

**Draft Revised Lambeth Local Plan  
Proposed Submission Version  
January 2020**

**Topic Paper 10:  
Housing provision statement**

**August 2020**

## Contents

1. Introduction .....	1
2. Lambeth’s housing requirement and buffer.....	1
3. Delivery on large sites 0.25ha and above .....	2
4. Delivery on small sites < 0.25ha.....	7
5. Delivery from non-self-contained accommodation.....	10
6. Five year housing land supply .....	10
7. Housing trajectory for Years 1-10 – update.....	11
Appendix 1 - Schedule of large sites Years 1 to 10 .....	12
Appendix 2 - Schedule of developable large sites Years 11-15 .....	20
Appendix 3 – Schedules of small sites .....	21
Appendix 3 (a) – small sites on the Lambeth Brownfield Land Register December 2019.....	21
Appendix 3 (b) – small sites with extant permissions as at end March 2019 (informed by the Housing Development Pipeline Report 2018/19 SD11).....	27
Appendix 3 (c) – small sites with permission granted during 2019/20 .....	57
Appendix 3 (d) – small sites with permissions granted between 1 April and 30 June 2020 .....	65
Appendix 3 (e) – small sites with potential for housing development but no planning consent (developable sites).....	67
Appendix 4 – Schedule of sites delivering non-self-contained accommodation within the housing trajectory.....	68
Appendix 5 – Summary of the principal components of the five year supply.....	73
Appendix 6 – Updated housing trajectory for Years 1 to 10 of the plan period.....	74

1. Introduction

- 1.1 This topic paper has been produced in response to questions from the Inspector of the Draft Revised Lambeth Local Plan set out in section 5 of his initial letter INS1 dated 13 July 2020 (particularly questions 5.1 to 5.6).
- 1.2 This paper sets out the housing requirement for Lambeth and the detailed information about the sites contributing to delivery against this requirement over the plan period. The position on five year housing land supply is explained at section 6 and Appendix 5 of this topic paper.
- 1.3 The Council has taken the opportunity to update the housing trajectory included in Annex 13 of the submitted plan, to reflect the most up-to-date position. The trajectory has also been amended to show the correct start date and buffer for the five year housing land supply, in response to the Inspector's questions. The updated trajectory is included at Appendix 6 of this topic paper.

2. Lambeth's housing requirement and buffer

- 2.1 Lambeth's housing requirement is established through the new London Plan, which sets a borough-level housing target for ten years from 2019/20 to 2028/29. The target for Lambeth is to deliver at least 13,350 net additional dwellings over the ten years (London Plan Policy H1 and Table 4.1), which results in an annual delivery target of 1,335 dwellings per annum (dpa).
- 2.2 The ten-year housing targets in London Plan Table 4.1 are based on the 2017 London SHLAA ([EB10](#)). This includes an assessment of large housing sites (0.25 hectares and above) undertaken in partnership with boroughs, which provides the most comprehensive study available of the capital's capacity for housing delivery based on a consistent pan-London methodology. In addition, the SHLAA includes an assessment of small site capacity using a combination of trend data for certain types of development and an estimate of potential for intensification in existing residential areas; and an assessment of capacity from non-self-contained housing.
- 2.3 The small sites figure for Lambeth, identified in London Plan table 4.2, is 4,000 net additional dwellings over ten years or 400 dpa.
- 2.4 London Plan paragraph 4.1.12 states that "If a target is needed beyond the 10 year period (2019/20 to 2028/29), boroughs should draw on the 2017 SHLAA findings (which cover the plan period to 2041) and any local evidence of identified capacity, in consultation with the GLA, and should take into account any additional capacity that could be delivered as a result of any committed transport infrastructure improvements, and roll forward the housing capacity assumptions applied in the London Plan for small sites".
- 2.5 The London SHLAA 2017 assessed capacity for large sites over five, five year periods and identified the following notional capacity in Lambeth (see below). The ten year housing target is based on the large site capacity identified for Phases 2 and 3.

