason why policy requirements cannot be achieved.

- **Build for rent schemes:** we have tested the London Plan requirement in H13C for build to rent schemes to provide 35% affordable housing with a range of discounts below market rent. In general, the appraisals indicate that the viability of build to rent schemes is challenging on sites with high existing use values, regardless of the rent levels applied to the affordable housing element. The best viability outcomes are achieved when the Council's scenario C4 is applied to the affordable element, which comprises 70% of units at London Affordable Rent and 30% of units at intermediate rent aimed at households in receipt of incomes of £60,000 per annum.
- **Student housing:** we have tested the viability of purpose build student housing incorporating London Plan policy H17A4 which requires 35% of units to be provided at affordable rent levels (defined as no more than 55% of the maximum maintenance loan of a student studying in London). Although this requirement reduces residual land values of the schemes tested, they remain above relevant benchmark land values used in the study and will not prevent schemes from coming forward.
- With regards to the Council's potential requirement for additional contributions from student housing schemes to fund affordable housing on other sites, there is a direct trade-off between this requirement and potential rates of CIL that the Council could levy. Our assessment identifies maximum levels of CIL generated by student housing schemes and the Council could identify potential payments once it has fixed its position on CIL. It is vital however that the cumulative requirement leaves a sufficient buffer and is not set at the margins of viability.
- **Affordable workspace:** we have tested emerging requirements on schemes which provide new or replacement B1 floorspace at 10% of floorspace with the following discounts: 20% discount for 15 years; 50% discount for 15 years; and 50% discount for 125 years. In CIL Zone A in the north of the borough, the impact on residual land values of a 20% or 50% discount is relatively modest at less than 5.5%. However, if the period of discount is extended to 125 years, the impact on residual land values is more significant at almost 10%. Additional testing has been undertaken on the provision of affordable workspace within the Brixton Creative Enterprise Zone in a separate report.
- In other parts of the borough (where offices are less likely to come forward), the impact of the requirement is more significant at up to 22.5% in CIL Zone B and as much as 103% in CIL Zone C. This is because the residual land values generated by office development in these areas are far lower than those in the north. However, office development is unlikely to come forward in the lower value areas and rent levels are significantly lower than those in the north. Existing and any new office space that is developed in the lower values areas will be accessible to a much wider range of businesses and discounts to market rents may not be necessary.
- **Employment & Skills:** The Council's requirement for financial contributions towards training and apprenticeships has a relatively modest impact on residual land values and also the capacity for schemes to provide CIL. The trade-off between the employment and skills requirement and CIL is typically circa £50 per square metre on employment sites.
- The Council's adopted CIL rates have been in place since 1 October 2014 and there has been no demonstrable adverse impact on the supply of housing land or upon the viability of developments coming forward across the Borough. Since the evidence base for the adopted CIL was prepared in 2012, there have been increases to sales values and build costs. Our testing of alternative CIL rates indicates that relatively significant changes could be accommodated without adversely impacting on viability to a sufficient degree to impact on land supply.
- As a result of indexation, the CIL rates are now circa 32% higher than they were adopted. The proposed Mayoral CIL will also increase from £35 per square metre to £60 per square metre and in the parts of the borough within the Central Activities Zone, £185 per square metre on offices, £165 per square metre on retail and £140 per square metre on hotels. The revised rates will apply from April 2019 if the rates are not amended through the Examination process. We have incorporated the proposed £60 per square metre Mayoral CIL in our appraisals as a development cost. The potential maximum rates of CIL identified by our appraisals already take

into account the impact of Mayoral CIL on the residual values. Clearly higher Mayoral CIL rates in the north of the borough will restrict the Council's ability of fund essential local infrastructure, in an environment in which there are already severe constraints on public sector funding.

Residential rates

- The proposed CIL rates are summarised in Table 1.7.1. Sales values have increased at a faster rate than build costs since the adopted CIL rates were tested and as a consequence, residential schemes can absorb higher levels of CIL. An increase to £400 per square metre in Zone A, £350 per square metre in Zone B and £200 per square metre in Zone C will secure much needed additional income to assist with provision of infrastructure that these developments will require.

Offices

- Office rents have increased significantly in Zone A and to a lesser extent in Zone B. As a consequence, capacity to absorb CIL contributions has been enhanced in new developments and we therefore suggest an increased rate of £225 per square metre. This rate could be extended from Zone A only in the adopted Charging Schedule to cover Zone B.

Large retail, hotels and student housing

- Viability of large retail, hotel and student housing developments has improved and these uses can absorb increased CIL contributions without significant impacts on residential land values. We have suggested increases to £225 per square metre for large retail; to £200 per square metre for hotels; and £400 per square metre for student housing.

Proposed rates

- Our suggested CIL rates are summarised in Table 1.7.1.

Table 1.7.1: Suggested changes to CIL rates

Development type	Zone	Adopted	Indexed	Suggested
Residential including Co-Living schemes	Zone A	£265	£350	£500
	Zone B	£150	£198	£350
	Zone C	£50	£66	£200
	Potential new zone (Brixton and Herne Hill)	-	-	£250
Self-contained sheltered housing, self-contained extra care schemes and care homes	Zone A	-	-	£250
	Zone B	-	-	£175
	Zone C	-	-	£100
Offices	Zone A	£125	£165	£225
Large retail	Whole borough	£115	£152	£225
Hotel	Whole Borough	£100	£132	£200
Student Housing	Whole Borough	£215	£284	£400
All other uses	Whole Borough	Nil	Nil	Nil

- Our testing indicates that the increase in CIL rates will have a relatively modest impact on residual land values in most cases. In almost all cases, increases in sales values (in excess of cost increases) will have enhanced the capacity of developments to absorb increased CIL rates. In the isolated cases where a scheme is on the margins of viability where it is not possible to pass the cost of increased CIL rates back to the landowner through a reduction in land value (for example, due to high existing use values), the increase in CIL will have a modest impact on affordable housing levels that can be delivered.

- The proposed CIL typically amounts to 3.5% to 5% of development costs and is therefore not a critical determinant in the viability of developments.
- Some scenarios (e.g. certain affordable housing percentages) are unviable prior to the application of CIL in the appraisal. There is clearly an important distinction to be drawn between these schemes and those that are viable. Where schemes are viable, the proposed CIL rates are sufficiently modest to ensure that schemes remain viable.
- There is clearly a need to balance the need to deliver affordable housing with the need to secure contributions to fund community infrastructure that will support development and growth. The Council cannot seek to prioritise securing affordable housing and other Local Plan policies (as summarised in Section 2) to the exclusion of securing funding for infrastructure and vice versa. In our view, the proposed rates strike this balance appropriately.
- The Council needs to strike a balance between achieving its aim of meeting needs for affordable housing with raising funds for infrastructure, and ensuring that developments generate acceptable returns to willing landowners and willing developers. This study demonstrates that the Council's approach to applying its affordable housing requirements² ensures that these objectives are balanced appropriately.

² The Council intends to adopt the Mayor of London's 'threshold' approach to affordable housing which requires a minimum of 35% affordable housing with no viability assessment required and no post-implementation review providing construction commences within pre-agreed timescales.

2 Introduction

- 2.1 The Council has commissioned this study to consider the ability of developments to accommodate emerging Draft Local Plan policies and alternative amounts of Community Infrastructure Levy ('CIL') to the rates contained in the Council's adopted Charging Schedule. We understand that the Council intends to review its CIL charging schedule in parallel with the review of its Local Plan and the London Plan. The aim of the study is to assess at high level the viability of development typologies representing the types of sites that are expected to come forward to test the impact of emerging policies and alternative CIL rates to those in the adopted Charging Schedule. The study therefore provides joint viability evidence for both exercises.
- 2.2 In terms of methodology, we adopted standard residual valuation approaches to test the viability of development typologies, including the impact on viability of the Council's emerging planning policies alongside adopted and alternative levels of CIL. However, due to the extent and range of financial variables involved in residual valuations, they can only ever serve as a guide. Individual site characteristics (which are unique), mean that the conclusions must always be tempered by a level of flexibility in application of policy requirements on a site by site basis.
- 2.3 In light of the above we would highlight that the purpose of this viability study is to assist the Council in understanding changes to the capacity of schemes to absorb emerging policy requirements and alternative levels of CIL. The study will form part of the Council's evidence base for its emerging Local Plan and to support any proposed changes to the Charging Schedule through Examination in Public. The Study therefore provides an evidence base to show that the requirements set out within the NPPF, CIL regulations and National Planning Practice Guidance are satisfied. The key underlying principle is that charging authorities should use evidence to strike an appropriate balance between the desirability of funding infrastructure from the levy and the potential impact upon the economic viability of development across their area.
- 2.4 As an area wide study this assessment makes overall judgements as to viability of development within the London Borough of Lambeth and does not account of individual site circumstances which can only be established when work on detailed planning applications is undertaken. The assessment should not be relied upon for individual site applications. However, an element of judgement has been applied within this study with regard to the individual characteristics of the sites tested. The schemes tested on these sites are based on assessments of likely development capacity on the sites and clearly this may differ from the quantum of development in actual planning applications that will come forward.
- 2.5 This position is recognised within Section 2 of the Local Housing Delivery Group guidance³, which identifies the purpose and role of viability assessments within plan-making. This identifies that: *"The role of the test is not to give a precise answer as to the viability of every development likely to take place during the plan period. No assessment could realistically provide this level of detail. Some site-specific tests are still likely to be required at the development management stage. Rather, it is to provide high level assurance that the policies within the plan are set in a way that is compatible with the likely economic viability of development needed to deliver the plan."*

Economic and housing market context

- 2.6 The housing and commercial property markets are inherently cyclical. The downwards adjustment in house prices in 2008/9 was followed by a prolonged period of real house price growth. By 2010 improved consumer confidence fed through into more positive interest from potential house purchasers. However, this brief resurgence abated with figures falling and then fluctuating in 2011 and 2012. The improvement in the housing market towards the end of 2012 continued through into 2013 at which point the growth in sales values improved significantly through to the last quarter of

³ Although this document was published prior to the draft NPPF and NPPG, it remains relevant for testing local plans. The approaches to testing advocated by the LHDG guidance are consistent with those in the draft PPG. The same cannot be said of some of the approaches advocated in the RICS guidance (particularly its approach to site value benchmark) but these have always been inconsistent with the LHDG guidance and the approach now advocated in the draft PPG. In any event, the focus of the RICS guidance is on testing individual plans rather than testing plan policies.

2014, where the pace of the improvement was seen to moderate and continued to do so in 2015. The UK economy sustained momentum following the result of the UK's referendum on its membership of the European Union (EU), and as a result the UK housing market surprised many in 2016. The average house price rose 4.5%, which was 0.2% lower than our forecast and ahead of the level recorded in 2015. While first time buyer numbers continued to recover in 2016, overall transaction levels slowed as some home movers and investors withdrew from the market.

- 2.7 The referendum held on 23 June 2016 on the UK's membership of the EU resulted in a small majority in favour of exit. The immediate aftermath of the result of the vote was a fall in the Pound Sterling to a 31 year low and stocks overselling due to the earnings of the FTSE being largely in US Dollars. As the Pound dropped significantly this supported the stock market, which has since recouped all of the losses seen and is near the all-time highs. We are now in a period of uncertainty in relation to many factors that impact the property investment and letting markets. In March 2017, the Sterling Exchange Rate Index fell a further 1.5% from the end of February and was 10.5% lower compared with the end of March 2016. However in other areas there are tentative signs of improvement and resilience in the market. For example, the International Monetary Fund revised its forecast for UK growth in 2016 on 4 October 2016 from 1.7% to 1.8%, thereby partly reversing the cut it made to the forecast shortly after the referendum (1.9% to 1.7%). However it further trimmed its 2017 forecast from 1.3% to 1.1%, which stood at 2.2% prior to the Referendum.
- 2.8 The UK's first official growth figures since the referendum result vote exceeded initial estimates. Growth for Q3 according to the ONS figures was 0.5%, higher than analyst's predictions of 0.3%. The ONS highlighted that *"the pattern of growth continues to be broadly unaffected following the EU referendum"*. Initial expectations were that the better than expected GDP figures would deter the Bank of England Monetary Policy Committee from going ahead with any further or planned interest rate cuts. The Economy slowed slightly from the Q2 figure of 0.7% and the pattern was a slightly unbalanced one with services being the only sector continuing to grow, achieving a rate of 0.8%. The Chancellor, Phillip Hammond, noted at the time that *"the fundamentals of the UK economy are strong and today's data show that the economy is resilient"*. Production increased by 1.6% in the 3 months to February 2017 and manufacturing increased by 2.2% over the same period. Notwithstanding this the ONS indicate that *"manufacturing is dependent upon both domestic and overseas demand for UK produced goods. Changes in output will reflect both domestic demand and how UK trade is faring post-referendum"*; especially as Article 50 has now been triggered and the negotiation process to leave the EU is underway. Data from the construction sector indicated that the quarterly movement shows a growth of 1.5% in output, which the ONS state *"may act as an indicator of how confident enterprises are in investing in buildings and the infrastructure as longer term assets"*.
- 2.9 It was further expected that manufacturing would be bolstered by the fall in the value of the pound; however this failed to materialise. Despite this, the ONS Head of GDP Darren Morgan observed that *"the economy grew slightly more in the last three months of 2016 than previously thought, mainly due to a stronger performance from manufacturing"*.
- 2.10 The Office of Budgetary Responsibility's *'Economic and fiscal outlook'* report (November 2017) indicates that UK GDP slowed to an annualised rate of 1.2% over the first three quarters of 2017, caused largely by the impact of the fall in sterling feeding through into consumer facing services. In addition, the construction sector saw output fall in the second and third quarters of the year.
- 2.11 BNP Paribas Real Estate's UK Housing Market Prospects Q3 2017 report indicates that *"our Q2 forecast for a period of muted activity and price change remain unchanged"*. In this report we note that *"we expect the average UK house price to rise by around 3.5%, effectively remaining close to flat in real terms given the current pace of inflation. We expect the average UK home to have increased in value by 13.7% or just over £28,000 over the next four years. This translates to an average UK house price increase of 3.4% per annum, although given the political and economic uncertainties ahead, the journey is unlikely to feel quite so benign with the average masking inevitable volatility"*.
- 2.12 The May Halifax House Price Index Report identifies that overall prices in the three months to April were marginally lower than in the preceding three months; the first quarterly decline since November

2012. The annual rate of growth remained at 3.8% in April, the lowest rate since May 2013. Martin Ellis, the Halifax housing economist comments that, *“Housing demand appears to have been curbed in recent months due to the deterioration in housing affordability caused by a sustained period of rapid house price growth during 2014-16. Signs of a decline in the pace of job creation, and the beginnings of a squeeze on households’ finances as a result of increasing inflation may also be constraining the demand for homes”*.

- 2.13 This view is shared by Robert Gardiner, Nationwide’s Chief Economist, who comments in their April House Price Index report, that *“in some respects, the softening in house price growth is surprising because the unemployment rate is near to a 40-year low, confidence is still relatively high and mortgage rates have fallen to new all-time lows in recent months”*. However he balances this by highlighting that, *“while monthly figures can be volatile, the recent softening in price growth may be a further indication that households are starting to react to the emerging squeeze on real incomes or to affordability pressures in key parts of the country”*.
- 2.14 Notwithstanding the above both the Halifax and Nationwide consider that a combination of the continuing low mortgage rates, together with an on-going acute shortage of properties on the market should support house prices. Nationwide conclude that as a result they remain of the opinion that *“a small increase in house prices of around 2% is likely over the course of 2017 as a whole”*. However, the outcome of the General Election on 8 June which saw the Conservative Party lose its majority may result in additional uncertainty in the short term, both in terms of the content of a legislative programme but also the negotiations on the UK’s exit from the EU. These factors may impact on buyer activity.

Local Housing Market Context

- 2.15 House prices in the London Borough of Lambeth have followed recent national trends, with values falling in 2008 to 2009 and recovering over the intervening years, as shown in Figure 2.15.1. Sales volumes fell below historic levels between 2009 and 2012, but have since recovered (see Figure 2.15.2). By February 2018, sales values had increased by 109% in comparison to the lowest point in the cycle in April 2009, or 61% higher than the previous peak in October 2007.

Figure 2.15.1: Average sales value in Lambeth

Source: Land Registry

Figure 2.15.2: Sales volumes in Lambeth (sales per month)

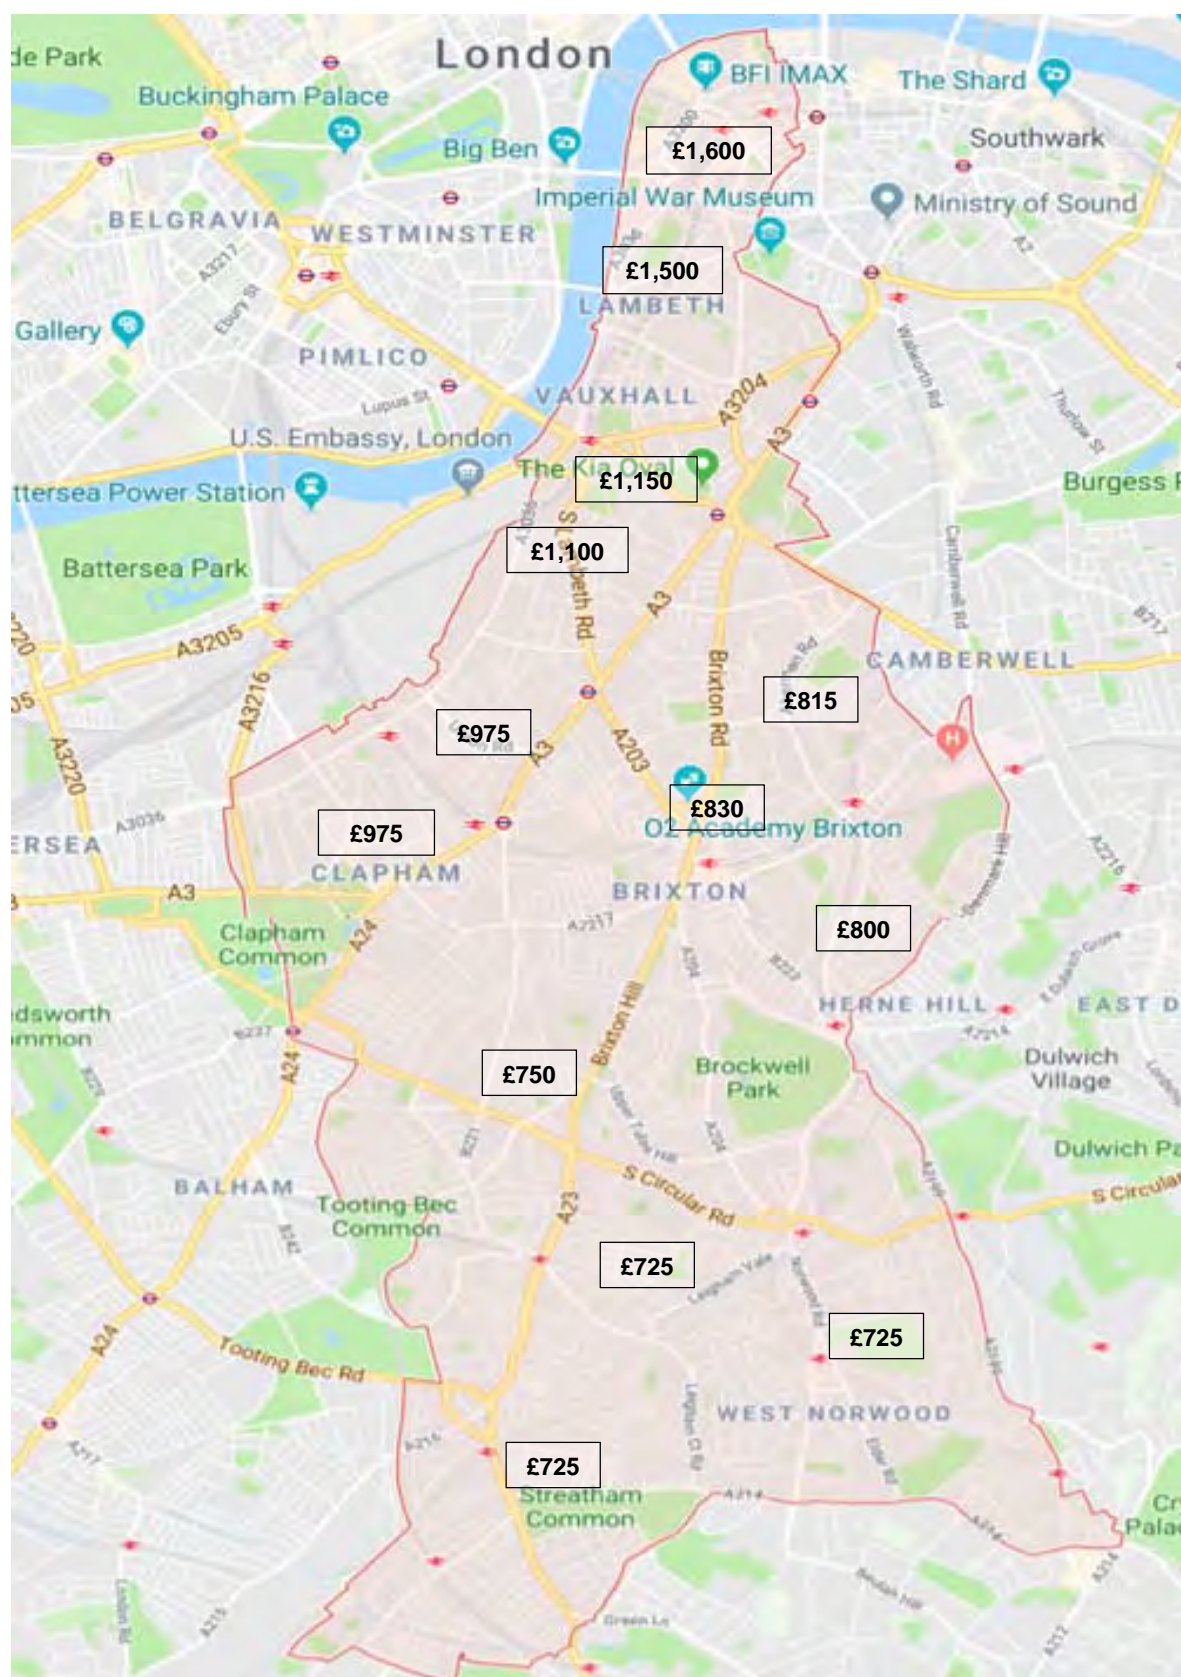

Source: Land Registry

- 2.16 The future trajectory of house prices is currently uncertain, although Savills' *Residential Property Forecasts Autumn 2017* prediction is that values are expected to increase over the next five years. Medium term predictions are that properties in mainstream London markets will grow over the period between 2018 and 2022. Savills predict that values in mainstream London markets (i.e. non-prime) will fall by 2% in 2018, remain unchanged in 2019 but will increase by 5% in 2020, 2% in 2021 and 2% in 2022. This equates to cumulative growth of 7.1% between 2018 and 2022 inclusive.
- 2.17 In common with other Boroughs in London, there are variations in sales values between different parts of Lambeth, as shown in Figure 2.17.1⁴. Highest sales values are achieved Waterloo and Vauxhall, while values in the south of the borough are lower.