Phase 1	2017/18 to 2018/19	2,156
Phase 2	2019/20 to 2023/24	5,182
Phase 3	2024/5 to 2028/29	4,035
Phase 4	2029/30 to 2033/34	3,066
Phase 5	2034/5 to 2040/41	1,359

- 2.6 Based on this information, the target for years 11-15 of the plan period for the Draft Revised Lambeth Local Plan would be 5,066 (3,066 from large sites plus 2,000 from small sites) over five years, which results in an annual target of 1,013 dpa. There is no additional local information assessing capacity for years 11-15 at the time of writing, and there are no significant transport infrastructure projects that would affect housing delivery over this time period.
- 2.7 Paragraph 73 of the NPPF requires the application of a buffer to the first five years of the housing requirement. This should be 10% where the local planning authority wishes to demonstrate a five year supply of deliverable sites through an adopted plan, to account for any fluctuations in the market during that year. The buffer should increase to 20% where there has been significant under delivery of housing over three previous three years, to improve the prospect of achieving the planned supply.
- 2.8 Lambeth has a good record of housing delivery over the past three years, as evidenced by the Lambeth's Annual Position Statement: Housing Supply and Delivery 2019 ([SD10](#)). Lambeth's Housing Delivery Test result for 2019, published by MHCLG in February 2020, was 121% with no buffer required (see [SD26](#)).
- 2.9 Therefore, for the purposes of the housing trajectory to be included in the Draft Revised Lambeth Local Plan, Lambeth will apply a 10% buffer to the first five years in order to be able to demonstrate a five year supply of deliverable sites through the examination and adoption of the Plan.
- 2.10 The indicative housing requirement for designated neighbourhood areas is unchanged from the position included on page 527 of the DRLLP PSV January 2020.
3. Delivery on large sites 0.25ha and above
- 3.1 Large sites are defined in the London SHLAA 2017 as those 0.25 hectare and above in area. Information on large sites that will contribute to housing delivery in Lambeth over the plan period is set out in Appendices 1 and 2 and is divided into three categories:
- |             |                                |
|-------------|--------------------------------|
| Years 1-5   | deliverable sites (Appendix 1) |
| Years 6-10  | developable sites (Appendix 1) |
| Years 11-15 | developable sites (Appendix 2) |
- 3.2 The definitions of deliverable and developable are provided in Annex 2 of the NPPF and associated Planning Practice Guidance and are repeated here for ease of reference.

- 3.3 The NPPF states that, to be considered **deliverable**, sites for housing should be available now, offer a suitable location for development now, and be achievable with a realistic prospect that housing will be delivered on the site within five years. In particular:
- a) sites which do not involve major development and have planning permission, and all sites with detailed planning permission, should be considered deliverable until permission expires, unless there is clear evidence that homes will not be delivered within five years (for example because they are no longer viable, there is no longer a demand for the type of units or sites have long term phasing plans).
  - b) where a site has outline planning permission for major development, has been allocated in a development plan, has a grant of permission in principle, or is identified on a brownfield register, it should only be considered deliverable where there is clear evidence that housing completions will begin on site within five years.

- 3.4 The Planning Practice Guidance elaborates on *What constitutes a 'deliverable' housing site in the context of plan-making and decision-taking?* (PPG Paragraph: 007 Reference ID: 68-007-20190722), as follows:

"In order to demonstrate 5 years' worth of deliverable housing sites, robust, up to date evidence needs to be available to support the preparation of strategic policies and planning decisions. Annex 2 of the National Planning Policy Framework defines a deliverable site. As well as sites which are considered to be deliverable in principle, this definition also sets out the sites which would require further evidence to be considered deliverable, namely those which:

- have outline planning permission for major development;
- are allocated in a development plan;
- have a grant of permission in principle; or
- are identified on a brownfield register.

Such evidence, to demonstrate deliverability, may include:

- current planning status – for example, on larger scale sites with outline or hybrid permission how much progress has been made towards approving reserved matters, or whether these link to a planning performance agreement that sets out the timescale for approval of reserved matters applications and discharge of conditions;
- firm progress being made towards the submission of an application – for example, a written agreement between the local planning authority and the site developer(s) which confirms the developers' delivery intentions and anticipated start and build-out rates;
- firm progress with site assessment work; or
- clear relevant information about site viability, ownership constraints or infrastructure provision, such as successful participation in bids for large-scale infrastructure funding or other similar projects.

Plan-makers can use the Housing and Economic Land Availability Assessment in demonstrating the deliverability of sites."