⁴ Some of the price points in Figure 2.17.1 are for schemes in neighbouring boroughs close to the border with Lambeth

Figure 2.17.1: Sales values in Lambeth (approx. £s per square foot)

Private rented sector market context

- 2.18 The proportion of households privately renting is forecast to increase from under 10% in 1991 to circa 25% by 2021, largely as a result of affordability issues for households who would have preferred to owner occupy⁵. Over the same period, the proportion of households owner occupying is forecast to fall from 69% to under 60%. These trends are set to continue in the context of a significant disparity between average household incomes and the amounts required to purchase a residential property in the capital.
- 2.19 Perceived softening of the housing for sale market has prompted developers to seek bulk sales to PRS operators, with significant flows of investment capital into the sector. Investment yields have remained stable in the zones 2 to 4 London market at 3% to 4%. PRS housing as an asset class is still emerging and valuation portfolios and development opportunities is difficult in the context of lack of data. As the market matures, more information will become available, facilitating more sophisticated approaches to valuing and appraising PRS developments.
- 2.20 The PRS market is still immature and as a consequence there is little data available on management costs and returns that would assist potential entrants into the market. However, viability assessments of schemes brought forward to date confirm that profit margins are lower than build for sale on the basis that a developer will sell all the PRS units in a single transaction to an investor/operator. The income stream is therefore akin to a commercial investment where a 15% profit on GDV is typically sought.
- 2.21 A reduced profit margin helps to compensate (to some degree) for the discount to market value that investors will seek. PRS units typically transact at discounts of circa 20% of market value on the basis of build to sell. However, forward funding arrangements will help to reduce finance costs during the build period which offsets the reduction in market value to some degree.
- 2.22 On larger developments, PRS can help to diversify the scheme so that the Developer is less reliant on build to sell units. Building a range of tenures will enable developers to continue to develop schemes through the economic cycle, with varying proportions of units being provided for sale and rent, depending on levels of demand from individual purchasers. However, demand for build for rent product will also be affected by the health of the economy generally, with starting and future rent levels more acutely linked to changes in incomes of potential tenants.

National Policy Context

The National Planning Policy Framework

- 2.23 In July 2018, the government published a revised National Planning Policy Framework ('NPPF') and revised National Planning Practice Guidance ('NPPG').
- 2.24 Paragraph 34 of the NPPF states that *"Plans should set out the contributions expected from development. This should include setting out the levels and types of affordable housing provision required, along with other infrastructure (such as that needed for education, health, transport, flood and water management, green and digital infrastructure). Such policies should not undermine the deliverability of the plan"*.
- 2.25 Paragraph 57 of the NPPF suggests that *"Where up-to-date policies have set out the contributions expected from development, planning applications that comply with them should be assumed to be viable. It is up to the applicant to demonstrate whether particular circumstances justify the need for a viability assessment at the application stage. The weight to be given to a viability assessment is a matter for the decision maker, having regard to all the circumstances in the case, including whether the plan and the viability evidence underpinning it is up to date, and any change in site circumstances since the plan was brought into force. All viability assessments, including any undertaken at the plan-making stage, should reflect the recommended approach in national planning guidance, including standardised inputs, and should be made publicly available"*.

⁵ Knight Frank PRS Update August 2017

- 2.26 In London and other major cities, the fine grain pattern of types of development and varying existing use values make it impossible to realistically test a sufficient number of typologies to reflect every conceivable scheme that might come forward over the plan period. The Council's proposed approach of reflecting the Mayor of London's 'threshold' approach to affordable housing will allow schemes that cannot provide as much as 35% affordable housing to still come forward rather than being sterilised by a fixed or 'quota' based approach to affordable housing.
- 2.27 Prior to the publication of the updated NPPF, the meaning of a "*competitive return*" has been the subject of considerable debate over the past year. For the purposes of testing the viability of a Local Plan, the Local Housing Delivery Group⁶ concluded that the current use value of a site (or a credible alternative use value) plus an appropriate uplift, represents a competitive return to a landowner. Some members of the RICS considered that a competitive return is determined by market value⁷, although there was no consensus around this view. The revised NPPF removes the requirement for "competitive returns" and is silent on how landowner returns should be assessed. The revised PPG indicates that viability testing of plans should be based on existing use value plus a landowner premium. The revised PPG also expresses a preference for plan makers to test the viability of planning obligations and affordable housing requirements at the plan making stage in the anticipation that this may reduce the need for viability testing developments at the development management stage. Local authorities have, of course, been testing the viability of their plan policies since the first NPPF was adopted, but have adopted policies based on the most viable outcome of their testing, recognising that some schemes coming forward will not meet the targets. This approach maximises delivery, as there is flexibility for schemes to come forward at levels of obligations that are lower than the target, if a proven viability case is made. The danger of the approach in the revised NPPF is that policy targets will inevitably be driven down to reflect the least viable outcome; schemes that could have delivered more would not do so.

CIL Policy Context

- 2.28 As of April 2015 (or the adoption of a CIL Charging Schedule by a charging authority, whichever was the sooner), the S106/planning obligations system⁸ i.e. the use of 'pooled' S106 obligations, was limited to a maximum of five S106 agreements. The adoption of a CIL charging schedule is discretionary for a charging authority; however, the scaling back of the use of pooled S106 obligations is not discretionary. As such, should a Council elect not to adopt a CIL Charging Schedule, it may have implications with regard to funding infrastructure in their borough or district in future. Councils which decide not to adopt a charging schedule will need to be aware of such implications in their decision-making.
- 2.29 It is worth noting that some site specific S106 obligations remain available for negotiation, however these are restricted to site specific mitigation that meet the three tests set out at CIL Regulation 122 and to the provision of affordable housing. They cannot be used for securing payments towards infrastructure⁸ that benefit more than one development, unless they form part of a maximum of five S106 agreements, from which contributions to provide infrastructure can be pooled.
- 2.30 The CIL regulations state that in setting a charge, local authorities must strike "an appropriate balance" between revenue maximisation on the one hand and the potentially adverse impact upon the viability of development on the other. The regulations also state that local authorities should take account of other sources of available funding for infrastructure when setting CIL rates. This report deals with viability only and does not consider other sources of funding (this is addressed elsewhere within the Council's evidence base).
- 2.31 Local authorities must consult relevant stakeholders on the nature and amount of any proposed CIL at two stages; after publication of the Preliminary Draft Charging Schedule ("PDCS") and the Draft Charging Schedule ("DCS"). Following consultation, a charging schedule must be submitted for independent examination.

⁶ Viability Testing Local Plans: Advice for planning practitioners, June 2012

⁷ RICS Guidance Note: Financial Viability in Planning, August 2012

⁸ This infrastructure should not be identified on the Council's Regulation 123 list.

- 2.32 The payment of CIL becomes mandatory on all new buildings and extensions to buildings with a gross internal floorspace over 100 square metres once a charging schedule has been adopted. The CIL regulations allow a number of reliefs and exemptions from CIL. Firstly, affordable housing and buildings with other charitable uses (if a material interest in the land is owned by the charity and the development is to be used wholly or mainly for its charitable purpose) are subject to relief. Secondly, local authorities may, if they choose, elect to offer an exemption on proven viability grounds. A local authority wishing to offer exceptional circumstances relief in its area must first give notice publicly of its intention to do so. The local authority can then consider claims for relief on chargeable developments from landowners on a case by case basis. In each case, an independent expert with suitable qualifications and experience must be appointed by the claimant with the agreement of the local authority to assess whether paying the full CIL charge would have an unacceptable impact on the development's economic viability.
- 2.33 The exemption would be available for 12 months, after which time viability of the scheme concerned would need to be reviewed. To be eligible for exemption, regulation 55 states that the Applicant must enter into a Section 106 agreement; and that the Authority must be satisfied that granting relief would not constitute state aid. It should be noted however that CIL cannot simply be negotiated away or the local authority decide not to charge CIL.
- 2.34 CIL Regulation 40 includes a vacancy period test for calculating CIL liability so that vacant floorspace can be offset in certain circumstances. That is where a building that contains a part which has not been in lawful use for a continuous period of at least six months within the last three years, ending on the day planning permission first permits the chargeable development, the floorspace may not be offset.
- 2.35 The CIL regulations enable local authorities to set differential rates (including zero rates) for different zones within which development would take place and also for different types of development. The CIL Guidance set out in the NPPG (paragraph 022 Reference ID: 25-022-20140612) clarifies that CIL Regulation 13 permits charging authorities to levy *"differential rates by reference to different intended uses of development."* Charging authorities taking this approach need to ensure that such different rates are justified by a comparative assessment of the economic viability of those categories of development. Further the NPPG clarifies that the definition of "use" for this purpose is not tied to the classes of development in the Town and Country Planning Act (Use Classes) Order 1987, although that Order does provide a useful reference point.' The NPPG also sets out (paragraph 023 Reference ID: 25-023-20140612) that charging authorities may also set differential rates in relation to, scale of development i.e. by reference to either floor area or the number of units or dwellings.
- 2.36 The 2010 CIL regulations set out clear timescales for payment of CIL, which are varied according to the size of the payment, which by implication is linked to the size of the scheme. The 2011 amendments to the regulations allowed charging authorities to set their own timescales for the payment of CIL if they choose to do so. This is an important issue that the Council will need to consider, as the timing of payment of CIL can have an impact on an Applicant's cashflow (the earlier the payment of CIL, the more interest the Applicant will bear before the development is completed and sold).
- 2.37 The Government published the findings of the independent CIL review alongside the Housing White Paper in February 2017. The White Paper identified at paragraph 2.28 that the Government *"continue to support the existing principle that developers are required to mitigate the impacts of development in their area, in order to make it acceptable to the local community and pay for the cumulative impacts of development on the infrastructure of their area."* The White Paper summarised the main finding of the CIL review to be that *"the current system is not as fast, simple, certain or transparent as originally intended."*
- 2.38 As a result the Government committed to *"examine the options for reforming the system of developer contributions including ensuring direct benefit for communities, and will respond to the independent review and make an announcement at Autumn Budget 2017."* The government's recent consultation on changes to the NPPF includes proposed reforms of CIL, including the following potential changes:

- The potential for councils to adopt Strategic Infrastructure Tariffs ('SITs') to fund strategic infrastructure that cross borough boundaries. Any potential SIT proposals would need to be factored into the viability testing to ensure rates of CIL that are set are viable alongside SITs and Local Plan policies.
- Potential changes to the approach to consultation with stakeholders, with the current formal process replaced with a statement on how the Authority has engaged, which would form part of the Examination in Public.
- Potential removal of pooling restrictions on Section 106. If councils intend to collect funds for infrastructure through pooled contributions, any such contributions would need to be incorporated into viability testing to ensure that the CIL rates charged alongside Section 106 remain viable.
- Encouragement for setting specific rates for all uses on large strategic developments would require the testing of individual strategic sites to determine an appropriate and specific rate. Councils would need to identify which sites this may apply to.
- Setting rates according to existing uses of sites is a key change proposed by the government. This would enable councils to set higher rates on sites that are currently in low value uses (e.g. secondary industrial).
- Changes to the way CIL is indexed, moving from indexation by reference to changes in build costs to changes in values across the borough.

Mayoral CIL

- 2.39 The Borough is located within Mayoral CIL Zone 2, which attracts a rate of £35 per square metre before indexation⁹ which has been used to fund circa £300 million of the costs of the Crossrail construction project. The consultation on the proposed amendments to the Mayoral CIL indicates that a rate of £60 per square metre will be levied in Lambeth. In the parts of the borough within the Central Activities Zone, the Mayor is proposing to charge £185 per square metre on offices, £165 per square metre on retail and £140 per square metre on hotels. Future receipts from the Mayoral CIL will be used to contribute towards funding Crossrail 2 (a north-east to south-west line) to relieve pressure on existing transport networks.

Borough CIL

- 2.40 The Council approved its CIL Charging Schedule on 23 July 2014 and it came into effect on 1 October 2014. Table 2.40.1 below summarises the prevailing rates of CIL (the indexed rates are shown in italics¹⁰). For C3 residential developments in the north of the borough (Waterloo and Vauxhall), the adopted rate is £265 per square metre. In Kennington, Oval and Clapham, the adopted rate is £150 per square metre and in all other areas, the rate is £50 per square metre. In Waterloo and Vauxhall, hotels and offices attract a CIL charge of £100 and £125 per square metre respectively. Across the borough as a whole, large retail developments attract a charge of £115 per square metre and student accommodation attracts a charge of £215 per square metre.

⁹ The impact of indexation is discussed in section 6.

¹⁰ As per the CIL regulations, indexation applies to rates from the November in the year prior to implementation to the current date by reference to the BCIS All-In Tender Price Index. November 2013: 239; June 2018: 316. Change is 32.2%. The indexed rates are used in the appraisals.

Table 2.40.1: CIL rates per net additional square metre in the Charging Schedule (indexed rates shown in italics)

Development type	Zone A – Waterloo and Vauxhall	Zone B – Kennington, Oval and Clapham	Zone C –Streatham, West Norwood, Streatham Hill, Tulse Hill, Brixton and Herne Hill
Residential	£265 (£350)	£150 (£198)	£50 (£66)
Hotel	£100 (£132)	Nil	
Office	£125 (£165)	Nil	
Industrial	Nil		
Large retail development	£115 (£152)		
Other retail	Nil		
Student accommodation	£215 (£284)		
All other uses	Nil		

- 2.41 In 2014/15, the Council collected CIL payments totalling £54,533. This was the first year that CIL was in place in Lambeth and clearly it is unlikely that many schemes actually consented after the adoption date (1 October 2014) would have actually started on site or reached a point in construction where CIL payments are triggered. The receipts for 2015/16 totalled £3.26 million, which is a significant increase in receipts in comparison to the first half year CIL was in force. The following year (2016/17), CIL receipts in Lambeth increased to £7.83 million. The level of CIL receipts in Lambeth is higher than neighbouring boroughs with the exception of Tower Hamlets, which delivered more housing units than Lambeth (2,578 compared to 1,707 in Lambeth in 2015/16).

Table 2.41.1: CIL receipts in Lambeth and neighbouring boroughs

Borough	Adoption date	Income 2014/15	Income 2015/16	Income 2016/17	No of housing units completed ¹¹ 2015/16
Lambeth	1/10/14	£54,333	£3,258,552	£7,829,563	1,707
Southwark	1/4/15	-	£286,057	Not yet published	1,858
Lewisham	1/4/15	-	£1,440,464	£4,487,775	1,609
Greenwich	25/3/15	-	£20,255	£1,475,668	1,858
Tower Hamlets	1/4/15	-	£6,774,442	£18,338,813	2,578

Local Policy context

- 2.42 There are numerous policy requirements that are now embedded in base build costs for schemes in London addressing London Plan requirements, which are mirrored in borough Local Plans (i.e. secure by design, lifetime homes, landscaping, amenity space, internal space standards, car parking, waste storage, tree preservation and protection etc). Therefore it is unnecessary to establish the cost of all these pre-existing policy requirements.

¹¹ London Plan Annual Monitoring Report 2015/16 (July 2017). Lambeth's Annual Monitoring Report indicates that 1,668 additional dwellings were completed in 2016/17. None of the other boroughs had published their figures at the time of drafting this report.

- 2.43 In order to assess the ability of schemes to absorb higher CIL rates than those in the adopted Charing Schedule, it is also necessary to factor in the pre-existing requirements in the adopted policies. The affordable housing policy is tested at various percentages, as it has a significant bearing on the viability of developments, even though it has been in place for a considerable period.
- 2.44 Lambeth adopted its Local Plan in September 2015. We set out a summary of the policies identified as having cost implications for developments below:
- Policy D3 requires that developments will contribute towards the provision of essential community infrastructure that is required to support new housing, primarily through CIL and site-specific section 106 obligations.
 - Policy H2 requires schemes capable of providing 10 or more units to provide 40% affordable housing (or 50% if public subsidy is available) with a tenure mix of 70% rent and 30% intermediate. Small schemes of 9 or fewer units are required to provide the equivalent amount of affordable housing as a payment in lieu.
 - Policy EN3 requires that new major developments connect to decentralised heating where available, or provide on-site combined heat and power systems where feasible.
 - Policy EN4 requires that non-residential developments should achieve BREEAM excellent standards where technically feasible and financially viable.
 - Policy H7 requires that student housing development which is not linked to a higher education institution should provide affordable housing in line with Policy H2.
- 2.45 To inform its draft Local Plan, the Council has instructed us to test the following emerging plan policies:
- Revised Policy H2 seeks to maximise delivery of affordable housing in accordance with London Plan policy H6 which provides a threshold approach to delivery. Schemes which provide 35% affordable housing with a policy compliant tenure mix do not require supporting viability evidence and there are no post-implementation reviews providing the scheme is commenced no later than two years following grant of planning permission. Schemes which cannot provide 35% affordable housing must be supported by a viability submission and viability will be reviewed at a number of points pre and post implementation.
 - For build to rent schemes, we have tested the impact of draft London Plan policy H13C which requires 35% affordable housing, comprising at least 30% of units as London Living Rent with the balance at a range of discounts below market rent.
 - For large-scale purpose built shared housing, we have tested the impact of London Plan policy H18B which requires 35% affordable housing provided at a 50% discount to market rent.
 - For purpose built student housing, we have tested the impact of London Plan policy H17A4 which requires 35% of units to be provided at affordable rent levels (defined by reference to maximum maintenance loans available to students). In addition, the Council is considering seeking further financial contributions towards general needs affordable housing delivery from student housing developments.
 - For specialist housing for older people (C3 use class), we have tested the impact of London Plan policy H15B(1) which applies the affordable housing policy approach for general needs housing to this sector.
 - Draft London Plan space standards set out in Policy D4 and the child play-space requirement in Local Plan policy H5.
 - Accessibility standards set out in Policy D5 of the draft London Plan.

- Affordable workspace requirements on schemes which provide new or replacement B1 floorspace at 10% of floorspace with the following discounts: 20% discount for 15 years; 50% discount for 15 years; and 50% discount for 125 years.
- The impact of requirements of Local Plan policy ED14 and the Employment & Skills SPD 2018 which requires financial contributions towards training and apprenticeships.
- Low carbon requirements in draft London Plan policy S12C.
- Limitations on car parking provision in London Plan policy T6.1 and cycle storage provisions in draft London Plan policy D4.

Development context

- 2.46 Lambeth is an inner-London borough located in south London. The borough is bordered by the River Thames to the north, the Borough of Southwark to the east; the London Borough of Wandsworth to the west; and the boroughs of Merton and Croydon to the south. The borough has numerous transport hubs routes, including mainline trains from central London (Waterloo and Vauxhall) providing services to the south via National Rail services and to the south and north via the London Underground Victoria Line. The Borough will benefit from the extension of the Northern Line through the Nine Elms Vauxhall Opportunity Area, with a new Station at Nine Elms. Public Transport Accessibility Levels ('PTAL') are highest in Waterloo, Vauxhall, Oval, Kennington, Clapham, Herne Hill and Streatham.
- 2.47 The London Plan designates Vauxhall as part of the Nine Elms Vauxhall Opportunity Area with potential for significant housing provision, much of which has been consented and constructed.
- 2.48 Developments in Lambeth range from small in-fill sites to major regeneration schemes. The bulk of development (in terms of volume of units) is expected to come forward on sites in Town Centres and highly accessible locations such as Waterloo, Vauxhall, Brixton, Oval and Kennington.
- 2.49 The Borough has significant opportunities for development through the recycling of previously developed sites, including vacant and under-utilised buildings, commercial buildings, car parks and surplus public sector land.

3 Methodology and appraisal approach

- 3.1 Our methodology follows standard development appraisal conventions, using locally-based sites and assumptions that reflect local market and planning policy circumstances. The study is therefore specific to Lambeth and tests the Council's emerging planning policy requirements alongside existing and alternative CIL rates.

Approach to testing development viability

- 3.2 Appraisal models can be summarised via the following diagram. The total scheme value is calculated, as represented by the left hand bar. This includes the sales receipts from the private housing (the hatched portion) and the payment from a Registered Provider ('RP') (the chequered portion) for the completed affordable housing units. For a commercial scheme, scheme value equates to the capital value of the rental income after allowing for rent free periods and purchaser's costs. The model then deducts the build costs, fees, interest, planning obligations, CIL and developer's profit. A 'residual' amount is left after all these costs are deducted – this is the land value that the Developer would pay to the landowner. The residual land value is represented by the brown portion of the right hand bar in the diagram.

- 3.3 The Residual Land Value is normally a key variable in determining whether a scheme will proceed. If a proposal generates sufficient positive land value (in excess of existing use value, discussed later), it will be implemented. If not, the proposal will not go ahead, unless there are alternative funding sources to bridge the 'gap'.
- 3.4 Issues with establishing key appraisal variables are summarised as follows:
- Development costs are subject to national and local monitoring and can be reasonably accurately assessed in 'normal' circumstances. In Boroughs like Lambeth, many sites will be

previously developed. These sites can sometimes encounter ‘exceptional’ costs such as decontamination. Such costs can be very difficult to anticipate before detailed site surveys are undertaken;

- Assumptions about development phasing, phasing of Section 106 contributions and infrastructure required to facilitate each phase of the development will affect residual values. Where the delivery of the obligations are deferred, the less the real cost to the applicant (and the greater the scope for increased affordable housing and other planning obligations). This is because the interest cost is reduced if the costs are incurred later in the development cashflow; and
 - While Developer’s Profit has to be assumed in any appraisal, its level is closely correlated with risk. The greater the risk, the higher the profit level required by lenders. While profit levels were typically up to around 15% of completed development value at the peak of the market in 2007, banks currently require schemes to show a higher profit to reflect the current risk. Typically developers and banks are targeting around 17-20% profit on value of the private housing element.
- 3.5 Ultimately, the landowner will make a decision on implementing a project on the basis of return and the potential for market change, and whether alternative developments might yield a higher value. The landowner’s ‘bottom line’ will be achieving a residual land value that sufficiently exceeds ‘existing use value¹²’ or another appropriate benchmark to make development worthwhile. The margin above existing use value may be considerably different on individual sites, where there might be particular reasons why the premium to the landowner should be lower or higher than other sites.
- 3.6 Clearly, however, landowners have expectations of the value of their land which often exceed the value of the current use. Ultimately, if landowners’ reasonable expectations are not met, they will not voluntarily sell their land and (unless a Local Authority is prepared to use its compulsory purchase powers) some may simply hold on to their sites, in the hope that policy may change at some future point with reduced requirements. However, the communities in which development takes place also have reasonable expectations that development will mitigate its impact, in terms of provision of community infrastructure, which will reduce land values. It is within the scope of those expectations that developers have to formulate their offers for sites. The task of formulating an offer for a site is complicated further still during buoyant land markets, where developers have to compete with other developers to secure a site, often speculating on increases in value.

Viability benchmark

- 3.7 In July 2018, the government published a revised NPPF, which indicates at paragraph 34 that *“Plans should set out the contributions expected from development. This should include setting out the levels and types of affordable housing provision required, along with other infrastructure (such as that needed for education, health, transport, flood and water management, green and digital infrastructure). Such policies should not undermine the deliverability of the plan”*. The revised PPG indicates that for the purposes of testing viability, local authorities should have regard to existing use value of land plus a premium to incentivise release for redevelopment.
- 3.8 The Mayor’s Affordable Housing and Viability SPG focuses on decision making in development management, rather than plan making, but indicates that benchmark land values should be based on existing use value plus a premium which should be *“fully justified based on the income generating capacity of the existing use with reference to comparable evidence on rents, which excludes hope value associated with development on the site or alternative uses”*.
- 3.9 The Local Housing Delivery Group published guidance¹³ in June 2012 which provides guidance on testing viability of Local Plan policies. The guidance notes that *“consideration of an appropriate Threshold Land Value [or viability benchmark] needs to take account of the fact that future plan*

¹² For the purposes of this report, existing use value is defined as the value of the site in its existing use, assuming that it remains in that use. We are not referring to the RICS Valuation Standards definition of ‘Existing Use Value’.

¹³ Viability Testing Local Plans: Advice for planning practitioners, Local Housing Delivery Group, Chaired by Sir John Harman, June 2012

policy requirements will have an impact on land values and landowner expectations. Therefore, using a market value approach as the starting point carries the risk of building-in assumptions of current policy costs rather than helping to inform the potential for future policy”.

- 3.10 In light of the weaknesses in the market value approach, the Local Housing Delivery Group guidance recommends that benchmark land value “*is based on a premium over current use values*” with the “*precise figure that should be used as an appropriate premium above current use value [being] determined locally*”. The guidance considers that this approach “*is in line with reference in the NPPF to take account of a “competitive return” to a willing land owner*”.

- 3.11 The examination on the Mayor of London’s first CIL charging schedule considered the issue of an appropriate land value benchmark. The Mayor had adopted existing use value, while certain objectors suggested that ‘Market Value’ was a more appropriate benchmark. The Examiner concluded that:

“The market value approach.... while offering certainty on the price paid for a development site, suffers from being based on prices agreed in an historic policy context.” (paragraph 8) and that “I don’t believe that the EUV approach can be accurately described as fundamentally flawed or that this examination should be adjourned to allow work based on the market approach to be done” (paragraph 9).

- 3.12 In his concluding remark, the Examiner points out that

*“the price paid for development land may be reduced [so that CIL may be accommodated]. As with profit levels there may be cries that this is unrealistic, but **a reduction in development land value is an inherent part of the CIL concept**. It may be argued that such a reduction may be all very well in the medium to long term but it is impossible in the short term because of the price already paid/agreed for development land. The difficulty with that argument is that if accepted the prospect of raising funds for infrastructure would be forever receding into the future. In any event in some instances it may be possible for contracts and options to be re-negotiated in the light of the changed circumstances arising from the imposition of CIL charges. (paragraph 32 – emphasis added).*

- 3.13 It is important to stress, therefore, that there is no single threshold land value at which land will come forward for development. The decision to bring land forward will depend on the type of owner and, in particular, whether the owner occupies the site or holds it as an asset; the strength of demand for the site’s current use in comparison to others; how offers received compare to the owner’s perception of the value of the site, which in turn is influenced by prices achieved by other sites. Given the lack of a single threshold land value, it is difficult for policy makers to determine the minimum land value that sites should achieve. This will ultimately be a matter of judgement for each planning authority.
- 3.14 Respondents to consultations on planning policy documents in other authorities in London have made various references to the RICS Guidance on ‘Viability in Planning’ and have suggested that councils should run their analysis on market values. This would be an extremely misleading measure against which to test viability, as market values should reflect *existing policies already in place*, and would consequently tell us nothing as to how future (as yet un-adopted) policies might impact on viability. It has been widely accepted elsewhere that market values are inappropriate for testing planning policy requirements.
- 3.15 Relying upon historic transactions is a fundamentally flawed approach, as offers for these sites will have been framed in the context of current planning policy requirements, so an exercise using these transactions as a benchmark would tell the Council nothing about the potential for sites to absorb as yet unadopted policies. Various Local Plan inspectors and CIL examiners have accepted the key point that Local Plan policies and CIL will ultimately result in a reduction in land values, so benchmarks must consider a reasonable minimum threshold which landowners will accept. For local authority areas such as Lambeth, where the vast majority of sites are previously developed, the ‘bottom line’ in terms of land value will be the value of the site in its existing use. This fundamental point is recognised by the RICS at paragraph 3.4.4. of their Guidance Note on ‘Financial Viability in Planning’:

“For a development to be financially viable, any uplift from current use value to residual land value that arises when planning permission is granted should be able to meet the cost of planning obligations while ensuring an appropriate Site Value for the landowner and a market risk adjusted return to the developer in delivering that project (the NPPF refers to this as ‘competitive returns’ respectively). The return to the landowner will be in the form of a land value in excess of current use value”.

- 3.16 The Guidance goes on to state that *“it would be inappropriate to assume an uplift based on set percentages ... given the diversity of individual development sites”*.
- 3.17 Commentators also make reference to ‘market testing’ of benchmark land values. This is another variant of the benchmarking advocated by respondents outlined at paragraph 3.13. These respondents advocate using benchmarks that are based on the prices that sites have been bought and sold for. There are significant weaknesses in this approach which none of the respondents who advocate this have addressed. In brief, prices paid for sites are a highly unreliable indicator of their actual value, due to the following reasons:
- Transactions are often based on bids that ‘take a view’ on squeezing planning policy requirements below target levels. This results in prices paid being too high to allow for policy targets to be met. If these transactions are used to ‘market test’ CIL rates, the outcome would be unreliable and potentially highly misleading.
 - Historic transactions of housing sites are often based on the receipt of grant funding, which is no longer available in most cases.
 - There would be a need to determine whether the developer who built out the comparator sites actually achieved a profit at the equivalent level to the profit adopted in the viability testing. If the developer achieved a sub-optimal level of profit, then any benchmarking using these transactions would produce unreliable and misleading results.
 - Developers often build assumptions of growth in sales values into their appraisals, which provides a higher gross development value than would actually be achieved today. Given that our appraisals are based on current values, using prices paid would result in an inconsistent comparison (i.e. current values against the developer’s assumed future values). Using these transactions would produce unreliable and misleading results.
- 3.18 These issues are evident from a recent BNP Paribas Real Estate review of evidence submitted in viability assessments where the differences between the value ascribed to developments by applicants and the amounts the sites were purchased for by the same parties. The prices paid exceeded the value of the consented schemes by between 52% and 1,300%, as shown in Figure 3.18.1. This chart compares the residual value of four central London development proposals to the sites’ existing use values and the price which the developers paid to acquire the sites (all the data is on a per unit basis).

Figure 3.18.1: Comparison of scheme residual value to existing use value and price paid for site

- 3.19 For the reasons set out above, the approach of using current use values is a more reliable indicator of viability than using market values or prices paid for sites, as advocated by certain observers. Our assessment follows this approach, as set out in Section 4.
- 3.20 The NPPG indicates that planning authorities should adopt benchmark land values based on existing use values. It then goes on to suggest that the premium above existing use value should be informed by land transactions. This would in effect simply level benchmark land values up to market value, with all the issues associated with this (as outlined above). The NPPG does temper this approach by indicating that *“the landowner premium should be tested and balanced against emerging policies”* and that *“the premium should provide a reasonable incentive for a land owner to bring forward land for development while allowing a sufficient contribution to comply with policy requirements”*. The guidance also stresses in several places that “price paid for land” should not be reflected in viability assessments. This would exclude use of transactional data thus addressing the issues highlighted in paragraphs 3.17 and 3.18.

4 Appraisal assumptions

- 4.1 We have appraised 29 development typologies on sites across the borough to represent the types of sites that the Council expects to come forward over the life of the new Local Plan and a potential replacement Charging Schedule. The development typologies are identified in Table 4.1.1 overleaf. Floor areas for commercial uses are gross internal areas and are indicative estimates only without the benefit of detailed design. The appraisals include sufficient gross internal floorspace to accommodate the housing mix identified in Local Plan Policy H4 and space standards in Policy D4 of the draft London Plan.

Residential sales values

- 4.2 Residential values in the area reflect national trends in recent years but do of course vary between different sub-markets, as noted in Section 2. We have considered comparable evidence of new build schemes in the borough to establish appropriate values for each scheme for testing purposes. This exercise indicates that the developments in the sample will attract average sales values ranging from circa £7,800 per square metre (£725 per square foot) to £17,000 per square metre (£1,600 per square foot), as shown in Figure 2.17.1. As noted in Section 2, the highest sales values are achieved in Waterloo and Vauxhall. Developments in parts of the south of the borough are lowest, but there are fewer sites available in this area than in other parts of the borough.
- 4.3 We have tested the impact of the provision of private units as rented by discounting the market value for these units by 20%, which reflects the discount we have seen on live developments when units are provided as Private Rented Sector stock. As noted in Section 2, this discount is offset to a degree by a reduction in profit margin of circa 5%, so the net reduction in value is 15%.
- 4.4 As noted earlier in the report, Savills predict that sales values will increase over the medium term (i.e. the next five years). Whilst this predicted growth cannot be guaranteed, we have run a series of sensitivity analyses assuming growth in sales values accompanied by cost inflation as summarised in Table 4.4.1. While these growth scenarios are based on a number of forecasts, they cannot be guaranteed and the results which these scenarios produce must be viewed as indicative only. We have also increased the benchmark land values in the growth scenarios by 20%, reflecting some improvement in the value of secondary assets.

Table 4.4.1: Growth scenario

Year	1	2	3	4	5	6
	2017	2018	2019	2020	2021	2022 and each year thereafter
Values	1%	3%	4%	4%	4.5%	4%
Costs	2.0%	2.0%	2.5%	2.5%	2.5%	2.5%

Affordable housing tenure and values

- 4.5 Emerging Policy H2 requires schemes capable of providing 10 or more units to provide at least 35% affordable housing (or 50% if public subsidy is available; or if the site is in public ownership; or if the lawful existing use of the site is industrial) with a tenure mix of 70% rent and 30% intermediate. Small schemes of 9 or fewer units are required to provide the equivalent amount of affordable housing as a payment in lieu.
- 4.6 For the purposes of establishing potential CIL rates, our appraisals assume that the rented housing is let at rents that do not exceed London Affordable Rents, as shown in Table 4.6.1. These rents are broadly equivalent to social/target rents and are therefore the lowest rates that the Council is considering in terms of its policy options.

Table 4.1.1: Development typologies tested in the study (all areas are square metre gross internal areas)

Site	Description	Site area hectares	Site area sqm	Units	Ave GIA sqm per unit	Residential floorspace sqm	A use	Super-market	B1	B2	B8	C1 Hotel	C2	D1	D2	Gross floorspace	No of floors
1	Res1 - low density mix of terrace and flats	0.04	400	8	91	724	-	-	-	-	-	-	-	-	-	724	3
2	Res2 - relatively low density - flats	0.10	1,000	24	91	2,172	-	-	-	-	-	-	-	-	-	2,172	4
3	Res3 - Med size site - mix of terrace and flats	0.30	3,000	80	91	7,240	-	-	-	-	-	-	-	-	-	7,240	4
4	Res4 - Med size site - flats	0.15	1,500	80	91	7,240	-	-	-	-	-	-	-	-	-	7,240	8
5	Res5 - Larger low density scheme	0.60	6,000	150	91	13,575	-	-	-	-	-	-	-	-	-	13,575	4
6	Res6 - Mid-size flatted scheme	0.40	4,000	225	91	20,363	-	-	-	-	-	-	-	-	-	20,363	9

Table 4.6.1: Affordable housing rents (per week)

Rent type	1 bed	2 bed	3 bed	4 bed
London Affordable Rent	£150.03	£158.84	£167.67	£176.49
Affordable Rent (not exceeding LHA)	£210.20	£273.25	£330.72	£417.02
London Living Rent (intermediate tenure)	£210.97	£234.42	£257.88	£281.33

- 4.7 In the July 2015 Budget, the Chancellor announced that Registered Providers ('RPs') will be required to reduce rents by 1% per annum for the next four years. This will reduce the capital values that RPs will pay developers for completed affordable housing units. From 2019/20 onwards, RPs will be permitted to increase rents by CPI plus 1% per annum. Given that rents will be increasing by CPI plus 1% by the time the new Charging Schedule will be in place, we have applied this assumption to our appraisals.
- 4.8 For the purposes of testing the emerging Local Plan policy, we have tested a range of affordable housing tenure options, as summarised in Table 4.8.1.

Table 4.8.1: Affordable housing options tested

Description of option	% rented	Type of rented housing	% intermediate	Intermediate housing income thresholds
A1 Standard approach, with grant	70%	London Affordable Rent	30%	Intermediate products for households on £90,000 per annum incomes
A2 Standard approach, no grant	70%	1 & 2 beds at LHAs, 3+ beds social rents	30%	Intermediate products for households on £90,000 per annum incomes
A3 Standard approach, no grant	70%	1 & 2 beds at LHAs, 3+ beds social rents	30%	67% of intermediate units for households on incomes of up to £60,000 per annum; 33% of intermediate units for households on incomes of up to £90,000 per annum
A4 Standard approach, no grant	70%	1 & 2 beds at LHAs, 3+ beds social rents	30%	33% of intermediate units for households on incomes of up to £60,000 per annum; 67% of intermediate units for households on incomes of up to £90,000 per annum
A5 Standard approach, no grant	70%	1 & 2 beds at LHAs, 3+ beds social rents	30%	100% of intermediate units for households on incomes of up to £90,000 per annum
B1 Standard approach, with grant	70%	London Affordable Rent	30%	Intermediate products for households on £90,000 per annum incomes
B2 Standard approach, no grant	70%	1 & 2 beds at LHAs, 3+ beds social rents	30%	Intermediate products for households on £90,000 per annum incomes
B3 Standard approach, no grant	70%	1 & 2 beds at LHAs, 3+ beds social rents	30%	67% of intermediate units for households on incomes of up to £60,000 per annum; 33% of intermediate units for households on incomes of up to £90,000 per annum

Description of option	% rented	Type of rented housing	% intermediate	Intermediate housing income thresholds
B4 Standard approach, no grant	70%	1 & 2 beds at LHAs, 3+ beds social rents	30%	33% of intermediate units for households on incomes of up to £60,000 per annum; 67% of intermediate units for households on incomes of up to £90,000 per annum
B5 Standard approach, no grant	70%	1 & 2 beds at LHAs, 3+ beds social rents	30%	100% of intermediate units for households on incomes of up to £90,000 per annum
C1 Build to Rent	70%	57% of units at rents not exceeding LHAs 43% of units at London Affordable Rent	30%	100% of intermediate units for households on incomes of up to £60,000 (London Living Rent)
C2 Build to Rent	100%	1 & 2 beds at LHAs, 3+ beds social rents	-	-
C3 Build to Rent	70%	All units at LHA	30%	100% of intermediate units for households on incomes of up to £60,000 (London Living Rent)
C4 Build to Rent	70%	100% of units at London Affordable Rent	30%	100% of intermediate units for households on incomes of up to £60,000 (London Living Rent)

- 4.9 The key issue for development viability is the capital value that each tenure will generate in terms of receipt from the acquiring RPs, as this will be one of the inputs that constitutes the Gross Development Value of a development. Table 4.9.1 summarises the capital values that each tenure would generate, using a mix of 25% one beds, 55% two beds and 30% three beds for rented units and 50% one beds and 50% two beds for shared ownership.

Table 4.9.1: Capital values of affordable housing (per square foot Net Internal Area)

Tenure	1 bed	2 bed	3 bed	4 bed	Blended value
London Affordable Rent	£309	£244	£197	£198	£226
Affordable Rent (not exceeding LHA) for 1 and 2 beds, London Affordable Rent for 3 and 4 beds	£416	£405	£197	£198	£318
Affordable Rent (not exceeding LHA) all units	£416	£405	£363	£436	£381
London Living Rent	£418	£333	£258	£252	£304
Shared ownership (incomes of £90,000)	£544	£525	-	-	£506
Shared ownership (incomes of £60,000)	£440	£306	-	-	£346

- 4.10 The CLG/HCA 'Shared Ownership and Affordable Homes Programme 2016-2021: Prospectus' document clearly states that Registered Providers will not receive grant funding for any affordable housing provided through planning obligations on developer-led developments. Consequently, all our appraisals which we rely upon for testing potential CIL rates assume nil grant. Clearly if grant funding does become available over the plan period, it should facilitate an increase in the provision of affordable housing when developments come forward.
- 4.11 For shared ownership units, the Council could impose a planning requirement that caps the maximum household income of purchasers to £60,000 (or indeed a lower income level). This will

reduce the capital value as shown in Table 4.10.1 above.

Rents and yields for commercial development

- 4.12 Our assumptions on rents and yields for the retail, office and industrial floorspace are summarised in Table 4.12.1. These assumptions are informed by lettings of similar floorspace in the area over the past year. Our appraisals assume a 12 month rent-free period for both retail and office floorspace.