3.5 NPPF Annex 2 states that to be considered **developable**, sites should be in a suitable location for housing development with a reasonable prospect that they will be available and could be viably developed at the point envisaged.

3.6 Planning Practice Guidance adds:

*“How can plan-making authorities demonstrate there is a reasonable prospect that housing sites are ‘developable’? (PPG Paragraph: 020 Reference ID: 68-020-20190722)*

In demonstrating that there is a ‘reasonable prospect’ plan-makers can use evidence such as (but not exclusively):

- written commitment or agreement that relevant funding is likely to come forward within the timescale indicated, such as an award of grant funding;
- written evidence of agreement between the local planning authority and the site developer(s) which confirms the developers’ delivery intentions and anticipated start and build-out rates;
- likely build-out rates based on sites with similar characteristics; and
- current planning status - for example, a larger scale site with only outline permission where there is supporting evidence that the site is [suitable and available](#), may indicate development could be completed within the next 6-10 years.

A pragmatic approach is appropriate when demonstrating the intended phasing of sites. For example, for sites which are considered developable within 6-10 years, the authority may need to provide a greater degree of certainty than those in years 11-15 or beyond. When producing annual updates of the housing land supply trajectory, authorities can use these to provide greater certainty about the delivery of sites initially considered to be developable, and those identified over a longer time span.”

And:

*“Is it essential to identify specific developable sites or broad locations for housing growth, beyond 5 years? (PPG Paragraph: 019 Reference ID: 68-019-20190722)*

As set out in the National Planning Policy Framework, local planning authorities should identify a supply of specific, developable sites or broad locations for growth for years 6-10 and, where possible, for years 11-15. Local plans and spatial development strategies may be able to satisfy the tests of soundness where they have not been able to identify specific sites or broad locations for growth in years 11-15. However, if longer-term sites are to be included, for example as part of a stepped requirement, then plan-makers will need to demonstrate that there is a reasonable prospect that they are likely to come forward within the timescale envisaged.”

*Delivery on large sites Years 1-5*

- 3.7 The sites included within the first five years of the housing trajectory are listed in Appendix 1. They fall into the following categories, all of which meet the definition of deliverable:

Type of deliverable site in Years 1-5	Number of sites	Number of net units	Percentage of total
Full planning permission, completed in 2019/20	9	1,111	21
Full planning permission, under construction	18	3,678	71
Full planning permission, expected to start and complete by 2023/24	3	241	4.5
Permission granted, subject to s106 agreement due to be signed by end August 2020, expected to start and complete by 2023/24	1	30	0.5
On Brownfield Land Register, Council owned site and Homes for Lambeth (HfL) scheme with firm progress towards site assessment and expected to secure permission and complete by 2023/24	1	144	3
<b>TOTAL</b>	<b>32</b>	<b>5,204</b>	<b>100</b>

- 3.8 Further information about the status of these sites is provided in the notes column in the schedule in Appendix 1. The schedule also indicates whether the sites are allocated and/or listed on the Council's Brownfield Land Register. It should be noted that one of the sites with full planning consent (10 Pascal Street) is under construction but is also currently the subject of a new planning application for a scheme that, if approved, would deliver an additional 147 units over and above the consented quantum. This new application has been submitted by Transport for London under a Planning Performance Agreement with the Council and will be determined later this year; the applicant have indicated they wish development to be completed by December 2022.
- 3.9 The Council has a housing delivery arm known as [Homes for Lambeth](#), which is bringing forward various sites in the borough (both large and small – see business plan in the link provided). These are identified as 'HfL sites' in the schedules of sites in the appendices of this topic paper. There are some other Council-owned sites that are being brought forward by the Council's regeneration division, and these are also identified where relevant in the appendices.

*Delivery on large sites Years 6-10*

- 3.10 The sites included within the second five years of the housing trajectory are also listed in Appendix 1. They fall into the following categories, all of which meet the definition of developable and some of which also meet the definition of deliverable:

Type of developable site in Years 6-10	Number of sites	Number of net units	Percentage of total
Full planning permission, under construction (therefore also meets definition of deliverable)	7	1,634	35
Full planning permission, expected to complete by 2028/29	4	550	12
Resolution to grant (full) subject to s106 agreement, expected to complete by 2028/29	4	581	13
Outline consent with reserved matters applications pending consideration or being prepared for submission	3	412	7
Live planning application	1	133	3
Planning application expected by end of 2020, following a Planning Performance Agreement	3	932	20
Allocated site with progress towards submission of a planning application	2	349	8
On Brownfield Land Register, Council owned site with progress towards submission of a planning application	1	109	2
<b>TOTAL</b>	<b>25</b>	<b>4,700</b>	<b>100</b>

- 3.11 Further information about the status of these sites is provided in the notes column in the schedule in Appendix 1. The schedule also indicates whether the sites are allocated and/or listed on the Council's Brownfield Land Register. The site at 8 Albert Embankment is allocated in the Local Plan 2015 and has a resolution to grant permission for a mixed use development that includes 417 net additional residential units. However, this application has now been called in by the Secretary of State, with a public inquiry anticipated before the end of 2020. If the outcome of this is that permission is not granted for this application, the site will still constitute a developable site for an alternative scheme and is therefore included in Years 6-10. There is sufficient headroom in the trajectory over ten years to allow for a reduction in the quantum delivered on this site.
- 3.12 The Council is actively progressing a Site Allocations Development Plan Document (SADPD), with grant funding from the Mayor's Home-building Capacity Fund provided over two years. Regulation 18 consultation is anticipated to take place by March 2021. This work is taking a design-led capacity approach in accordance with London Plan Policy D3 to ensure housing capacity and affordable housing delivery are optimised. The allocations will identify an anticipated housing capacity range and will have been subject to testing for deliverability including viability testing. This process will help provide certainty to landowners and developers, as well as other stakeholders, with the aim of accelerating housing delivery on

developable sites. A number of the large sites included in Years 6-10 are being considered for inclusion in the SADPD

*Delivery on large sites Years 11-15*

- 3.13 A list of 16 large sites is included in Appendix 2, which in the view of the Council are developable for housing and are anticipated to come forward in Years 11-15, if not before. These are the sites with the greatest degree of certainty, but this is not an exhaustive list. These sites comprise:

<b>Type of developable site in Years 11-15</b>	<b>Number of sites</b>
Homes for Lambeth housing estate regeneration programme	4
Other Council owned sites	2
Sites being explored for future site allocations in SADPD (design-led capacity assessment)	6
Site formerly allocated for a school, no longer required for that use and suitable for housing, in Registered Provider ownership	1
Other sites that are suitable for housing	3
<b>TOTAL</b>	<b>16</b>

- 3.14 A number of sites on this list are being considered for inclusion in the Site Allocations DPD. However, detailed site assessments and public consultation have not taken place. Therefore the very indicative capacity figures included in Appendix 2 should be treated with caution as they are subject to change. That said, they suggest a total indicative capacity on these sites in the order of 2,650 net additional dwellings.

- 3.15 The Council is also starting to explore other areas for future housing growth in partnership with Registered Providers of affordable housing that own and manage estates in the borough. This work is at an early stage and further information is not available at present, but it is expected to inform the next London SHLAA.

4. Delivery on small sites < 0.25ha

- 4.1 As noted in paragraph 2.5 above, the minimum small sites target for Lambeth, identified in London Plan table 4.2, is 4,000 net additional dwellings over ten years or 400 dpa. Paragraph 4.2.4 of the London Plan provides the following information about the borough-level small sites minimum targets:

“The small sites minimum targets in Table 4.2 are informed by the 2017 London SHLAA and show the potential capacity for additional housing on sites of less than 0.25 hectares in size. The targets are based on trends in housing completions on sites of this size and the estimated

capacity for net additional housing supply from intensification in existing residential areas, taking into account PTAL, proximity to stations and town centres, and heritage constraints. The small sites targets are a component of, and not additional to, the overall housing targets. The relative contribution from large and small sites in each borough may fluctuate across the target period, providing the overall 10 year borough target is met in a way that is consistent with the policies in the Plan. The small sites target can be taken to amount to a reliable source of windfall sites which contributes to anticipated supply and so provides the compelling evidence in this respect required by paragraph 70 of the National Planning Policy Framework of 2019.”