Table 4.13.1: Commercial rents (£s per square metre) and yields

Commercial floorspace	Rent per square metre	Investment yield	Rent free period (months)
Retail	North: £450	5.00%	12
	Mid-borough-: £400	5.75%	12
	South: £325	6.00%	12
Office	North: £700	5.25%	12
	Mid-borough-: £400	5.75%	12
	South: £350	6.00%	12
Industrial and warehousing	North: £160	6.00%	12
	Mid-borough-: £160	6.00%	12
	South: £160	6.00%	12
Hotel	North: £450	5.00%	12
	Mid-borough-: £400	5.00%	12
	South: £350	5.00%	12
Student housing/Co-living	North: £452	5.00%	12
	Mid-borough-: £452	5.00%	12
	South: £452	5.00%	12

Build costs

- 4.13 We have sourced build costs from the RICS Building Cost Information Service (BCIS), which is based on tenders for actual schemes. Base costs (adjusted for local circumstances by reference to BICS multiplier) are as follows:
- Houses: £1,371 per square metre;
 - Flats (3 – 5 storeys): £1,612 per square metre;
 - Flats (6+ storeys): £1,901 per square metre;
 - Flats (20+ storeys): £2,281 per square metre;
 - Retail: £1,627 per square metre;
 - Supermarkets: £1,524 per square metre;
 - Offices: £2,082 per square metre;
 - B2 Industrial: £1,204 per square metre;
 - Warehouse/storage: £1,064 per square metre;
 - Student housing and co-living: £2,014 per square metre;
 - Hotel: £1,982 per square metre
 - D1/D2 Education, health, leisure etc: £1,612 per square metre.
- 4.14 In addition, the base costs above are increased by 15% to account for external works (including car

parking spaces) and 6% for the costs of meeting the energy requirements now embedded into Part L of the Building Regulations.

Zero carbon and BREEAM

- 4.15 The 'Greater London Authority Housing Standards Review: Viability Assessment' estimates that the cost of achieving zero carbon standards is 1.4% of base build costs. We have applied this uplift in costs to the base build costs outlined above.
- 4.16 For commercial developments, we have increased base build costs by 2% to allow for the extra-over costs of achieving BREEAM 'excellent' standard¹⁴. This is assumed to also address the 'excellent;' standard in relation to water efficiency, for which no clear data is available.

Accessibility standards

- 4.17 Our appraisals assume that all units are constructed to meet wheelchair accessibility standards (Category 2) apply to all dwellings at an average cost of £521 per house and £924 per unit for flats. In addition, we have assumed that Category 3 standard applies to 10% of dwellings at a cost of £22,694 per house and £7,908 per flat¹⁵. These costs address both parts A and B of the requirements (i.e. that the communal areas are designed and fitted out to allow wheelchair access and also that the dwellings themselves are designed and fitted out to facilitate occupation by wheelchair users).

Professional fees

- 4.18 In addition to base build costs, schemes will incur professional fees, covering design and valuation, highways consultants and so on. Our appraisals incorporate a 10% allowance, which is at the middle to higher end of the range for most schemes.

Development finance

- 4.19 Our appraisals assume that development finance can be secured at a rate of 6%, inclusive of arrangement and exit fees, reflective of current funding conditions.

Marketing costs

- 4.20 Our appraisals incorporate an allowance of 3% for marketing costs, which includes show homes and agents' fees, plus 0.5% for sales legal fees.

Mayoral CIL

- 4.21 Mayoral CIL is payable on most developments that receive planning consent from 1 April 2012 onwards. Lambeth falls within Zone 3, where a CIL of £35 per square metre is levied. The Mayoral CIL takes precedence over Borough requirements, including affordable housing. Our appraisals take into account Mayoral CIL.
- 4.22 The Mayor has recently issued a consultation on amendments to the CIL which will (if adopted) increase the rate in Lambeth to £60 per square metre. In the parts of the borough within the Central Activities Zone, the Mayor is proposing to charge £185 per square metre on offices, £165 per square metre on retail and £140 per square metre on hotels. We have applied this increased rate in our appraisals¹⁶. The proposed Mayoral CIL rates are due to be examined in September 2018 with an anticipated date for introduction of 1 April 2019. If the Mayoral CIL rates change, the Council would need to consider any potential impact on its own rates. However, CIL rates have never increased as a result of examination and have only been reduced. Given that we have applied the full proposed

¹⁴ Based on 'Delivering Sustainable Buildings: savings and payback', BREEAM and Sweett Group Research 2014, which identified an increase of between 0.87% to 1.71% of build costs

¹⁵ Based on DCLH 'Housing Standards Review: Cost Impacts' September 2014

¹⁶ The current Mayoral CIL Charging Schedule rate of £35 after indexation has been applied is currently £45.20 per square metre.

CIL rates any changes will almost certainly be downwards which will improve viability.

Lambeth CIL

- 4.23 As previously noted, the Council approved its CIL Charging Schedule on 23 July 2014 and it came into effect on 1 October 2014. Table 4.23.1 below summarises the prevailing rates of CIL (the indexed rates are shown in italics¹⁷). For C3 residential developments in the north of the borough (Waterloo and Vauxhall), the adopted rate is £265 per square metre. In Kennington, Oval and Clapham, the adopted rate is £150 per square metre and in all other areas, the rate is £50 per square metre. In Waterloo and Vauxhall, hotels and offices attract a CIL charge of £100 and £125 per square metre respectively. Across the borough as a whole, large retail developments attract a charge of £115 per square metre and student accommodation attracts a charge of £215 per square metre.

Table 4.23.1: CIL rates per net additional square metre in the Charging Schedule (indexed rates shown in italics)

Development type	Zone A – Waterloo and Vauxhall	Zone B – Kennington, Oval and Clapham	Zone C –Streatham, West Norwood, Streatham Hill, Tulse Hill, Brixton and Herne Hill
Residential	£265 (£350)	£150 (£198)	£50 (£66)
Hotel	£100 (£132)	Nil	
Office	£125 (£165)	Nil	
Industrial	Nil		
Large retail development	£115 (£152)		
Other retail	Nil		
Student accommodation	£215 (£284)		
All other uses	Nil		

- 4.24 The amended CIL Regulations specify that if any part of an existing building is in lawful use for 6 months within the 36 months prior to the time at which planning permission first permits development, all of the existing floorspace will be deducted when determining the amount of chargeable floorspace. This is likely to be the case for many development sites in Lambeth but not all existing floorspace will qualify. Therefore, for the purposes of our appraisals, we have assumed that there is no deduction for existing floorspace to ensure that the proposed CIL rate is viable for developments where there is no qualifying existing floorspace to net off.

Section 106 costs

- 4.25 To account for residual Section 106 requirements, we have included an allowance of up to £30 per square metre for non-residential development and up to £1,900 per unit for residential development (the precise amount varies between the typologies, as shown at Appendix 1). This assumption is based on median figures from a range of Section 106 agreements identified by the Council. The actual amounts will of course be subject to site-specific negotiations when schemes are brought forward through the development management process.

¹⁷ As per the CIL regulations, indexation applies to rates from the November in the year prior to implementation to the current date by reference to the BCIS All-In Tender Price Index. November 2013: 239; June 2018: 316. Change is 32.2%. The indexed rates are used in the appraisals.

- 4.26 In addition to the allowances above, our appraisals include an allowance for Section 278 works of £1,000 per residential unit and £15 per square metre for commercial developments.

Employment and training requirements

- 4.27 The Council's Employment and Training SPD was adopted in February 2018 which requires financial contributions as follows, all of which have been incorporated in our appraisals:
- 1 apprenticeship per 1,000 square metres of gross floorspace at a cost of £26,000 per apprenticeship;
 - 1 supported employment opportunity for people with learning disabilities or mental health problems per 2,500 square metres of gross internal floor area, at a cost of £8,217 per opportunity;
 - Notification of job vacancies from construction end end-use and working with the Council to provide bespoke pre-employment and skills training for Lambeth residents: No of construction jobs calculated as being 16 jobs per £1 million of construction costs¹⁸ and 1 job per 20 square metres of retail floorspace; 1 job per 13 square metre of office floorspace; 1 job per 36 square metre of B2 floorspace; and 1 job per 70 square metres of B8 floorspace. Payment to equate to £6,500 per job multiplied by the number of jobs expected multiplied by 25% (the percentage of Lambeth residents to be employed in the workforce) multiplied by 17.8% (the percentage of Lambeth residents needing training)
 - Engagement with young people at a cost of £14,951 multiplied by 50% of the number of apprenticeships expected to be provided.

Student housing – affordable student housing provision

- 4.28 The new draft London Plan policy H17A4 requires that student housing makes provision for affordable student accommodation, which we have applied using the £155 per week benchmark rent. In our appraisals, the percentage of affordable student accommodation is applied at the same rate as other residential schemes (i.e. 50% or 35%).
- 4.29 We understand that the Council is considering seeking an additional financial contribution towards general needs affordable housing. The scope for such payments can be identified in tables 6.7.1 to 6.7.15 which show the maximum amount of residual land value after deducting the benchmark land value. The proposed level of CIL would need to be deducted from these amounts and the net amount would show the total capacity for additional payments in lieu. Clearly the Council would need to leave a buffer below the maximum amount identified to allow for site-specific variations including abnormal costs.

Affordable workspace

- 4.30 The Council is seeking to secure affordable workspace in commercial developments at a rate of 10% of floorspace. We have tested discounts of 20% to market rent for a 15 year period; 50% of market rent for 15 years and 50% of market rents for 125 years.

Development and sales periods

- 4.31 Development and sales periods vary between type of scheme. However, our sales periods are based on an assumption of a sales rate of 6 units per month, with an element of off-plan sales reflected in the timing of receipts. This is reflective of current market conditions, whereas in improved markets, a sales rate of up to 8 units per month might be expected. We also note that many schemes in London have sold entirely off-plan, in some cases well in advance of completion of construction. Clearly markets are cyclical and sales periods will vary over the economic cycle and the extent to which units are sold off-plan will vary over time. Our programme assumptions assume that units are sold over varying periods after completion, which is a conservative approach that

¹⁸ As calculated by LB Newham for the purposes of its Employment and Training tariffs.

ensures that the proposed CIL rates are viable for most developments.

Developer's profit

- 4.32 Developer's profit is closely correlated with the perceived risk of residential development. The greater the risk, the greater the required profit level, which helps to mitigate against the risk, but also to ensure that the potential rewards are sufficiently attractive for a bank and other equity providers to fund a scheme. In 2007, profit levels were at around 13-15% of GDV. However, following the impact of the credit crunch and the collapse in interbank lending and the various government bailouts of the banking sector, profit margins have increased. It is important to emphasise that the level of minimum profit is not necessarily determined by developers (although they will have their own view and the Boards of the major housebuilders will set targets for minimum profit).
- 4.33 The views of the banks which fund development are more important; if the banks decline an application by a developer to borrow to fund a development, it is very unlikely to proceed, as developers rarely carry sufficient cash to fund it themselves. Consequently, future movements in profit levels will largely be determined by the attitudes of the banks towards development proposals.
- 4.34 The near collapse of the global banking system in the final quarter of 2008 is resulting in a much tighter regulatory system, with UK banks having to take a much more cautious approach to all lending. In this context, and against the backdrop of the current sovereign debt crisis in the Eurozone, the banks were for a time reluctant to allow profit levels to decrease. However, perceived risk in the UK housing market is receding, albeit there is a degree of caution in prime central London markets as a consequence of the outcome of the referendum on the UK's membership of the EU. We have therefore adopted a profit margin of 18% of private GDV for testing purposes, although individual schemes may require lower or higher profits, depending on site specific circumstances.
- 4.35 Our assumed return on the affordable housing GDV is 6%. A lower return on the affordable housing is appropriate as there is very limited sales risk on these units for the developer; there is often a pre-sale of the units to an RP prior to commencement. Any risk associated with take up of intermediate housing is borne by the acquiring RP, not by the developer. A reduced profit level on the affordable housing reflects the GLA 'Development Control Toolkit' guidance (February 2014) and Homes and Communities Agency's guidelines in its Development Appraisal Tool (August 2013).

Exceptional costs

- 4.36 Exceptional costs can be an issue for development viability on previously developed land. These costs relate to works that are 'atypical', such as remediation of sites in former industrial use and that are over and above standard build costs. However, in the absence of detailed site investigations, it is not possible to provide a reliable estimate of what exceptional costs might be. Our analysis therefore excludes exceptional costs, as to apply a blanket allowance would generate misleading results. An 'average' level of costs for abnormal ground conditions and some other 'abnormal' costs is already reflected in BCIS data, as such costs are frequently encountered on sites that form the basis of the BCIS data sample.

Benchmark land value

- 4.37 Benchmark land value, based on the existing use value of sites is a key consideration in the assessment of development economics for testing planning policies and tariffs. Clearly, there is a point where the Residual Land Value (what the landowner receives from a developer) that results from a scheme may be less than the land's existing use value. Existing use values can vary significantly, depending on the demand for the type of building relative to other areas. Similarly, subject to planning permission, the potential development site may be capable of being used in different ways – as a hotel rather than residential for example; or at least a different mix of uses. Existing use value is effectively the 'bottom line' in a financial sense and therefore a key factor in this study.
- 4.38 We have arrived at a broad judgement on the likely range of benchmark land values. On previously

developed sites, the calculations assume that the landowner has made a judgement that the current use does not yield an optimum use of the site; for example, it has fewer storeys than neighbouring buildings; or there is a general lack of demand for the type of space, resulting in low rentals, high yields and high vacancies (or in some cases no occupation at all over a lengthy period). We would not expect a building which makes optimum use of a site and that is attracting a reasonable rent to come forward for development, as residual value may not exceed current use value in these circumstances.

- 4.39 Redevelopment proposals that generate residual land values below current use values are unlikely to be delivered. While any such thresholds are only a guide in 'normal' development circumstances, it does not imply that individual landowners, in particular financial circumstances, will not bring sites forward at a lower return or indeed require a higher return. If proven current use value justifies a higher benchmark than those assumed, then appropriate adjustments may be necessary. As such, current use values should be regarded as benchmarks rather than definitive fixed variables on a site by site basis.
- 4.40 Sites will be in various existing uses and for the purposes of the study, we have adopted a range of benchmark land values from £2.5 million to £75 million per gross hectare, inclusive of any premium deemed to be required to incentivise release of land for development. This range is informed by our analysis of benchmark land values in submitted viability appraisals over the last two years. Table 4.39.1 summarises the benchmark land values adopted in our appraisals.

Table 4.40.1: Benchmark land values adopted (£ millions per gross hectare) including premium

Uses	Zone A	Zone B	Zone C
Offices	£75.00	£35.00	£25.00
Existing residential	£55.00	£29.00	£10.00
Public houses	£6.50	£18.00	£30.00
Industrial	£2.75	£5.00	£7.50

5 Appraisal outputs

- 5.1 The full inputs to and outputs from our appraisals of the various developments are set out in Section 6 and appendices 2 to 5. We have appraised 29 development typologies, reflecting different densities and types of development across the Borough. These typologies include non-residential uses, including offices, hotels and retail floorspace.
- 5.2 Each appraisal incorporates (where relevant) the following levels of affordable housing in line with Policy H2:
- 50% affordable housing (public land or land released from industrial use);
 - 35% affordable housing (Mayor of London's 'threshold' approach).
- 5.3 For the purposes of testing levels of CIL, the affordable housing is assumed to be provided as 70% rent (at London Affordable Rent) and 30% intermediate housing (affordable to households on incomes not exceeding £60,000 per annum). Additional affordable housing tenure mixes are provided for the purposes of informing the emerging Local Plan policy.
- 5.4 For small sites that fall below the 10 unit threshold, we have factored in the affordable housing requirement as on-site units to test their ability to a potential affordable housing requirement as well as CIL. In practice, the Council seeks such schemes to make payments in lieu of on-site delivery, but the method of calculation reflects our approach for viability testing¹⁹.
- 5.5 For each development typology, we have tested a range of sales values, reflecting the spread identified in the previous section. Where the residual land value of a typology exceeds the benchmark land value, we have converted the surplus into a rate per square metre, which is equivalent to the maximum CIL that could, in theory, be charged for that particular development. The appraisals do, however, incorporate Mayoral CIL as an input cost at £60 per square metre.
- 5.6 We have also tested the developments with CIL as an inputted amount (rather than an output) with the starting point being the adopted charging schedule rates after indexation. The purpose is to approach the potential CIL rates through the 'other end of the telescope', that is, to test the impact on the residual land value that each scheme generates with the existing CIL rates in place. This can assist the Council in forming a judgement as to the potential impact on changes to CIL rates on land values and, consequently, potential land supply for certain uses. The indexed and alternative rates are summarised in Table 5.6.1.

Table 5.6.1: Alternative CIL rates

Development type	Zone	Adopted rate	Indexed rate	Altern-ative rate 1	Altern-ative rate 2	Altern-ative rate 3
Residential	Zone A	£265	£350	£400	£450	£500
	Zone B	£150	£198	£250	£300	£350
	Zone C	£50	£66	£100	£150	£200
Offices	Zone A	£125	£165	£175	£200	£225
Large retail	Whole borough	£115	£152	£175	£200	£225
Hotel	Zone A	£100	£132	£150	£175	£200
Student Housing	Whole Borough	£215	£284	£300	£350	£400
All other uses	Whole Borough	Nil	Nil	-	-	-

- 5.7 Finally, all the scenarios are tested with the growth and inflation rates summarised in Table 4.3.1.

¹⁹ This approach involves calculating a payment that is the financial equivalent on on-site affordable housing delivery.

6 Assessment of appraisal results

Local Plan policies

- 6.1 This section sets out the results of our appraisals with the residual land values calculated for scenarios with sales values and capital values reflective of market conditions across the Borough. We have firstly tested the impact of emerging plan policies to assist the Council in its decision making on potential options.

Affordable workspace

- 6.2 The Council is considering an affordable workspace policy which will require a percentage of B1 floorspace to be let at a discount to market rent for a period of time from first letting. We have tested the following discounts
- 10% of floorspace let at a 20% discount to market rents for a 15-year period;
 - 10% of floorspace let at a 50% discount to market rents for a 15-year period;
 - 10% of floorspace let at a 50% discount to market rents for a 125-year period.
- 6.3 The results of our appraisals of schemes 19, 20 and 21 (small, medium and large scale office developments) with varying discounts to market rents are summarised in Table 6.3.1.

Table 6.3.1: Impact of affordable workspace requirement on office development

CIL Zone	No discount	10% of FS, 20% discount, 15 year period	10% of FS, 50% discount, 15 year period	10% of FS, 50% discount, 125 year period
Zone A				
Off1 - small scale office scheme	37,297,704	36,570,566 -1.95%	35,479,860 -4.87%	34,033,189 -8.75%
Off2 - med scale office scheme	128,356,074	125,698,926 -2.07%	121,713,203 -5.18%	116,426,697 -9.29%
Off3 - large scale office scheme	302,324,679	295,889,398 -2.13%	286,236,476 -5.32%	273,433,220 -9.56%
Zone B				
Off1 - small scale office scheme	10,881,301	10,472,304 -3.76%	9,858,810 -9.40%	9,083,318 -16.52%
Off2 - med scale office scheme	32,652,122	31,157,543 -4.58%	28,915,675 -11.44%	26,081,830 -20.12%
Off3 - large scale office scheme	71,438,369	67,818,686 -5.07%	62,389,160 -12.67%	55,525,944 -22.27%
Zone C				
Off1 - small scale office scheme	4,230,860	3,883,984 -8.20%	3,363,670 -20.50%	2,765,398 -34.64%
Off2 - med scale office scheme	8,349,705	7,082,132 -15.18%	5,180,773 -37.95%	2,994,534 -64.14%
Off3-large scale office scheme	12,580,952	9,511,050 -24.40%	4,906,195 -61.00%	-394,102 -103.13%

- 6.4 In Zone A, which is the prime office location in the borough, the impact of the requirement on the residual land values of each development is relatively modest at 1.95% to 9.56%. The impact is higher in Zone B, with a reduction of between 3.76% to 22.27% of the residual land value, depending on the extent and length of the discount. In Zone C, where the development of offices is already only marginally viable, the discount results in very significant changes to residual land values, ranging from 8.20% to 103.13%.

- 6.5 The results of the appraisals indicate that a discount of 20% to market rent for a 15 year period has the lowest impact on viability, but it may be possible to increase the discount to 50% in the highest value parts of the borough. We would suggest that no discount should be imposed on any office development in the south.
- 6.6 Clearly, in the south of the borough, office rents are significantly lower than rents in Waterloo and Vauxhall. Market rents in the south are therefore already more accessible to a range of businesses that might otherwise have benefited from a discount.
- 6.7 As an alternative to affordable workspace, the Council may also wish to consider requiring a proportion of office floorspace to be provided as 'collaborative' or 'shared' workspace which is a model that developers are increasingly bringing forward. This provides flexible workspace at lower rents than traditional office floorspace. However, the rents for this type of space are not protected by a planning obligation and can increase over time.

Student housing

- 6.8 London Plan policy H17A4 requires that 35% of units should be provided at affordable rent levels. For the purposes of the policy, 'affordable' is defined as 55% of the maximum loan income that a new full-time student studying in London and living away from home could receive from the government's maintenance loan. This currently equates to a rent of £155 per week.
- 6.9 With no affordable housing requirement, the two student housing schemes we have tested generate residual land values of £13.53 million (scheme 16) and £27.08 million (scheme 17). These residual land values value to £7.51 million and £10.05 million respectively as a result of incorporating 35% of rooms at affordable rents. The residual land values for both schemes are higher than benchmark land values and can therefore be considered viable.
- 6.10 With regards to the Council's potential policy seeking additional contributions for affordable housing, these will need to be taken from the surplus residual land value above benchmark land values. Our testing for CIL purposes in the next section identifies the total surpluses that arise and these will need to be divided between potential revised CIL rates and other requirements. CIL rates on student housing and financial contributions towards general needs affordable housing are not mutually exclusive; contributions towards affordable housing may therefore impact on potential CIL rates.