4.2 London Plan policy H2 Small Sites states that:

“A - Boroughs should pro-actively support well-designed new homes on small sites (below 0.25 hectares in size) through both planning decisions and plan-making in order to:

- 1) significantly increase the contribution of small sites to meeting London’s housing needs
- 2) diversify the sources, locations, type and mix of housing supply
- 3) support small and medium-sized housebuilders
- 4) support those wishing to bring forward custom, self-build and community-led housing
- 5) achieve the minimum targets for small sites set out in Table 4.2 as a component of the overall housing targets set out in Table 4.1.

B - Boroughs should:

- 1) recognise in their Development Plans that local character evolves over time and will need to change in appropriate locations to accommodate additional housing on small sites
- 2) where appropriate, prepare site-specific briefs, masterplans and housing design codes for small sites
- 3) identify and allocate appropriate small sites for residential development
- 4) list these small sites on their brownfield registers
- 5) grant permission in principle on specific sites or prepare local development orders.”

4.3 In response to this London Plan policy, Lambeth has reviewed its Local Plan policies affecting housing development on small sites, as set out in Topic Paper 2: Review of policy on small housing sites ([TP02](#)). Notwithstanding Lambeth’s strong track record of housing delivery of small sites, as evidenced in the topic paper, the outcome of the policy assessment (and the associated public consultation and sustainability appraisal of reasonable alternatives) is to adjust the policy approach in DRLLP PSV for residential conversions (Policy H6 and see section 5.2.3 of Topic Paper 2), residential de-conversions (Policy H3 and see section 5.2.4 of Topic Paper 2), and for development within the curtilage of an existing dwelling (Policy Q14 and see section 5.4.4 of Topic Paper 2) in order support increased small site delivery. Therefore Lambeth is being pro-active and is not just relying on past trends for small site delivery.

4.4 In addition, in accordance with London Plan policy H2, the DRLLP PSV provides support for self-build and custom-build at Policy H1(vii) and recognises opportunities for additional housing delivery on small sites and that local character evolves over time at Policy H1 and paragraphs 5.4 to 5.6, 10.13, 10.45, 10.80. The introductory text to each of the PN policies for

Places and Neighbourhoods also indicates the potential for delivery of additional housing in each part of the borough (under the sub-heading ‘Housing’).

- 4.5 Lambeth is bringing forward positive design guidance for small housing developments as part of a draft Design Code Supplementary Planning Document ([SD20a](#)) ([SD20b](#)) ([SD20c](#)) ([SD20d](#)) ([SD20e](#)), to provide further support to the policies in the DRLLP PSV and as required by the London Plan policy. This also clearly acknowledges from the outset the need for gradual evolution in character to support housing delivery on small sites. This draft SPD has been the subject of an initial round of public consultation, the results of which are being analysed. Once adopted, this will be SPD to the DRLLP PSV (it will not be adopted until the revised Local Plan itself is adopted).
- 4.6 Turning to the small sites that are suitable and available for delivery of housing in the borough, Lambeth has included an initial set on its Brownfield Land Register, last updated in December 2019. See [SD25](#) ; the small sites on the register are also listed in Appendix 3 (a) of this topic paper.
- 4.7 This list of sites is supplemented by an extensive pipeline of small sites with planning consent for housing, listed in Appendix 3 section (b) – extant permissions as at end March 2019 (informed by the Housing Development Pipeline Report 2018/19 [SD11](#)); section (c) – permissions granted during 2019/20; and section (d) – permissions granted since 1 April 2020. Additional permitted sites will be added to the Brownfield Land Register when it is next updated in December 2020. Please note that the position with regard to starts and completions on small housing sites during the financial year 2019/20 is in the process of being checked through paper records and site visits and will be reported in the normal way in the autumn 2020 in a new Residential Development Pipeline Report for 2019/20. This information will be used to inform the final housing delivery figure for Lambeth for 2019/20.
- 4.8 A further list of small sites with potential for housing development but no planning consent yet (developable sites) is included at Appendix 3 (e). Some of these are expected to be included within the forthcoming Site Allocations Development Plan Document and/or will be added to the Brownfield Land Register when it is next updated in December 2020.
- 4.9 Together these lists demonstrate the following capacity for housing delivery on small sites:

Type of small site	Number of sites	Number of units net	Percentage of total net units
(a) On Brownfield Land Register Dec. 2019	38	654	30
(b) Extant permission as at end March 2019 (not on Brownfield Land Register)	223	892	40
(c) Permissions granted during 2019/20 (not on Brownfield Land Register)	82	218	10
(d) Permissions granted 1 April to 30 June 2020	14	24	1
(e) Other developable small sites	13	Over 433	19
<b>TOTAL</b>		<b>2,221</b>	<b>100</b>

4.10 Given the nature of small site development, there is also expected to be further supply in the form of windfall sites not yet identified.