Affordable housing

- 6.11 As noted in Section 4.9, we have tested a series of tenure scenarios, which are summarised in Table 6.11.1 below. Each scenario, we have tested an overall tenure split of 70% rented/30% intermediate (Table 6.11.2) and 60% rented/40% intermediate (Table 6.11.3). The appraisals assume an affordable housing unit mix of 25% one beds, 55% two beds, 20% three beds and 10% three beds.

Table 6.11.1: Tenure scenarios

Scenario	Rent-Tenancy strategy	Rent – London Affordable Rent	Intermediate – London Living Rent	Intermediate - Shd Ownership or intermediate rent at £60k HHold income	Intermediate – Shared ownership or intermediate rent at £90k HHold income

- 6.12 In higher values areas (Waterloo and Vauxhall, or CIL Zone A) changing tenure mix from 70%/30% to 60%/40% has only a modest upwards impact on the residual land value, typically 2% or less. However, in lower value areas in the borough, a change in tenure mix from 70%/30% to 60%/40% could have a much more significant impact on residual land values, ranging from 4% to 79% (with an average across all the residential schemes of 12%). Given the significant scale of movement in residual land values, small tenure changes could be used to improve viability where schemes are unable to meet the Mayor's 35% affordable housing threshold.
- 6.13 Similarly, our testing of the Council's various affordable housing scenarios for rented and intermediate housing identifies the improvement in residual land values against a 'base' position of the rented housing provided as London Affordable Rent and the intermediate housing provided as shared ownership (household incomes of up to £90,000 per annum). In terms of capital value, London Affordable Rent is the least valuable tenure for rented housing and shared ownership (with a £90,000 household income cap) generates the highest capital values for intermediate housing.
- 6.14 With rented housing accounting for 70% of the affordable units, changes to rent levels for these units has the most dominant effect on residual land values. In the higher value areas in the north of the borough, the increases in residual land values arising from tenures changes is relatively modest, typically no more than 5%. Market values of residential units are very high in these areas and consequently, a larger proportion of the GDV of a scheme is made up of private housing in comparison to schemes in the south of the borough. Tenure changes to the affordable housing (including rent levels) therefore have little overall impact on the residual land values generated by developments in the north.
- 6.15 In the lower values parts of the borough, the changes to rent levels and affordability in the Council's scenarios have a much more significant impact on the residual land values generated by our appraisals. In comparison to the base position (the lowest value tenure for the rented element and the highest value tenure for the intermediate tenure), residual land values increase by 11% on average, with a range of 0.1% to 87%.
- 6.16 We understand that the Council is concerned about the affordability of shared ownership, particularly in the north of the borough. To date, applicants have been permitted to provide shared ownership at the £90,000 household income cap in the London Plan Annual Monitoring Report ('AMR'). This income threshold has always been intended as a cap and it is possible for the Council to apply either bandings on incomes or a lower overall cap (e.g. at £60,000 household income). The rent on retained equity would then need to be adjusted downwards to ensure that the overall housing costs are affordable to a household in receipt of a combined income at the lower £60,000 threshold.
- 6.17 The results of our appraisals indicate that the Council could secure improvements in viability (if necessary) by adopting alternative scenarios for the rented element, while at the same time adopting intermediate tenure structures which are more affordable to households on significantly lower incomes than those in the London Plan AMR.

Build for rent schemes

- 6.18 The Council has provided a range of scenarios for affordable housing to be provided on build for rent schemes, as summarised in Table 6.18.1.

Table 6.18.1: Affordable housing scenarios for build for rent schemes

Scenario	Local Housing Allowance	London Affordable Rent	London Living Rents
C1			100%
C2	57%	43%	
C3	70%		30%
C4		70%	30%

- 6.19 As noted earlier, build for rent is an immature sector of the market with little information on viability metrics. As a consequence, there is little agreement on appropriate inputs for viability assessments, arising from uncertainty on operating costs and forward funding arrangements. However, it is generally accepted that build for rent units trade at a 20% discount to market value, but profits are lower than developments built for sale due to lower risk associated with a pre-sale to the operator or investor. Profit as a percentage of GDV is typically 5% lower for build for rent in comparison to build for sale. The combined impact is therefore a 15% reduction in value in comparison to housing built for sale.
- 6.20 We have tested schemes 5, 6 and 7 as build for sale, which are all flatted schemes ranging from low to high density providing 150, 225 and 300 units respectively. The residual land values are converted to values per hectare and then compared to the benchmark land values in paragraph 4.40.

Table 6.20.1: Build for rent scheme results (all residual values expressed per hectare)

- 6.21 Clearly there are significant differences in outcomes between the three benchmark land values which the residual values are tested against. Similar patterns would typically occur for private housing for sale. There are many circumstances where 35% affordable housing is viable, depending on the tenure scenario applied. The results indicate that some build to rent schemes will need to opt to use the viability route in the Mayor's SPG and will not be able to utilise the 35% threshold route.
- 6.22 The varying tenure scenarios do not generate a significant difference in residual land values, with the exception of scenario 4, which generates a significantly higher residual in comparison to scenarios 1, 2 and 3. If viability issues emerge on individual developments, applying scenario 4 could assist in addressing these issues.
- 6.23 The Council has requested that we comment on the potential impact of extending the 15 year build to rent 'covenant' period (during which affordable units can only be released to residential for sale upon the payment of a penalty based on the uplift in land value arising from such conversion). The Mayor of London's SPG on viability indicates that build for rent schemes should provide affordable housing for a minimum of 15 years. If units are sold earlier then the owner will be liable to pay a penalty equivalent to the difference between the unrestricted market value of the sold unit and the value of the unit as rented housing.
- 6.24 If the covenant period were moved out to 25 years, it would simply defer the time when any uplift in value can be realised. The value of the development as a rented housing scheme would be unchanged as a result of any extension to the covenant period, as valuation approaches would simply reflect the value of the ongoing rental income stream. The main effect of any extension would be on potential investor appetite for purchasing build to rent units due to the deferred 'exit' from the investment, which may have a modest impact on investment yields (and consequently on capital value).

Co-living schemes

- 6.25 As noted in Section 2 London Plan policy H18B requires co-living or similar forms of shared housing to provide 35% affordable housing with rent levels at 50% of market rent. Our appraisals indicate that this requirement should generally be viable (see Table 6.25.1), generating residual land values that exceed existing use values in most cases. Schemes will not be viable outside the highest value parts of the borough when built on sites with the highest existing use values. In these cases, applicants will need to submit viability evidence under the sub-35% route in the Mayor's SPG.

Other draft Local Plan and draft London Plan policies

6.26 As noted in Section 2, our appraisals reflect the requirements of the following policies:

- Draft London Plan space standards set out in Policy D4 and the child play-space requirement in Local Plan policy H5.
- Accessibility standards set out in Policy D5 of the draft London Plan.
- Local Plan policy ED14 and the Employment & Skills SPD 2018 which requires financial contributions towards training and apprenticeships.
- Low carbon requirements in draft London Plan policy S12C.
- Limitations on car parking provision in London Plan policy T6.1 and cycle storage provisions in draft London Plan policy D4.

6.27 Specific cost allowances are incorporated into the appraisals for accessibility standards; employment and skills; and low carbon requirements, as set out in Section 4. The floor areas and bulk of development in our appraisals have been set at levels which are capable of accommodating the requirements of draft London Plan policies D4 and T6.1. We have not tested these policies individually as their impact is de-minimis but they are reflected in the analyses of the policies which have a greater individual impact in the preceding sections. These policies are also reflected in the analysis of alternative CIL rates in the following section.

Alternative CIL rates

6.28 This section sets out the results of our appraisals with the residual land values calculated for scenarios with sales values and capital values reflective of market conditions across the Borough. The Residual Land Values are assessed in two ways. Firstly, the surplus residual above the benchmark land value is calculated and converted into a rate per square metre, which is a proxy for potential CIL rates. This results in a significant number of results, depending on other factors tested, most notably the level of affordable housing.

6.29 Development value is finite and – in densely developed Boroughs such as Lambeth – is rarely enhanced through the adoption of new policy requirements. This is because existing use values are sometimes relatively high prior to development. In contrast, areas which have previously undeveloped land clearly have greater scope to secure an uplift in land value through the planning process.

6.30 In assessing the results, it is important to clearly distinguish between two scenarios; namely, schemes that are unviable *regardless of the Council's policy requirements, including the level of CIL* (including a

nil rate) and schemes that are viable *prior* to the imposition of policy requirements. If a scheme is unviable before policy requirements and CIL are levied, it is unlikely to come forward and policy requirements and CIL would not be a factor that comes into play in the developer's/landowner's decision making. The unviable schemes will only become viable following an increase in values and sites would remain in their existing use.

- 6.31 The CIL regulations state that in setting a charge, local authorities must “strike an appropriate balance” between revenue maximisation on the one hand and the potentially adverse impact of CIL upon the viability of development across the whole area on the other. When considering this balance, the following factors are important:
- Firstly, councils should take a strategic view of viability. There will always be variations in viability between individual sites, but viability testing should establish the most typical viability position; not the exceptional situations.
 - Secondly, councils should take a balanced view of viability – residual valuations are just one factor influencing a developer's decision making – the same applies to local authorities.
 - Thirdly, while a single charge is attractive, it may not be appropriate for all authorities, particularly in areas where sales values vary between areas.
 - Fourthly, markets are cyclical and subject to change over short periods of time. Sensitivity testing to sensitivity test levels of CIL to ensure they are robust in the event that market conditions improve over the life of a Charging Schedule is essential.
 - Fifthly, local authorities should not set their rates of CIL at the limits of viability. They should leave a margin or contingency to allow for change and site specific viability issues.
- 6.32 There is clearly a balance that has to be struck between the aims of Policy H2 on the delivery of affordable housing (which reflects the Mayor of London's threshold approach to affordable housing, which in effect adopts a 35% minimum provision to avoid the need for a site-specific viability assessment, which mirrors the previous policy position of ‘maximum reasonable’ percentage subject to individual scheme viability) and securing adequate contributions towards infrastructure from the developments that contribute towards the need for new infrastructure. The CIL rate cannot therefore be set on the basis that every single development typology right across the borough will deliver 35%, as this is not always viable. The latest London Plan Annual Monitoring Report for the financial year 2016/17 (published July 2017) indicates that over the three years 2013/14 to 2015/16, 21% of units were affordable. This includes units delivered on schemes that fall below the 10 unit threshold, so the actual percentage of affordable housing will be slightly higher.
- 6.33 We have therefore focused on the results of testing where we have included 35% affordable housing, as the Council will need to secure adequate amounts of funding to support new development. Affordable housing cannot be maximised to the total exclusion of securing infrastructure funding and vice versa.
- 6.34 The appraisals generate a very wide spread of potential CIL rates, depending on the benchmark land value, residential sales values and the mix of uses within each development typology. The results are summarised in tables 6.34.1 to 6.34.12. As one would expect, the capacity for schemes to absorb CIL is greater where the benchmark land value is lowest. Furthermore, it is very clear that the capacity to absorb CIL contributions declines as the percentage of affordable housing increases.
- 6.35 The second approach to testing potential revised CIL rates is to consider viability from the other perspective; rather than the potential CIL rates being determined by the ‘surplus’ residual land value over the benchmark land value, the second approach inputs CIL as a cost to determine the scale of impact on the residual land value. This approach helps form a judgement on the impact of CIL on land values, which – if sufficiently modest – is unlikely to prevent a scheme from coming forward.
- 6.36 The results of this analysis indicate that increases from the adopted CIL rates would not have a significant impact on the residual land values generated. This is illustrated in the graphs at Figure 6.36.1, which set the various residual land values from the four CIL scenarios alongside each other for each development typology. The charts show very modest movements in residual land values in

almost all cases, indicating that increases to the Council's currently adopted CIL rates would not prevent development coming forward.

- 6.37 At any of the alternative CIL rates the burden on development would remain at an acceptably low level in most cases. The change in residual land value resulting from increases in CIL rates would generally be less than 5% in Zone A and less than 10% in zones B and C. This indicates that developments could absorb the higher rates without any adverse significant impact upon land supply.

ZONE A

ZONE A (CONTINUED)

ZONE B

ZONE B (CONTINUED)

ZONE C

ZONE C (CONTINUED)

CIL Charging zones

- 6.38 As noted earlier in this report, sales values in the centre and the south of the borough have increased significantly since evidence underpinning the Council's first CIL Charging Schedule was prepared²⁰. As a consequence of this increase, developments in the centre and south in particular have increased capacity to make a higher contribution towards community infrastructure than was previously the case. The existing charging zones reflect the differences in sales values between sub-markets, although values in Brixton and Herne Hill are higher than other areas in the south of the borough. The Council could retain the existing three zones, or adopt a fourth zone which could carve out Brixton and Herne Hill from Zone C to form a new zone.

Residential rates

- 6.39 The results of our appraisals which test CIL as an output show maximum CIL rates for residential schemes in the lowest value part of Zone C show capacity ranging from £260 to £1,133 per square metre. In this zone, increasing CIL to the highest alternative rate tested (i.e. £200 per square metre), would not adversely impact on land supply in this area.
- 6.40 The appraisals show similar results for Zones A and B, where the adopted CIL rates are higher than those in Zone C at £265 and £150 per square metre respectively (or £350 and £198 per square metre after indexation). Our appraisals indicate that increasing the rates for Zones A and B to £450/£500 and £350 respectively would have a relatively modest impact on residual land values and should not therefore have any significant impact on residential land supply in these areas.
- 6.41 We attach as Appendix 3 the results of our sensitivity analysis which builds in the growth rates on sales values and inflation on costs identified in Table 4.3.1. In this analysis, we have also increased the benchmark land values by 20% to reflect the possibility that existing use values may also increase over time. The results indicate that schemes will become more viable and the 'buffer' or 'margin' between the theoretical maximum CIL rates and the proposed rates will widen. This will increase the capacity of schemes to provide higher levels of affordable housing (towards or at the strategic target level of 50%) or generate higher returns to landowners. As noted previously, these results should be treated with a degree of caution as forecasts are based on assumptions on a range of factors that may change.
- 6.42 A key consideration for the Council is the interaction between CIL contributions and affordable housing, noting of course our earlier comments that securing both CIL and affordable housing are essential objectives. Like other planning authorities, the Council cannot seek to secure affordable housing to the total exclusion of financial contributions towards essential community infrastructure, and vice-versa. Increased rates should, in most circumstances, be passed on to the landowner through modest reductions in residual land values, but where this cannot happen (due to a high existing use value, for example), there may be a reduction in affordable housing in comparison to a 'no CIL' scenario.
- 6.43 There is no demonstrable difference in the viability of co-living schemes that would give cause to adopting a different CIL rate from other residential developments.

Housing for older people

- 6.44 Housing for older people (extra care, sheltered housing and care homes) are generally not viable when tested against the higher value benchmarks (1, 2 and 3) with significantly improved viability when tested against benchmark 4. These results indicate that these types of development are unlikely to come forward on sites in higher value existing use.
- 6.45 Where these types of development are viable, they have less capacity than general purpose

²⁰ The Council has also requested that we comment on the approach to CIL zones adopted in the London Plan viability study. Clearly this study is far too high level for the purposes of setting borough CIL rates, given that it divides the whole capital into just five CIL charging zones based on very broad ranges of sales values. This is of insufficient granularity for setting charging zones in a borough and was never the intended purpose of the GLA report. The CIL rates and zones were merely applied as a proxy for actual borough CIL rates for the purposes of testing draft London Plan policies, not for establishing CIL rates or CIL charging zones.

residential schemes to contribute towards infrastructure. They are also fewer in number than general purpose residential schemes and will therefore make a significantly smaller contribution to housing numbers. We therefore recommend that a CIL rate of circa 50% of the residential rates be adopted for housing for older people.

Student housing

- 6.46 The current CIL rate for student housing is £215 per square metre, or £284 per square metre after indexation. Our appraisals indicate that there is scope for this rate to be increased after allowing for on-site affordable student accommodation using the benchmark rent set by the GLA (£155 per week for a 38 week tenancy). Our appraisals indicate that a CIL of £400 could be applied without adversely impacting on viability of such developments.

Offices – Zone A

- 6.47 Office rents in zones have increased significantly since the Council's Charging Schedule was adopted. There have also been increases in both rents and proposals for new office space in Zone B. While rents have increased in Zone C, the extent of increase is lower and there are fewer proposals for new office space in these areas. Our appraisals test a revised CIL rate of £225 per square metre which could be absorbed by office developments in zones A and B.

Hotels

- 6.48 The adopted Charging Schedule applies a rate of £100 per square metre (£132 per square metre after indexation) to developments of new hotels in Zone A, with a nil rate elsewhere. We have tested an increased CIL rate of £200 per square metre across the Borough and this does not have a significant impact on the residual land values generated.

Retail

- 6.49 Small retail development tends to involve the replacement of existing space and does not normally generate a CIL liability. In the adopted charging schedule, the Council applies a nil rate to such development. Although our appraisals show some capacity, this is generally quite limited and would, in any event, not yield significant impact due to the low quantum of net additional floorspace involved.
- 6.50 The adopted Charging Schedule applies a CIL rate of £115 per square metre, or £152 per square metre after indexation. We have tested an increase to £225 per square metre and this has limited impact on the residual land values generated by such developments.

Industrial and warehousing

- 6.51 Our appraisals indicate that development of new industrial or warehousing space are unlikely to generate residual land values that exceed benchmark land values. Consequently, it is unlikely that many developments will come forward unless there are particular operational reasons from major operators for logistics purposes. We therefore recommend that the current nil rate for these uses be continued.

Potential income

- 6.52 We have run an illustrative high-level calculation of the potential increase in CIL income that the proposed rates could generate. This is based on very high level assumptions on an assumed quantum of residential units and quantum of commercial floorspace, so serves as an illustration of the potential change from the adopted rates (indexed to today's values) compared to the suggested rates. It is **not** based on an anticipated trajectory of anticipated residential or commercial development. We have assumed that there will be a 30% offset of existing floorspace. Social housing relief is applied to 35% of residential floorspace.
- 6.53 The results of this high level calculation are summarised in Table 6.53.1 (showing the income derived from the current rates with indexation) and Table 6.53.2 (proposed rates). Based on the quantum of floorspace in the calculations, the adopted rates would generate total income of £67.46 million. The

suggested increased rates would in contrast generate total income of £114.96 million. There would be a modest increase arising from a potentially higher CIL rate in Brixton and Herne Hill, although clearly the exercise below is undertaken at high level.

7 Conclusions and recommendations

- 7.1 The NPPF states that “Plans should set out the contributions expected in association with particular sites and types of development. This should include setting out the levels and types of affordable housing provision required, along with other infrastructure (such as that needed for education, health, transport, green and digital infrastructure). Such policies should not undermine the delivery of the plan”. This report and its supporting appendices test the ability of development typologies in Lambeth to support local plan policies while making contributions to infrastructure that will support growth through CIL.

Viability of Local Plan and London Plan policies

- 7.2 We have tested the impact of the main policies which may have an impact on viability:
- **Affordable housing:** We have appraised residential schemes with 35% and 50% affordable housing in line with revised Policy H2 which seeks to maximise delivery of affordable housing in accordance with London Plan policy H6. We have tested the schemes with a range of tenure scenarios and there is a clear tension between the overall level of affordable housing and the affordability of the units provided.
 - **Build for rent schemes:** we have tested the London Plan requirement in H13C for build to rent schemes to provide 35% affordable housing with a range of discounts below market rent. In general, the appraisals indicate that the viability of build to rent schemes is challenging on sites with high existing use values, regardless of the rent levels applied to the affordable housing element. The best viability outcomes are achieved when the Council’s scenario C4 is applied to the affordable element, which comprises 70% of units at London Affordable Rent and 30% of units at intermediate rent aimed at households in receipt of incomes of £60,000 per annum.
 - **Student housing:** we have tested the viability of purpose build student housing incorporating London Plan policy H17A4 which requires 35% of units to be provided at affordable rent levels (defined as no more than 55% of the maximum maintenance loan of a student studying in London). Although this requirement reduces residual land values of the schemes tested, they remain above relevant benchmark land values used in the study and will not prevent schemes from coming forward.
 - With regards to the Council’s potential requirement for additional contributions from student housing schemes to fund affordable housing on other sites, there is a direct trade-off between this requirement and potential rates of CIL that the Council could levy. Our assessment identifies maximum levels of CIL generated by student housing schemes and the Council could identify potential payments once it has fixed its position on CIL. It is vital however that the cumulative requirement leaves a sufficient buffer and is not set at the margins of viability.
 - **Affordable workspace:** we have tested emerging requirements on schemes which provide new or replacement B1 floorspace at 10% of floorspace with the following discounts: 20% discount for 15 years; 50% discount for 15 years; and 50% discount for 125 years. In CIL Zone A in the north of the borough, the impact on residual land values of a 20% or 50% discount is relatively modest at less than 5.5%. However, if the period of discount is extended to 125 years, the impact on residual land values is more significant at almost 10%. Additional testing has been undertaken on the provision of affordable workspace within the Brixton Creative Enterprise Zone in a separate report.
 - In other parts of the borough (where offices are less likely to come forward), the impact of the requirement is more significant at up to 22.5% in CIL Zone B and as much as 103% in CIL Zone C. This is because the residual land values generated by office development in these areas are far lower than those in the north. However, office development is unlikely to come forward in the lower value areas and rent levels are significantly lower than those in the north. Existing and any new office space that is developed in the lower values areas will be accessible to a much wider range of businesses and discounts to market rents may not be necessary.

- **Employment & Skills:** The Council's requirement for financial contributions towards training and apprenticeships has a relatively modest impact on residual land values and also the capacity for schemes to provide CIL. The trade-off between the employment and skills requirement and CIL is typically circa £50 per square metre on employment sites.

Potential revisions to CIL rates

- 7.3 The Council's adopted CIL rates have been in place since 1 October 2014 and there has been no demonstrable adverse impact on the supply of housing land or upon the viability of developments coming forward across the Borough. Since the evidence base for the adopted CIL was prepared, there have been changes to sales values and build costs. Our testing of alternative CIL rates indicates that relatively significant changes could be accommodated without adversely impacting on viability to a sufficient degree to impact on land supply.
- 7.4 As a result of indexation, the CIL rates are now circa 32% higher than they were adopted. The proposed Mayoral CIL will also increase from £35 per square metre to £60 per square metre and in the parts of the borough within the Central Activities Zone, £185 per square metre on offices, £165 per square metre on retail and £140 per square metre on hotels. The revised rates will apply from April 2019 if the rates are not amended through the Examination process. Our appraisals reflect this higher Mayoral CIL rate. Clearly higher Mayoral CIL rates in the north of the borough will restrict the Council's ability of fund essential local infrastructure, in an environment in which there are already severe constraints on public sector funding.
- 7.5 The proposed CIL rates for the borough are summarised in Table 7.5.1. Our appraisals indicate that the capacity of developments to absorb CIL rates has increased since the first Charging Schedule was adopted, particularly in the south of the Borough where the prevailing rate is very low.

Table 7.5.1: Proposed changes to CIL rates

Development type	Zone	Adopted	Indexed	Suggested
Residential including Co-Living schemes	Zone A	£265	£350	£500
	Zone B	£150	£198	£350
	Potential new zone (Brixton and Herne Hill)	-	-	£250
	Zone C	£50	£66	£200
Residential – self-contained sheltered housing, self-contained extra care schemes and care homes	Zone A	-	-	£250
	Zone B	-	-	£175
	Zone C	-	-	£100
Offices	Zone A	£125	£165	£225
Large retail	Whole borough	£115	£152	£225
Hotel	Whole borough	£100	£132	£200
Student Housing	Whole Borough	£215	£284	£400
All other uses	Whole Borough	Nil	Nil	Nil

- 7.6 Our testing indicates that the increase in CIL rates will have a relatively modest impact on residual land values in most cases. Where it is not possible to pass the cost of increased CIL rates back to the landowner through a reduction in land value (for example, due to high existing use values), the increase will have a modest impact on affordable housing levels that can be delivered. However, increases in sales values since the last Charging Schedule was formulated have outstripped increases in costs, which has resulted in improvements in viability and enhanced capacity for absorbing CIL requirements. The sensitivity analysis at Appendix 3 indicates that if forecast growth and cost inflation reflect outturn values, there will be a further enhancement in viability and an increased margin between the proposed rates and the theoretical maximum rates.

- 7.7 There is clearly a need to balance the need to deliver affordable housing with the need to secure contributions to fund community infrastructure that will support development and growth. The Council cannot seek to prioritise securing affordable housing to the exclusion of securing funding for infrastructure and vice versa. In our view, the proposed rates strike this balance appropriately. If CIL levels are set at levels that make the delivery of 35% affordable unviable, a greater proportion of applicants will opt to submit viability appraisals with their applications than would otherwise have been the case.
- 7.8 The potential changes to Mayoral CIL rates (as set out in the MCIL2 Draft Charging Schedule) have been reflected in our appraisals. The increase in Mayoral CIL will reduce the capacity of schemes in the borough to contribute towards essential supporting infrastructure at a local level. If the Mayoral CIL rates are reduced by the Examiner, this would improve the capacity of developments in Lambeth to contribute towards local community infrastructure.
- 7.9 In setting CIL rates and Local Plan policies, the Council needs to strike a balance between achieving its aim of meeting needs for affordable housing with raising funds for infrastructure, and ensuring that developments generate acceptable returns to willing landowners and willing developers. This study demonstrates that the Council's flexible approach to applying its affordable housing requirements through the Mayor's threshold approach ensures that these objectives are balanced appropriately.

Additional observations

- 7.10 Viability measured in present value terms is only one of several factors that determine whether a site is developed. Developers need to maintain a throughput of sites to ensure their staff are utilised and they can continue to generate returns for their shareholders. Consequently, small adjustments to residual land values resulting from changes to CIL rates can be absorbed in almost all circumstances by developers taking a commercial view on the impact. However, in most cases the impact on land value is sufficiently modest that this can be passed onto the land owner at the bid stage without adversely impacting on the supply of land for development.
- 7.11 In most cases, the changes in residual land values required to accommodate the increased CIL rates is very modest and the CIL itself accounts for a very small proportion of overall development costs (typically well below 5%). The imposition of CIL is therefore not the critical factor in determining whether or not a scheme will come forward.
- 7.12 In considering the outputs of the appraisals, it is important to recognise that some developments will be unviable regardless of the Council's requirements. In these cases, the value of the existing building will be higher than a redevelopment opportunity over the medium term. However, this situation should not be taken as an indication of the viability (or otherwise) of the Council's policies and requirements.
- 7.13 It is critical that developers do not over-pay for sites such that the value generated by developments is paid to the landowner, rather than being used to provide affordable housing. The Council should work closely with developers to ensure that landowners' expectations of land value are appropriately framed by the local policy context and adjusted for the proposed CIL rates. There may be instances when viability issues emerge on individual developments, even when the land has been purchased at an appropriate price (e.g. due to extensive decontamination requirements). In these cases, some flexibility may be required subject to submission of a robust site-specific viability assessment. This flexibility is allowed for by the adoption of the Mayor of London's 'threshold' approach to affordable housing.
- 7.14 This study demonstrates that the proposed increase to the CIL charges and the Council's flexible approach to applying its affordable housing requirements through the Mayor's threshold approach will ensure an appropriate balance between delivering affordable housing, sustainability objectives, necessary infrastructure and the need for landowners and developers to achieve a reasonable return.

Appendix 1 - Policy review

Policy	Policy wording	Cost implications
D3	<p>Local plan policy Infrastructure</p> <p>In order to support growth in the borough, the council will safeguard and improve essential social, physical and green infrastructure and work in partnership with service providers to ensure the delivery of the additional infrastructure. The potential and predicted infrastructure requirements over the life time of the Local Plan are identified in the infrastructure delivery plan.</p> <p>The council will encourage dialogue between service providers and developers. Where appropriate opportunities arise, the co-location of services and joint delivery of infrastructure by service providers will be supported.</p> <p>Generally, the use of site specific planning obligations and the Community Infrastructure Levy will be applied, alongside other investment, to help deliver infrastructure.</p> <p>The council, where required and necessary, will co-produce co-operative local investment plans that identify, prioritise and cost projects to be delivered locally via agencies working in cooperation with the Council or by the Council itself. Projects will be brought forward as appropriate and relevant in mitigating the direct impact of development through section 106 planning obligations, and/or they may be funded by a meaningful proportion of CIL receipts generated by development in the neighbourhood.</p>	<p>Cost implications</p> <p>Requires pooling of contributions – collected through CIL</p> <p>No cost implications for development</p> <p>Planning obligations will fund only site specific infrastructure that is not collected through CIL and for any on-site mitigation.</p> <p>CIL to be applied at relevant rates.</p>
D4	<p>Planning obligations Section 106 planning obligations will be sought to:</p> <p>Secure affordable housing (see Policy H3).</p> <p>Ensure that development proposals provide or fund local improvements to mitigate the impact of the development and/or additional facilities and requirements made necessary by the development. This may include:</p> <ul style="list-style-type: none"> (i) on-site provision of infrastructure, whether transport, education, health, libraries, sport and leisure, emergency services and cultural and community provision; (i) local public realm improvements including streetscape, local public open space, play facilities and community safety; (ii) mitigation of impacts on and/or enhancement of heritage assets; (iii) highways and traffic works; (iv) public transport improvements; (v) local walking and cycling improvements; (vi) car clubs, parking restrictions, and travel plans; (vii) hotel and visitor management measures; (viii) access to employment opportunities created by the development by securing employment premises and learning and skills initiatives; (ix) access for local businesses to supply chain opportunities created by the development; (x) small and flexible office space; (xi) affordable workspace; (xii) affordable retail units; (xiii) maintenance and management arrangements; (xiv) town centre management; (xv) public access to on-site facilities; (xvi) low carbon and renewable energy; (xvii) sustainable drainage systems; (xviii) connection to, and support of, quality broadband and other telecommunication and information technology support networks; (xix) green infrastructure; (xx) local food production and growing; and (xxi) other sustainability measures, including mitigation of impacts on and/or enhancement of biodiversity and wildlife habitats. <p>Secure appropriate scheme implementation and control phasing where necessary.</p>	<p>Affordable housing included within developments where relevant</p> <p>£1,900 per unit incorporated for residual Section 106 obligations plus £1,000 per unit for Section 2718 works.</p> <p>All other requirements reflected where relevant.</p>

Policy	Policy wording	Cost implications
H2	<p>Delivering Affordable Housing</p> <p>The Council will seek to maximise delivery of affordable housing in accordance with the London Plan.</p> <p>Residential and mixed-use developments should provide affordable housing through the threshold approach set out in London Plan Policy H6.</p> <p>Review mechanisms will be required in accordance with the approach set out in the London Plan and associated Supplementary Planning Guidance.</p> <p>70 per cent of new affordable housing units should be low cost rented homes according to need in line with the council's allocation scheme and for Londoners on low incomes (Social Rent/London Affordable Rent). 30 per cent should be intermediate products, including London Living rent and London Shared Ownership, in accordance with the principles set out in the council's Tenancy Strategy.</p> <p>Affordable housing should be provided on-site. Where it is demonstrated to the satisfaction of the council that this is not feasible, or that it would be more effective in meeting needs for affordable housing, off-site affordable accommodation provided by the developer may be accepted. Exceptionally, a payment in lieu may be accepted.</p> <p>In considering the nature of the affordable housing being sought, the Council will take into account:</p> <ul style="list-style-type: none"> the specific circumstances of individual sites; the characteristics of the area, the site and type of development proposed, and the size and type of affordable housing needed in particular locations; and the impact on mixed and balanced communities within a local neighbourhood. <p>Affordable housing should comply with the preferred dwelling size mix set out in Local Plan policy H4 and should meet the full range of housing needs, particularly those of low income and workless households within the borough requiring family-sized accommodation.</p> <p>The affordable housing should be equivalent in siting, appearance and layout to the rest of the development. Proposals will be required to demonstrate that the integration of different tenures has been considered from the outset of the design process.</p>	<p>Affordable housing included in developments where applicable (i.e. above relevant thresholds)</p> <p>No additional cost burden until scheme generates super profit.</p> <p>Tested in appraisals.</p> <p>No cost implication beyond on-site requirement.</p> <p>No cost implication beyond on-site requirement.</p> <p>No cost implications.</p> <p>Uniform build cost applied to all tenures to facilitate tenure blind development.</p>
H4	<p>Housing size mix in new developments</p> <p>The council will support proposals which offer a range of dwelling sizes and types to meet current and future housing needs. All residential developments, including conversions, are expected to provide a mix of dwelling sizes as set out below:</p> <p>The low cost rented element of residential developments should reflect the preferred borough-wide housing mix set out below:</p> <ul style="list-style-type: none"> 1-bed units Not more than 25% 2-bed units 25-60% 3-bed units At least 35% <p>For market and intermediate housing, a balanced mix of unit sizes including family sized accommodation should normally be provided.</p> <p>The size of accommodation provided through housing for specific community needs will be dependent on and the needs of the intended occupiers of the specialist housing.</p>	<p>Unit mix reflected in appraisals.</p>

Policy	Policy wording	Cost implications
H5	<p>Housing Standards</p> <p>Proposals for new residential development, including new-build dwellings, conversions and change of use schemes where new dwellings are created, should accord with the principles of good design and will be expected to:</p> <ul style="list-style-type: none"> (i) provide dual-aspect accommodation, unless exceptional circumstances are demonstrated; and (ii) meet the minimum private internal space standards set out in London Plan policy D4. <p>The council will require at least the following level of external amenity space in all residential units.</p> <ul style="list-style-type: none"> (i) For new houses, 30m² private amenity space per house should generally be provided. (ii) For new flatted developments amenity space should be provided to the following quantities: 10sqm per flat either as a balcony/terrace/private garden or consolidated with communal amenity space; and for development of 10 or more residential units a further 50sqm per scheme of communal amenity space. (iii) Houses, ground-floor flats, and family-sized units should preferably have direct access to a private garden. <p>Communal amenity space should:</p> <ul style="list-style-type: none"> (i) receive natural light; (ii) be screened from parking areas; (iii) be easily accessible to all occupants; (iv) be overlooked by habitable rooms to ensure safety and surveillance; (v) incorporate sustainable landscape principles and practices, including effective water management, efficient energy use, use of sustainable materials, and promotion of biodiversity and, where appropriate, food growing; and (vi) have a landscape, management and maintenance plan. <p>The council will follow the approach to play space set out in London Plan policy S4 Play and informal recreational and associated Supplementary Planning Guidance.</p>	No cost implications

Policy	Policy wording	Cost implications
H7	<p>Student Housing</p> <p>The council will seek to manage the development of sites for student housing to ensure the availability of land to meet priority housing and employment needs and the achievement of mixed and balanced communities. Proposals for student housing will be acceptable only where it can be demonstrated that the development:</p> <ul style="list-style-type: none"> (i) does not compromise capacity to meet the need for conventional dwellings, especially affordable family homes, nor displace other key uses such as employment development. Proposals should not result in the loss of employment land or floorspace, unless relevant policy tests (set out in section 6) are met, or the loss of existing self-contained dwellings or sites allocated or suitable for self- contained housing. (ii) forms part of a mixed use development. (iii) is supported by evidence of a linkage with one or more higher education institution (HEI) in Lambeth, or within a reasonable travelling distance of Lambeth, funded by the Higher Education Funding Council for England. This evidence must include confirmation that the proposed rental levels for the student accommodation are supported by the linked HEI(s) and that a nominations agreement is in place for the lifetime of the scheme. (iv) would not lead to an over-concentration of similar uses which may be detrimental to residential amenity or the balance and mix of uses in the area or place undue pressure on local infrastructure. (v) is located in an area with good public transport access, and access to local shops, workplaces, services and community facilities. (vi) provides a range of accommodation types, including cluster flats with shared kitchen and bathroom facilities unless justification is provided as to why this would not be appropriate. (vii) is well designed, providing appropriate space standards and facilities and is sustainable by virtue of being adaptable to alternative residential use. <p>Student housing will be secured by planning obligation relating to its occupation by members of specified educational institutions. Where the accommodation is not secured for students, the development will be considered large-scale purpose-built shared living and considered under London Plan policy H18 and Local Plan policy H13</p> <p>The requirements of London Plan policy H17A4 relating to provision of affordable student accommodation will apply.</p> <p>Leisure facilities within purpose-built student accommodation should be made available for public use in locations where there is an identified shortage of provision. This will be secured through planning obligations.</p> <p>Temporary use of purpose-built student accommodation during vacation periods for ancillary uses will normally be supported.</p> <p>The loss of existing student accommodation will be resisted unless or it is demonstrated that the facility no longer caters for current or future needs and the floorspace is replaced by another form of residential accommodation that meets other development plan requirements.</p>	<p>Land use issue – no cost implications for developments.</p> <p>No cost implication</p> <p>Tested in study.</p> <p>No cost implication – additional revenue from users.</p> <p>No cost implications for development.</p>

Policy	Policy wording	Cost implications
H11	<p>Estate regeneration</p> <p>Estate regeneration schemes must achieve at least 50 per cent affordable housing in the final scheme, based on habitable rooms. Applicants should demonstrate they have sought to maximise the proportion of affordable housing in the scheme and should where possible provide more than 50 per cent.</p> <p>Existing affordable housing floorspace on estate regeneration schemes should be replaced on an equivalent basis i.e. where social rented floorspace is lost, it should be replaced by general needs rented accommodation with rents at levels based on that which has been lost. The tenure of additional affordable housing (other than the replacement provision) should include an appropriate mix of low cost rented and intermediate affordable units to meet identified housing need (including priority for those on the lowest incomes) and achieve a mixed and balanced community. The type of intermediate provision should reflect the principles identified in the council's Tenancy Strategy.</p> <p>The size of accommodation provided through estate regeneration schemes will be dependent on the particular needs of both existing and prospective future residents of the estate and should be justified on this basis.</p> <p>The design of schemes should follow the principles of high quality design set out in the policies in section 10 of this Plan. See Policy EN1(a)(ii) for the approach to housing estate amenity land.</p> <p>External amenity space provision should address the Lambeth specific requirements set out in Local Plan policy H5. However, there may be particular circumstances associated with housing estate regeneration schemes that justify a different approach to the layout of external amenity space and ratio between private and communal space. This should be justified on a case by case basis, having regard to the Lambeth Housing Design Principles, privacy, safety, overlooking, appropriate separation between residential units, and management and maintenance arrangements.</p> <p>Provision for play and informal recreation should follow the approach set out in London Plan policy S4 and associated Supplementary Planning Guidance.</p> <p>Estate regeneration schemes should seek to increase permeability and integration into the existing urban fabric; improve access by walking, cycling and public transport to local amenities for residents; improve the public realm within the estate; and create new walking and cycling routes through estates as appropriate.</p> <p>General parking standards will apply to estate regeneration schemes, as set out in Local Plan policies T3 and T7, unless exceptional local circumstances are demonstrated.</p> <p>Applicants for estate regeneration schemes should set out in a supporting statement the overall social, economic, environmental and health benefits of the proposal.</p>	<p>Council as primary applicant or promoter will need to resolve any viability issues arising from estate redevelopment.</p>

Policy	Policy wording	Cost implications
H12	<p>Build to Rent</p> <p>The council supports Build to Rent developments that meet the definition in London Plan policy H13. For Build to Rent proposals, the council will follow the policy approach set out in London Plan policy H13, subject to the following additional requirements:</p> <p>Where a development proposal involving Build to Rent has potential to include more than one residential core and/or block, applicants should use this separate core and/or block to provide low cost rented housing to be managed independently by a registered provider of affordable housing. The council will seek up to 70 per cent of the overall affordable housing requirement for the scheme to be low cost rented accommodation within this separate core and/or block. The remaining affordable housing requirement will normally be accepted as discount market rent accommodation within the Build to Rent element of the scheme. Up to 30 per cent of the affordable housing in the Build to Rent element of the scheme should be at London Living Rent levels and the remainder at London Affordable Rent.</p> <p>Where an applicant can demonstrate to the council's satisfaction that it is not feasible in design terms to include a separate residential core and/or block in the development proposal, the council will accept the full affordable housing requirement for the scheme as discount market rent units managed alongside the market rent units, in accordance with the requirements of London Plan policy. The council will seek 30 per cent of the affordable provision at London Living Rent level, with the remainder at London Affordable Rent.</p> <p>The package of discounted units below market rent will be secured through a section 106 legal agreement. This agreement will also cover the council's right to nominate tenants to specified discounted market rent units and associated management and monitoring arrangements.</p> <p>The minimum covenant period for all Build to Rent schemes in Lambeth will be 25 years, to be secured through a section 106 legal agreement.</p>	No cost implications. BtR included in the study.
	<p>Large-scale purpose-built shared living</p> <p>Development proposals for large-scale purpose-built shared living will be supported in Waterloo and Vauxhall only where they meet both the requirements of London Plan policy H18 and the following additional Lambeth-specific requirements:</p> <ul style="list-style-type: none"> (i) a justification is made for the local need the accommodation will meet; (ii) each private unit includes at least 15m² functional living space separate from the communal facilities; (iii) communal space meets the minimum requirements for houses in multiple occupation; and (iv) rents per room are set no higher than the mean rental level for a studio in the private rented sector in that postcode area (based on London Rent Map data). <p>A development proposal for large-scale purpose-built shared living will not be supported on public-sector land or where:</p> <ul style="list-style-type: none"> (i) it would result in the loss of existing self-contained residential accommodation (C3); (ii) it is proposed on a site allocated or protected for other uses; (iii) it is proposed on a site with an extant planning permission for C3 housing; and/or (iv) it would result in an over-concentration of similar uses, including purpose-built student accommodation, which may be detrimental to residential amenity or the balance and mix of uses in the area or place undue pressure on local infrastructure. <p>Affordable housing contributions should be made in accordance with London Plan Policy H18 in the form of a single upfront payment to Lambeth based on 50 per cent discount to market value of 35 per cent of the units (or 50 per cent of the units where the London Plan threshold applies), to be secured through a section 106 legal agreement.</p>	<p>No additional cost requirements.</p> <p>Affordable housing requirement tested in study.</p>