4.11 Taken together, in the view of the Council this evidence provides a strong basis for assuming it will be able to meet and, in some years, exceed its small sites housing target of 400 dpa. This figure is therefore factored into the housing trajectory across all ten years (and can be carried forward as required for years 11-15).

## 5. Delivery from non-self-contained accommodation

5.1 The ten year borough-level housing targets set in the London Plan include an allowance for delivery from non-self-contained residential accommodation (NSC), such as purpose built student accommodation, hostels, care homes and shared living.

5.2 The allowance was calculated for each borough in the London SHLAA 2017 based on the net pipeline of approved bedrooms that were expected to be delivered over the period 2019 to 2029 at the time the SHLAA was undertaken. NSC bedrooms were counted in the SHLAA on a 3:1 ratio, with 3 NSC bedrooms counting as a single home. For Lambeth this resulted in an assumption that the equivalent of 14 units per annum would be delivered through NSC accommodation over the ten year period of the target.

5.3 Since the SHLAA was carried out, a number of large student schemes have come forward in Lambeth. To more accurately reflect the actual pipeline of NSC accommodation in Lambeth, and to take account of the updated ratio of NSC to conventional housing now included in the London Plan (now 2.5:1 for student housing, 1:1 for specialist NSC for older people and 1.8:1 for other NSC accommodation), the actual pipeline figures for Lambeth have been used in the housing trajectory rather than the 14 dpa assumption within the SHLAA.

5.4 The updated list of sites included within these figures is provided at Appendix 4 of this topic paper.

## 6. Five year housing land supply

6.1 Based on the information above, the position with regard to Lambeth's five year housing land supply from 2019/20 to 2023/24 is as follows:

*i. Target figure and its justification*

The target figure is 1,335 dpa, or 6,675 over five years.

*ii. Buffer based on previous five years' housing supply*

The buffer is 10 per cent. This results in a revised target for the first five years of 1,469 dpa or 7,345 over five years.

*iii. Whether any shortfall exists*

No shortfall exists arising from under-delivery in previous years.

*iv. Whether an allowance has been made for non-completions*

The summary figures set out in Appendix 5 demonstrate 'headroom' in the five year supply (including 10 per cent buffer) of 154 dwellings, which constitutes an allowance for non-completions.

*v. Summary of principal components of the five year supply*

Please see the table in Appendix 5.

7. Housing trajectory for Years 1-10 – update

- 7.1 The updated housing trajectory to be included in the DRLLP PSV is set out at Appendix 6 of this topic paper. Taking all the elements together, this demonstrates 'headroom' in projected supply of 288 dwellings over ten years, including the 10 per cent buffer for the first five years.
- 7.2 There is some unevenness in the distribution of projected completions over ten years, but this is an inevitable consequence of large sites, or phases of large sites, completing in a given year. The projected spread of delivery is based on the best available information at the time of writing. Given the Housing Delivery Test is calculated on a rolling three year basis, there is scope to accommodate a degree of variation in the number of net additional dwellings completed year on year. Lambeth is a pro-growth borough and is planning to meet and exceed its housing target over five and ten years, and in every individual year if possible.
- 7.3 As required by national planning policy and guidance, an update of this trajectory will be published by the Council annually to take account of completions achieved in the previous year, new permissions and any other new information.

## Appendix 1 - Schedule of large sites Years 1 to 10

Site	2019/ 20	2020/ 21	2021 /22	2022/ 23	2023/ 24	2024/ 25	2025/ 26	2026/ 27	2027/ 28	2028/ 29	Area (ha)	Planning reference	Allocation/Brown- field Land Register	Notes