Policy	Policy wording	Cost implications
ED1	<p>Offices (B1a)</p> <p>Proposals for large offices (greater than 1,000m² gross external area) will be supported in the Central Activities Zone, Vauxhall and Waterloo London Plan Opportunity Areas and Brixton and Streatham major town centres. Elsewhere, large office development will be supported only where the scale of the proposal is appropriate to its location and the PTAL level is 4 or above and subject to the sequential test in section 7 of the NPPF. Proposals for smaller offices (up to 1,000m² gross external area) will be supported in all locations, subject to other plan policies relating to the existing use of the land, environment, transport and design. Proposals involving a net loss of office floorspace will not be supported unless the following tests are met.</p> <p>Either</p> <ul style="list-style-type: none"> (i) there is no demand for the office floorspace as demonstrated by evidence that the floorspace has been vacant and continuously marketed for a period of at least two years; and (ii) it would not be feasible and/or viable to refurbish, renew, or modernise or redevelop the offices in order to meet the requirements of existing or future occupiers as demonstrated through appropriate supporting evidence; and (iii) it would not be feasible and/or viable to adapt the office floorspace as smaller business (B1) units to meet demand from small businesses. This should be demonstrated through marketing evidence and an independently validated viability assessment; <p>or</p> <ul style="list-style-type: none"> (iv) the B1 floorspace to be lost is replaced in the vicinity and within Lambeth. <p>Where these tests are met, proposed new use(s) will be considered against the policies for those uses.</p> <p>Redevelopment of large offices for a mix of uses will be supported if the quantity of original B1 floorspace is replaced or increased as part of the development or elsewhere in the vicinity within Lambeth, incorporating existing businesses where possible. Exceptionally, partial replacement of existing B1a floorspace in a mixed use redevelopment will be considered where other significant planning benefits, such as a high proportion of affordable housing, are provided; and it can be demonstrated that the maximum feasible proportion of office floorspace is included in the scheme, or that the replacement space will result in an intensification of office use. In mixed use schemes, the office and residential elements of the development should be made available for occupation at the same time.</p> <p>Development proposals for new B1a office space greater than 2,500 m² (gross external area) should consider the scope to provide a proportion of flexible workspace suitable for micro, small and medium-sized enterprises, in accordance with London Plan Policy E2. This can include a variety of types of space including serviced offices and co-working space. Opportunities for long-term management of the flexible workspace by a company specialising in the management of this type of space should be fully explored.</p> <p>All new office floorspace intended for use by micro, small and medium-sized enterprises should be made available to the market fully fitted out to turn-key standard, unless an agreement is in place prior to occupation with a specialist small business space management company.</p> <p>Planning obligations or conditions will be used as appropriate to secure the provision of small or flexible office space and any measures for its fitting out and future management.</p>	<p>No cost implications.</p> <p>Land use issue – no cost implications.</p> <p>No cost implication – reflects current market demand.</p>

Policy	Policy wording	Cost implications
H2	<p>Affordable workspace</p> <p>In accordance with London Plan policy E3, the council will require major developments that include B1 floorspace to provide a proportion of affordable workspace in the following locations:</p> <p>In Waterloo and Vauxhall major developments should provide 10 per cent of B1 floorspace at 50 per cent of market rents for a period of 15 years;</p> <p>In Oval, Kennington and Clapham major developments should provide 10 per cent of B1 floorspace at 80 per cent of market rents for a period of 15 years;</p> <p>In the Brixton Creative Enterprise Zone (CEZ) all developments that include B1 floorspace should provide 10 per cent of B1 floorspace as affordable workspace for a period of 25 years with the following discounts on market rents:</p> <p style="text-align: center;">Brixton major centre Wider CEZ</p> <p>Small office (up to 5,000sqm GIA) No discount 50 per cent discount Medium office (between 5,001 to 10,000sqm GIA) 35 per cent discount 35 per cent discount Large office (greater than 10,000sqm GIA) 50 per cent discount 20 per cent discount</p> <p>b) Affordable workspace should be provided on-site and be designed to meet a local need. Evidence should be submitted demonstrating the space will be managed by a council-approved workspace provider. A payment in lieu may be accepted in limited circumstances where it can be demonstrated to the satisfaction of the council that a greater economic impact could be secured through off-site provision.</p> <p>c) Affordable workspace will be let and managed by a council-approved provider in accordance with the council's Workspace Allocation Protocol. Where a mixed-use development is proposed, the workspace should be let or sold to a council-approved specialist provider prior to the occupation of the other elements of the development.</p>	Tested in the study.
ED3	<p>Key Industrial and Business Areas (KIBAs)</p> <p>Development in KIBAs will be permitted only for business, industrial, storage and waste management uses, including green industries and other compatible industrial and commercial uses (excluding large scale retail) ancillary to, or providing for, the needs of the KIBA, other than where clause (c) below applies.</p> <p>The intensification of business uses in Use Classes B1b, B1c, B2 and B8 and industrial sui generis uses is encouraged in KIBAs, in accordance with London Plan policy E7 section A. Development proposals of this type should have regard to operational requirements (including servicing) and mitigate impacts on the transport network where necessary.</p> <p>Areas of KIBA land with potential for both intensification and co-location with residential and other uses (in accordance with London Plan policy E7 sections C and E) are shown on the Policies Map. These areas are subject to a 50 per cent threshold for affordable housing to be eligible for the Fast Track Route, in accordance with London Plan policy H6.</p>	Land use issue only – no cost implications for development

Policy	Policy wording	Cost implications
ED4	<p>Non-designated industrial sites</p> <p>The intensification of business uses in Use Classes B1b, B1c, B2 and B8 or of sui generis industrial uses on non-designated industrial sites is encouraged through development of mezzanines, introduction of small units, development of multi-storey schemes or more efficient use of land through higher plot ratios. Development proposals of this nature should have regard to operational requirements (including servicing) and mitigate impacts on the transport network where necessary.</p> <p>Development proposals for change of use, mixed-use or residential development on non-designated industrial sites will be assessed under London Plan policy E7 sections D and E. Where marketing is required by the policy, this should be for at least one year and the site should be vacant during this period. To be eligible for the Fast Track Route, a 50 per cent affordable housing threshold will apply to proposals of this nature, in accordance with London Plan policy H6.</p> <p>Development proposals involving the provision of new industrial floorspace and/or operational yard space outside of KIBAs will be assessed under London Plan policy E4. New B2 uses should generally locate in KIBAs, away from neighbouring residential uses. For new waste management uses, see Local Plan policy EN7.</p>	<p>No additional cost implications for developments.</p>

Policy	Policy wording	Cost implications
ED7	<p>Town centres</p> <p>(a) The Council will support the vitality and viability of Lambeth's hierarchy of major, district and local centres, and Central Activities Zone frontage, by: supporting retail, service, leisure, recreation and other appropriate uses in these areas; maintaining the predominant retail function of primary shopping areas in major and district centres and the Lower Marsh / The Cut Central Activities Zone frontage; delivering the regeneration of Lambeth's town centres; improving existing retail facilities; supporting and protecting market areas and areas of specialist shopping; safeguarding local shops and other local services to meet community need within neighbourhoods; and encouraging new residential development on appropriate sites as part of a wide mix of town centre uses and supporting the conversion of unused or underused space above ground floor units for new residential accommodation (subject to the requirements of other relevant policies relating to the existing use of the property).</p> <p>Development within centres will be encouraged in accordance with national policy to provide up to 800 sqm net additional comparison retail floorspace across the borough by 2041.</p> <p>Development in town centres will be supported if:</p> <p>(i) it is in scale and form appropriate to the size and role of the centre; (ii) it is designed to integrate with and add to the physical attractiveness of the area within which it is located, avoiding blank walls and facades; and (iii) the mix of uses is in line with the places and neighbourhoods policies and policies ED7 (evening economy and food and drink uses), ED9 (A2 uses) and ED10 (local centres). Active-frontage uses will be required at ground floor level. Exceptions will be allowed only outside of the primary shopping area where the nature of the development does not allow for this and/or it can be shown that a fully serviced active-frontage use is unlikely to be let, and it can be demonstrated that the proposal would contribute to enhancing the vitality and viability of the centre.</p> <p>(d) Proposals for town centres uses in edge of centre and out of centre locations will be assessed against the sequential test and impact assessment set out in the NPPF.</p> <p>(e) Major redevelopment proposals will be required to re-provide on affordable terms any independent individual shop premises that would be lost and ensure that these are available at the same time as the main elements of the development, subject to viability. This will be secured through conditions or, where appropriate, through planning obligations. The subdivision of larger units of over 250 m2 gross floor area within primary shopping areas will not be permitted unless it is demonstrated, through marketing evidence, that there is a lack of demand for larger units. The conversion or change of use of the storage and yard facilities of existing retail units will not be supported where this would compromise the viability or future use of the remaining retail unit.</p>	<p>No specific proposals – no cost implications.</p> <p>Inclusion of residential element will enhance the residual values generated by town centre developments.</p> <p>Requirement is subject to viability and would need to be tested if it cannot be met.</p>

Policy	Policy wording	Cost implications
ED13	<p>Visitor attractions, leisure, arts and cultural uses</p> <p>The council wishes to promote, safeguard and improve leisure, recreation, arts and cultural facilities in the borough where they meet local and wider needs, especially in the Central Activities Zone, Vauxhall and Waterloo London Plan Opportunity Areas and in town centres.</p> <p>(a) Visitor attractions and major leisure and cultural activities located in the Central Activities Zone, Vauxhall and Waterloo London Plan Opportunity Areas and Brixton and Streatham major town centres will be supported. Proposals should demonstrate in a visitor management plan how the potential impacts of high volumes of visitors would be managed, including appropriate provision for short term coach parking and, if appropriate, long term coach parking on site. Planning obligations will be sought to address any additional public service provision and maintenance required as a result of the development in accordance with the approach set out in Annex 10. Planning obligations may also be sought for improvements to the public realm, especially on routes to and from public transport nodes.</p> <p>(b) Change of use or loss of existing visitor attractions, leisure, arts and cultural uses will not be supported. Redevelopment for mixed use will only be supported where the existing use is re-provided on site, or a replacement facility is provided elsewhere in the locality. In exceptional circumstances, commuted payments may be accepted for replacement leisure, arts or culture uses elsewhere in the borough.</p> <p>(c) Commercial development related to cultural facilities on the South Bank and in Waterloo will be supported where it is associated with arts and cultural uses or is ancillary and complementary to the arts and cultural uses and where it can be demonstrated that:</p> <p>(i) it is essential to the development and/or the retention of arts and cultural facilities;</p> <p>(ii) it would not undermine the primary character and function of the South Bank as an arts and cultural quarter; and</p> <p>(iii) any enabling development supports and enhances the function and role of the arts or cultural facility that is proposing the development.</p> <p>(d) Temporary use of vacant commercial premises, open space and public realm for performance and creative work will be supported, subject to the nature of the proposed activity and the requirements of other policies.</p>	<p>No cost implication – these uses will come forward if a commercially viable proposition can be developed and/or if public subsidy is made available.</p> <p>No cost implication.</p> <p>Positive impact – potential to generate value to cross subsidise cultural uses.</p> <p>Positive impact – defrays liability for empty rates on vacant buildings.</p>

Policy	Policy wording	Cost implications
ED14	<p>Hotels and other visitor accommodation</p> <p>a) In accordance with London Plan policy E10, strategically-significant serviced visitor accommodation (C1) will be supported in the Vauxhall Opportunity Area, and smaller scale provision will be supported in those parts of Vauxhall outside the Opportunity Area but within the Central Activities Zone, so long as the proposal would not:</p> <ul style="list-style-type: none"> i) result in the intensification of the provision of serviced accommodation; ii) result in the loss of office space; iii) be located in a wholly residential street or predominantly residential neighbourhood; and iv) result in provision of more than 1282 net additional serviced bedspaces between 2019/20 and 2034/35. <p>b) No additional visitor accommodation will be supported in Waterloo within the boundary of the Central Activities Zone.</p> <p>c) Other visitor accommodation (C1) should be located in major and district town centres where they are well connected by public transport. In these locations visitor accommodation should be of an appropriate scale, make a positive contribution to townscape and should not unacceptably harm the balance and mix of uses in the area, including services for the local residential community. Visitor accommodation outside town centres will not be supported.</p> <p>d) All new visitor accommodation should meet the highest standards of accessibility and inclusion, in accordance with the requirements set out in the London Plan Policy E10. Applicants should submit an Inclusive Design Statement with their proposals.</p> <p>e) New visitor accommodation should be of high quality design so that it may be accredited by the National Quality Assessment Scheme.</p> <p>f) Hotel bedrooms should be designed to ensure they all benefit from natural daylight.</p> <p>g) Proposals to extend existing visitor accommodation will only be supported in the locations set out above subject to the other requirements of this policy being met.</p> <p>h) Proposals for new or extended visitor accommodation should include an assessment of impact on neighbouring residential amenity, including cumulative impact taking account of existing hotels nearby. Where necessary, measures to mitigate harm to residential amenity will be secured through planning obligations.</p> <p>i) Proposals for new or extended visitor accommodation should include a visitor management plan that assesses the impact of additional visitor numbers on the local area and sets out how this impact will be managed. Planning obligations will be sought to mitigate any negative impacts, including increased demand on local transport facilities and on public services to manage and maintain the public realm. Financial contributions towards management and maintenance will be calculated in accordance with the charging approach set out in Annex 10.</p> <p>j) Where it is demonstrated, through at least one year's marketing evidence, that there is no longer demand for existing visitor accommodation, change of use will be supported subject to the requirements of other development plan policies.</p>	<p>No cost implications – these developments will come forward if commercially viable. Where there are competing uses for a site, a hotel would only come forward if the residual land value exceeds that generated by other uses.</p>

Policy	Policy wording	Cost implications
ED15	<p>Employment and skills</p> <p>In accordance with London Plan policy E11, the council will support employment and training schemes to maximise local employment opportunities and help address skills deficits in the local population. Planning obligations will be used to ensure major development proposals contribute to this aim by fulfilling the requirements set out below. Applications for major development must include a site-specific Employment and Skills Plan (ESP) and the developer will be expected to agree to deliver the commitments secured in the ESP. The ESP should as a minimum address, in detail, how the developer intends to deliver the following requirements:</p> <p>A minimum of 25 per cent of all jobs created by the development (in both the construction phase and for the first two years of end-use occupation of the development) to be secured by the council for local residents. Developers to engage with local schools and colleges and support them to promote amongst young people aged 11 to 19 the achievement of the skills and qualifications needed for employment in the commercial sectors of the end-use occupiers in place during the first two years of the development. The council will expect the developer to make all reasonable endeavours to meet the obligations set out in (i) and (ii), above. The developer is expected to make or bring about the necessary provision to meet these obligations. However, if the developer can demonstrate to the satisfaction of the council that there are circumstances specific to the scheme such that either direct provision is not operationally feasible, or that an alternative means of delivery would result in a more effective outcome, then the council may consider a financial contribution in lieu. In these circumstances, the amount of the contribution will be based on the calculation set out in Annex 10. In addition to the obligations in (b) above, major development proposals will be expected to make financial contributions to help support those sections of the Lambeth workforce that are furthest from employment, having been out of work for a long period of time and/or having low levels of skills. The financial contributions will be used by the council to fund local training and support to enable access to newly created employment opportunities arising from development for those who may struggle to access the opportunities without extra support, in particular the long-term unemployed and young people. The approach to calculating these financial contributions is set out in Annex 10.</p> <p>Applicants will be required to provide monitoring reports on the implementation of their ESP at agreed regular intervals to enable the council to fulfil its monitoring obligations.</p> <p>Payment of planning obligations relating to employment and skills will normally first fall due on the implementation of planning permission. A section 106 agreement will set out the detailed arrangements for the timing of payments in individual cases. Completed planning agreements will also provide for a monitoring fee linked to the overall package of obligations.</p>	<p>Proposed employment and training contributions incorporated into appraisals.</p>
S1	<p>Safeguarding existing social infrastructure</p> <p>The council will support and encourage the most effective use of community premises to address different and changing priorities and needs in the borough, in accordance with agreed strategies where relevant. Existing community premises will be safeguarded unless it can be demonstrated that either:</p> <p>(i) there is no existing or future need or demand for such uses, including reuse for other community services locally, and adequate alternative accommodation is available to meet the needs of the area; or</p> <p>(ii) replacement facilities are proposed on or off site of equivalent or better functionality to serve the needs of the area; or</p> <p>(iii) development of the site/premises for other uses, or with the inclusion of other uses, will enable the delivery of approved strategies for service improvements.</p> <p>In exceptional circumstances, where tests (i) and (iii) are not met and it is demonstrated to the satisfaction of the council that it would not be feasible and/or effective to include replacement facilities in the proposed development, a payment in lieu may be accepted.</p> <p>Change of use between D1 and D2, and vice versa, will be supported where it can be demonstrated that the tests in section (b) above have been met for the existing use</p>	<p>No cost implications. Council may choose to provide funding, but this is not an issue for development.</p> <p>No cost implications. Community buildings will have a low value and planning protection reduces pressure for redevelopment for higher values uses.</p> <p>No cost implications.</p>

Policy	Policy wording	Cost implications
S2	<p>New or improved social infrastructure</p> <p>(a) Proposals for new or improved premises for higher and further education, childcare, worship, health care (including hospitals), sports, recreation, affordable meeting space and other community uses will be supported where:</p> <ul style="list-style-type: none"> (i) the site or buildings are appropriate for their intended use and accessible to the community; and (ii) the location, nature and scale of the proposal, including hours of operation, do not unacceptably harm the amenities of the area through noise, disturbance, traffic generation, congestion, local parking or negative impacts on road safety; and (iii) buildings and facilities are designed to be flexible, adaptable and sited to maximise shared community use of premises, where practical. <p>The council will also apply the provisions set out in London Plan policies S1, S2 and S5, where relevant.</p> <p>(b) The use of residential floorspace accommodation for a nursery or childcare use may be acceptable where:</p> <ul style="list-style-type: none"> (i) there are a specific local need and locational reasons to justify this; and (ii) there is no readily available non-residential accommodation to meet this need in the locality; and (iii) it would not result in the loss of a complete residential unit and the remaining residential floorspace will continue to meet the standards required of a self-contained residential dwelling. <p>Development proposals for more than 500 residential units should incorporate suitable childcare provision to meet additional need arising from the development that cannot be met by existing local facilities.</p> <p>(d) Proposals for more than 25 residential units should be supported by an assessment of anticipated impact on social infrastructure, including impact on the quality and sustainability of existing provision. Development proposals should include appropriate provision for social infrastructure and local shops to meet local the additional need that will arise, where this cannot be met adequately through existing facilities. New social infrastructure should be made available to all residents, irrespective of tenure. Proposals should include a plan for the management and maintenance of the new facilities. If it is not possible or effective to meet the additional need through provision of new social infrastructure on site, a payment in lieu will be sought to contribute towards additional service provision in existing facilities in Lambeth, including for management and maintenance costs associated with the increased level of provision.</p> <p>(e) New sports and leisure facilities (D2 uses) provided within development proposals for hotels and purpose-built student housing or shared-living should be made available for community access during off-peak hours to groups of Lambeth residents and users identified by the council.</p> <p>(f) Development proposals for schemes that are likely to be used by children and young people should address the requirements of London Plan policy S4B.</p>	No cost implications for developments.

Policy	Policy wording	Cost implications
T3	<p>Cycling</p> <p>The council will apply London Plan policy T5 to promote cycling. Local Plan Policy Q13 sets out the council's quality requirements in relation to the provision of cycle parking.</p> <p>Lambeth will improve conditions for people to cycle and make cycling a safer, quicker, more direct and more attractive form of travel. Lambeth will ensure that people who want to cycle are able to do so and are not discouraged by road danger concerns.</p> <p>Lambeth will promote cycling through improvements to routes, giving greater priority to cyclists in the use of road space, reducing road danger from other transport modes and through improvements to signage and facilities.</p> <p>The council will require the provision of appropriate secure and covered cycle parking facilities in accordance with the minimum standards set out in the London Plan policy T5 and with Local Plan policy Q13. When designing building layouts sufficient space should be allocated at the outset to meet these requirements. Development proposals for non-residential uses should include provision of showers, changing facilities, drying rooms and lockers for cyclists appropriate to the number of cycle parking spaces provided.</p> <p>In all developments at least 25 per cent of cycle parking provision should be of the most accessible type, such as 'Sheffield' stands and 10% of overall provision should be designed and designated for disabled use.</p> <p>In all developments at least one charge point should be provided to allow for re-charging of electric cycles and a charge point should be provided for a minimum of 1 in 10 cycle parking spaces.</p> <p>Development proposals will be expected to enable and contribute towards improvements to cycle access, including the delivery and improvement of local and strategic routes and links, as identified in the Lambeth Transport Strategy. In appropriate locations, developers will be required to contribute land and/or finance towards the delivery of new cycle hire docking locations and other public facilities ancillary to cycling, such as cycle pumps / servicing facilities.</p>	<p>No cost implications.</p> <p>Contributions would need to be collected through CIL due to pooling requirement.</p>
T4	<p>Public transport infrastructure</p> <p>d) Development proposals should will be expected to provide, or contribute to the provision of new and/or improved public transport infrastructure and services proportionate to the projected where the predicted number of additional trips arising from the development and considering cumulative impacts of other approved developments in the area.</p> <p>e) Development proposals should improve accessibility to public transport by creating and improving walking and cycling links to stops or stations.</p> <p>i) being acceptable in terms of impact on the environment including townscape, public realm and amenity of adjoining areas; and</p> <p>ii) being designed to be safe, convenient, attractive and accessible for use especially by disabled people, children and cyclists, including provision for cycle parking and consideration of desire lines.</p>	<p>No cost implications beyond prevailing requirements.</p>

Policy	Policy wording	Cost implications
T7	<p>Parking</p> <p>(a) The council will apply London Plan policy T6 to promote a reduction in car ownership and private car trips.</p> <p>(b) The council will apply the maximum residential car parking standards set out in London Plan policies T6.1 apart from in PTAL areas 1 and 2, where the following Lambeth specific maximum standards will apply:</p> <p>PTAL 2 Up to 0.25 spaces per unit PTAL 1 Up to 0.5 spaces per unit</p> <p>(c) The council will apply the maximum non-residential car parking standards set out in London Plan policies T6.2, T6.3 and T6.4.</p> <p>(d) In Lambeth, non-residential disabled persons parking should be provided for 5 per cent of the workforce in all non-residential development proposals, including where no general parking is provided. Availability of convenient and accessible public transport options, and the potential for the development to contribute toward improvement of these, will also be taken into consideration on a case by case basis. All other aspects of London Plan policy T6.5 will apply.</p> <p>(e) Development should:</p> <p>(i) be permit free where the development falls within an existing or planned controlled parking zone;</p> <p>(ii) avoid reliance on the public highway for parking needs, including disabled parking, motorcycle and coach parking: where evidence is presented that it is not possible to accommodate parking requirements within the site the council will seek planning obligations in the form of a commuted sum, considering both the cost of implementation and maintenance of any parking bay, as well as the opportunity cost of lost kerbside space, for example in terms of parking revenues.</p> <p>(iii) provide car club membership for all residents in new residential development and in mixed development that includes housing, and provision of car club spaces where appropriate: all development schemes should promote and provide for car club membership or car pool schemes in place of private parking;</p> <p>(iv) comply with London Plan policies for motor-cycles, electric vehicle charging points and coaches;</p> <p>(v) ensure that all outdoor and open parking areas are permeable.</p> <p>(f) Parking in new shopping and leisure developments in opportunity areas and centres should serve the area/centre as a whole and not be reserved solely for use in connection with the development proposed. Preference should be given to short-stay parking. Disabled parking and cycle parking should be located closest to town centres and the entrance of facilities.</p> <p>(g) In mixed-use development, flexible, shared use of car parking should be provided with an assignment of parking spaces for occupants such as families and older residents.</p> <p>(h) Lambeth expects that parking control and management should be consistent across the borough, regardless of land ownership or highway status. Parking regimes on housing land should be fully integrated and aligned with parking controls on the surrounding public highway.</p> <p>(i) Lambeth will consider the introduction of parking controls across the borough in order to manage demand for parking and allow for more efficient uses of the kerbside such as car club spaces, as well as the creation of better conditions for walking and cycling.</p> <p>(j) When considering parking impacts, the council will prioritise alternative kerbside uses supported in the Transport Strategy, such as car club cars, cycle parking and electric vehicle charge points, ahead of parking for private vehicles.</p> <p>(k) The redevelopment of existing car-parks and garages for other uses will be supported. Parking provision in development proposals on existing car-park and garage sites should comply with the standards for the uses proposed and should not seek to replace or re-provide the parking spaces that existed previously.</p>	<p>No additional cost implications beyond existing requirements.</p> <p>Standard requirement.</p>

Policy	Policy wording	Cost implications
T10	<p>Digital connectivity infrastructure</p> <p>a) The council supports the delivery of high quality digital infrastructure to enable the future expansion of electronic communications networks, including next generation mobile technology and full fibre broadband connections. The council will require provision for digital connectivity infrastructure in accordance with London Plan policy SI6.</p>	<p>Simply reflects market demands of occupiers – no additional cost implication.</p>

Policy	Policy wording	Cost implications
EN1	<p>Open space, green infrastructure and biodiversity</p> <p>The council will meet requirements for open space by:</p> <p>(a) Protecting and maintaining open spaces, green infrastructure and their function. Development which would involve the loss of existing public or private open space will not be supported unless at least one of the following tests is met:</p> <p>(i) Replacement open space of equivalent or better quality and quantity is provided within a suitable location in the local area.</p> <p>(ii) In the case of housing estate amenity areas, significant regeneration and community benefits would be achieved that could not be achieved in any other way, and appropriate compensatory provision for the loss of open space is made, including improvements to the quality of the remaining open space.</p> <p>(iii) It is for the provision of facilities directly related to the use of open space including ecology centres, indoor sports facilities, changing rooms, toilets or cafes as long as these are appropriate in scale and form to the size and character of the open space and acceptable in terms of impact on openness and do not harm the function and operation of the open space.</p> <p>(b) Preventing development which would result in loss, reduction in area or harm to the nature conservation or biodiversity value of an open space including any designated or proposed Local Nature Reserves (LNR) or Sites of Importance for Nature Conservation (SINC) unless adequate mitigation or compensatory measures are included appropriate to the nature conservation value of the assets involved.</p> <p>(c) Development proposals should wherever possible protect, enhance create and manage sites of nature conservation or biodiversity interest in accordance with the Borough's Biodiversity Action Plan (BAP) and the Mayor's Biodiversity Strategy.</p> <p>(d) Increasing the quantity of open space and green infrastructure in the borough through proposals such as the Vauxhall Square initiative, the extension of Jubilee Gardens and by linking existing spaces through green chains, the Greenway and Thames Path National Walking trail initiatives, but also through:</p> <p>(i) The provision of open space in new developments appropriate to their scale, the uses involved and the location of the development.</p> <p>ii) Requiring major development in areas of open space deficiency and/or in areas of access to nature deficiency to provide new on-site open space/access to nature improvements. Where the development proposal includes residential units, this new open space should be in addition to the external amenity space requirements in Local Plan policy H5. Where it is demonstrated to the satisfaction of the council that new on-site open space provision or access to nature improvements would not be feasible and/or effective, a payment in lieu will be sought as a planning obligation to enable the provision of new open space or improvements to the accessibility of existing public open space in the vicinity of the development, including their nature conservation and biodiversity value.</p> <p>(iii) Where appropriate and feasible, ensuring that development is designed so as to contribute to the creation or extension of green chains and links ('green corridors') involving safe, healthy, convenient and attractive access for pedestrians and cyclists and to promote migration and protection of plants, animals and habitats of biodiversity importance.</p> <p>(e) Improving the quality of, and access to, existing open space and green infrastructure, including the range of facilities available and its biodiversity and nature conservation value and heritage value, through various means including the implementation of the Lambeth Open Spaces Strategy and Lambeth Green Infrastructure Strategy.</p> <p>(f) Applying London Plan policy G5 in relation to the urban greening factor for major developments. For other developments the council will strongly encourage inclusion of urban greening measures. Development proposals should incorporate living roofs and walls where feasible and appropriate to the character and context of the development. All proposals should include a maintenance plan for the lifetime of the development. Planning obligations may be sought to cover future maintenance of green infrastructure.</p>	<p>No cost implications. Contributions to open space to be secured through CIL.</p>

Policy	Policy wording	Cost implications
EN3	<p>Decentralised Energy</p> <p>All major developments will be expected to connect to, and where appropriate extend, existing decentralised heating, cooling or power networks in the vicinity of the site, unless a feasibility assessment demonstrates that connection is not reasonably possible. Minor new-build developments should be designed to be able to connect wherever reasonably possible. Where networks do not currently exist, developments should make provision to connect to any planned future decentralised energy network in the vicinity of the site, having regard to opportunities identified in Heat Network Priority Areas of the London Heat Map and area specific energy plans. Major development proposals that cannot immediately connect to an existing heating or cooling network should follow the heating and cooling hierarchies set out in London Plan policies SI3(D) and SI4(B).</p>	Reflects standard approaches to heating in major schemes.
EN4	<p>Sustainable design and construction</p> <p>(a) Lambeth will follow the approach set out in London Plan policies SI1 Improving air quality, SI2 Minimising greenhouse gas emissions, SI4 Managing heat risk, SI5 C and E Water infrastructure.</p> <p>(b) All development, including construction of the public realm, highways and other physical infrastructure, will be required to meet the highest standards of sustainable design and construction feasible, relating to the scale, nature and form of the proposal.</p> <p>(c) Proposals should demonstrate in a supporting statement that sustainable design standards are integral to the design, construction and operation of the development. New build residential development are encouraged to use the Home Quality Mark and Passivhaus design standards. Planning applications for non-residential developments should also be accompanied by a pre-assessment, demonstrating how the following BREEAM standards, or any future replacement standards, will be met:</p> <p>(i) All new non-residential development and non-self-contained residential accommodation, should meet at least BREEAM 'Excellent'.</p> <p>(ii) All major build non-residential refurbishment of existing buildings and conversions over 500m² floorspace (gross) should meet at least BREEAM Non-Domestic Refurbishment 'Excellent'.</p> <p>(d) Development will be required to be resilient to climate change by including appropriate climate change adaptation measures.</p> <p>(e) Adequate remedial treatment of any contaminated land will be required before development can commence.</p>	<p>No additional cost implications beyond existing policy.</p> <p>Allowances included in the appraisal for zero carbon and BREEAM excellent.</p>
Q2	<p>Amenity</p> <p>Development will be supported if:</p> <p>(i) visual amenity from adjoining sites and from the public realm is not unacceptably compromised;</p> <p>(ii) acceptable standards of privacy is provided without a diminution of the design quality;</p> <p>(iii) adequate outlooks are provided avoiding wherever possible avoiding any undue sense of enclosure or unacceptable levels of overlooking (or perceived overlooking);</p> <p>(iv) it would not have an unacceptable impact on levels of daylight and sunlight on the host building or adjoining property including their gardens or outdoor spaces;</p> <p>(v) the adverse impact of noise is reduced to an acceptable level through the use of attenuation, distance, screening, or internal layout/orientation in accordance with London Plan D13;</p> <p>(vi) adequate outdoor amenity space is provided, practical in layout, free from excessive noise or disturbance, pollution or odour, oppressive enclosure, unacceptable loss of privacy wind/downdraught and overshadowing; and</p> <p>(vii) service equipment (including lift plant, air handling/extract, boiler flues, meter boxes, gas pipes and fire escapes) is fully integrated into the building envelope or located in visually inconspicuous locations within effective and robust screening/ enclosures and does not cause unacceptable disturbance through its operation.</p> <p>(viii) It meets London Plan policy D2 'agent of change'</p>	No specific cost implications.

Policy	Policy wording	Cost implications
Q3	<p>Safety, Crime Prevention and Counter Terrorism</p> <p>(a) In order to create a safe borough for all, the council will expect good design to:</p> <p>(i) design-out opportunistic crime and anti-social behaviour in a site-specific manner, based on an understanding of the locality and likely crime and safety issues it presents;</p> <p>(ii) pay particular regard to shared public spaces and communal areas (particularly cycle stores, refuse stores); and</p> <p>(iii) ensure that materials and construction details are robust, durable and resistant to malicious damage.</p> <p>(b) Applicants should:</p> <p>(i) engage in early pre-application discussions where possible; and</p> <p>(ii) meet the standards and objectives of the 'Secured By Design' initiative.</p> <p>(c) Development proposals should address resilience to terrorism in a manner which is proportionate to the threat and appropriate to the context.</p> <p>(d) The Council will apply London Plan policy D11 Fire Safety</p>	No particular cost implications for developments.
Q7	<p>Urban design: new development</p> <p>New development (new buildings and conversion schemes) will generally be supported if:</p> <p>(i) it is of a quality design which is visually interesting, well-detailed, well-proportioned with adequate detailing/architectural interest (which can include accent colour and ornamentation);</p> <p>it has a bulk, scale/mass, siting, building line and orientation which is respectful of the prevailing local character; or where the context is changing, contributes towards the intended future character of the area.</p> <p>it is built of durable, robust, low-maintenance materials and is designed to be flexible and adaptable for different uses;</p> <p>it includes well-considered windows and doors/entrances in street and other public frontages, so that all entrances are attractive, safe and legible. Designers should ensure that features such as canopies and letter boxes, doorbells and intercoms, external lighting etc. are integrated effectively into the design, and that naturally-lit entrance halls, corridors and circulation spaces are provided where possible;</p> <p>plant and equipment (for example: meter boxes, pipes, cables, electronic communications antenna, and air conditioning units) is not placed on important elevations – where possible it should be fully integrated into the building or located in visually inconspicuous locations within effective and robust screened enclosures;</p> <p>it creates attractive roofscapes/roof tops where plant and equipment is fully integrated and completely screened from public view;</p> <p>it would not create unattractive, canyon-like development including along railway lines;</p> <p>any vehicular access, parking (particularly in under-crofts or basements) or servicing is designed so as to be well related to the adjacent area, not prejudice or preclude active frontages, minimise impact on amenity and be visually attractive.</p>	Reflects standard requirements.
Q8	<p>Design quality: construction detailing</p> <p>(a) When negotiating schemes the Council will seek to ensure that proposed building designs and submitted details are buildable and visually attractive. Poorly- detailed and undeliverable built forms will be resisted.</p> <p>(b) When considering the details of proposals the council will:</p> <p>(i) resist 'value engineering' approaches which dilute the design quality and integrity of approved schemes; and</p> <p>(ii) seek construction detailing that is unified, visually attractive, robust and maintenance free.</p>	No cost implications.

Policy	Policy wording	Cost implications
Q9	<p>Landscaping</p> <p>Development will be supported where landscaping:</p> <ul style="list-style-type: none"> (i) is fit for purpose and demonstrates that satisfactory provision has been made for future growth and aftercare; (ii) retains and enhances existing planting and landscape features of value and protects them during construction; (iii) protects and enhances existing designated habitats and creates new habitats/areas of nature conservation interest and bio-diversity value; (iv) maximises opportunities for provision of green infrastructure, such as through planting of trees and other soft landscaping; (v) makes use of plant species that are in keeping with the character of the existing vegetation on the site and in the general area; (vi) takes into account established or potential pedestrian and cycle desire lines and suitably accommodates them; (vii) provides strong boundary treatments, including trees and shrubs where appropriate; (viii) avoids piecemeal treatments and left-over spaces; (ix) provides means of access routes and or parking areas which are compliant with highway safety requirements and minimum parking space standards; (x) is attractive and well designed, taking a co-ordinated approach with any adjoining landscaping schemes; and (xi) Provides sustainable drainage and minimises surface run-off. 	No cost implications.
Q10	<p>Trees</p> <ul style="list-style-type: none"> (a) Proposals for new development will be required to take particular account of existing trees on the site and on adjoining land. (b) Development will not be permitted that would result in the loss of trees of significant amenity, historic or ecological/habitat conservation value (including veteran trees), or give rise to a threat, immediate or long term, to the continued well-being of such trees. (c) Where trees are located within a development site, the proposal will be supported only where it has been demonstrated that: <ul style="list-style-type: none"> (i) trees of significant amenity, historic or ecological/habitat conservation value have been retained as part of the site layout; (ii) the retained trees can be satisfactorily protected from construction impacts and site works during the development stage; and (iii) the retained trees have been positively integrated, on a sustainable basis, as part of the site layout. (d) The council will continue to protect trees in new development by making Tree Preservation Orders and/or by the use of appropriate planning conditions. (e) The council will continue to protect trees, by the use of Tree Preservation Orders, that contribute to the amenity of an area or that are under threat from inappropriate pruning works or removal. (g) In accordance with London Plan policy G7, where it is necessary to remove trees, adequate replacement planting based on the existing value of the benefits of the trees removed, determined by a cost/benefit tool such as i-tree or CAVAT, will be secured. 	Land use issue. No cost implications.

Policy	Policy wording	Cost implications
Q12	<p>Refuse/recycling storage</p> <p>(a) Adequate refuse and recycling storage should be provided for all development. In order to protect visual and residential amenity and public health the council will expect all refuse and recycling storage to:</p> <ul style="list-style-type: none"> (i) fully integrate into the wider design from the outset; (ii) be attractively designed and screened and conveniently located for users and collection; (iii) have heavy-duty, robustly detailed structures and detailing; (iv) be fully ventilated and easy to clean/maintain; (v) be large enough to accommodate the easy manoeuvring of refuse/recycling containers and have sufficient space to accommodate any increased storage requirements; and (vi) be secure and safe. <p>(b) In new-build schemes refuse storage areas should:</p> <ul style="list-style-type: none"> (i) be fully integrated into the building and placed close to the main entrance for ease of use; or be separate - located well away from residential accommodation to avoid harm to amenity and outlook; (ii) have a water supply to allow for wash down; (iii) be naturally ventilated; preferably with robust steel framed/louvered doors. Where necessary, especially where the storage is integrated within the building, mechanical extraction should be provided in order to effectively deal with odour; and <p>(c) On estates and on spacious developments in-ground refuse storage and free-standing refuse storage have been used successfully. However, they will not be acceptable on the public highway unless an agreement is in place to ensure they are managed and maintained as part of the wider development.</p>	Reflects standard requirements for developments.
Q13	<p>Cycle storage</p> <p>(a) Cycle storage in all development (including conversions) should be:</p> <ul style="list-style-type: none"> (i) fully integrated into proposals from the initial design stage; (ii) directly and conveniently accessed from outside the building; (iii) accessible, attractive, secure and safe to use; (iv) either in individual lockers, or in cycle stores shared by groups of immediate neighbours; and (v) covered, fully ventilated, robustly constructed and easy to maintain; (vi) inclusive, allowing for different user needs and different types of cycles. <p>(b) When considering small-scale flat conversions and intensification of use the Council will:</p> <ul style="list-style-type: none"> (i) assess whether there is scope to provide adequate cycle storage provision when assessing unit numbers/site layouts (and may seek a reduction in unit numbers in order to accommodate suitable cycle storage provision); (ii) support cycle storage in front gardens/forecourts only where it does not compromise visual amenity or access; (iii) only support storage within flats if it can be proved that there is no viable alternative, there is a dedicated storage place, fire safety is not compromised, accessibility is convenient and it does not result in cycles being stored externally such as on a balcony or roof; and (iv) consider the loss of an on-street parking bay in favour of an on-road cycle store to be shared between residents where it can be shown that there is no other viable alternative. The cost, including the opportunity cost of kerbside space, to be borne by the development. <p>Be fully compliant with the minimum standards set out in the London Plan and exceed these where a high demand for cycling is expected.</p>	Well established requirement for cycle storage in developments.
Q19	<p>Westminster World Heritage Site</p> <p>Development affecting the setting and approaches of the Westminster World Heritage Site will be required to demonstrate that it:</p> <ul style="list-style-type: none"> (i) preserves or enhances the Outstanding Universal Value, authenticity and integrity of the World Heritage Site (as set out in the official statement of Outstanding Universal Value and its setting); (ii) preserves or enhances the environmental quality of the public realm/vantage points; and (iii) provides the opportunity to better understand, appreciate and reveal the Outstanding Universal Value, authenticity and integrity of the site. 	No cost implications. The implications of developing in the setting of a world heritage site would need to be taken into account by the developer to avoid call-in and potential rejection by SoS.

Policy	Policy wording	Cost implications
Q22	<p>Conservation areas</p> <p>(a) Development proposals affecting conservation areas will be permitted where they preserve or enhance the character or appearance of conservation areas by:</p> <p>(i) respecting and reinforcing the established, positive characteristics of the area in terms of the building line, siting, design, height, forms, materials joinery, window detailing etc.; and</p> <p>(ii) protecting the setting (including views in and out of the area).</p> <p>(b) Façade retention with the demolition of the remaining building is generally not considered appropriate in conservation areas as it results in the loss of historic structures. Development involving demolition in a conservation area will only be supported if:</p> <p>(i) the structure proposed for demolition does not make a positive contribution to the character or appearance of the area;</p> <p>(ii) a suitable replacement has been granted planning permission; and</p> <p>(iii) a planning condition and/or Section 106 agreement has been made that the building shall not be demolished until a contract for the replacement building has been made.</p>	No particular cost implications.
Q26	<p>Tall and Large Buildings</p> <p>(a) Proposals for tall and large buildings will be supported where:</p> <p>(i) they are located within areas identified as appropriate for tall buildings in Annex 11;</p> <p>(ii) there is no unacceptable impact on strategic or local views or heritage asset;</p> <p>(iii) design excellence is achieved in terms of form and silhouette;</p> <p>(iv) the proposal makes a positive contribution to the townscape either individually to form a landmark or as a contribution to a group;</p> <p>(v) it is of the highest standards of architecture, detailing and materials;</p> <p>(vi) it adequately addresses the criteria in London Plan policy D8 (c) and does not have an unacceptably harmful impact on its surroundings including microclimate, wind turbulence, noise, reflected glare, aviation (including the safeguarded zones around Heathrow Airport and Battersea Heliport, and the helipad at King's College Hospital), navigation and electronic communication or broadcast interference; and</p> <p>(vii) it can be shown that site can accommodate the quantum of development proposed in terms of meeting acceptable standards of access, accessibility, servicing etc. for the uses proposed.</p>	Land use issue. No particular cost implications.
