

Proposed parking controls

Streatham Area

Tell us what you think

Lambeth

12 February 2018 – 12 March 2018

Dear Occupier,

Local residents have told us repeatedly about parking problems in their area. Generally, residents feel the problem is being caused by commuters who park and complete their journey by public transport or those working in nearby businesses.

In 2016, the council commissioned independent parking surveys to assess pressure in the non-Controlled Parking Zone areas to the south of the borough. The parking survey data suggests that much of the Streatham area is experiencing acute parking problems. The full parking survey reports are available at www.lambeth.gov.uk/streathamcpz.

A key part of the survey works was to recommend the order in which all areas could be consulted. However, following discussion with Ward Councillors a decision was taken to survey all residents to find out which of these areas are in favour of parking controls. This will help us decide which locations are under the most parking pressure and would like us to consider the area for a consultation on parking controls.

We know that CPZs can be a contentious issue, the main reason being that residents are generally required to purchase a permit in order to park in a CPZ. The current costs of parking permits is enclosed.

We are aware that many of the roads south of the borough are affected by parking congestion, but many residents may choose to continue with their current parking situation rather than pay for a permit. Therefore, we would like to see how much support there is for controls in the area before allocating the funding and resource to undertake the full CPZ consultation process. Please let us know your views.

How can I give my views?

You can complete and submit your online survey using the following link, www.lambeth.gov.uk/streathamcpz by the closing date of **12 March 2018**. You will need your Unique Reference Number (URN) enclosed to authenticate your submission.

The decision on how to proceed will be based on to the responses received during this survey. Therefore your participation is very important.

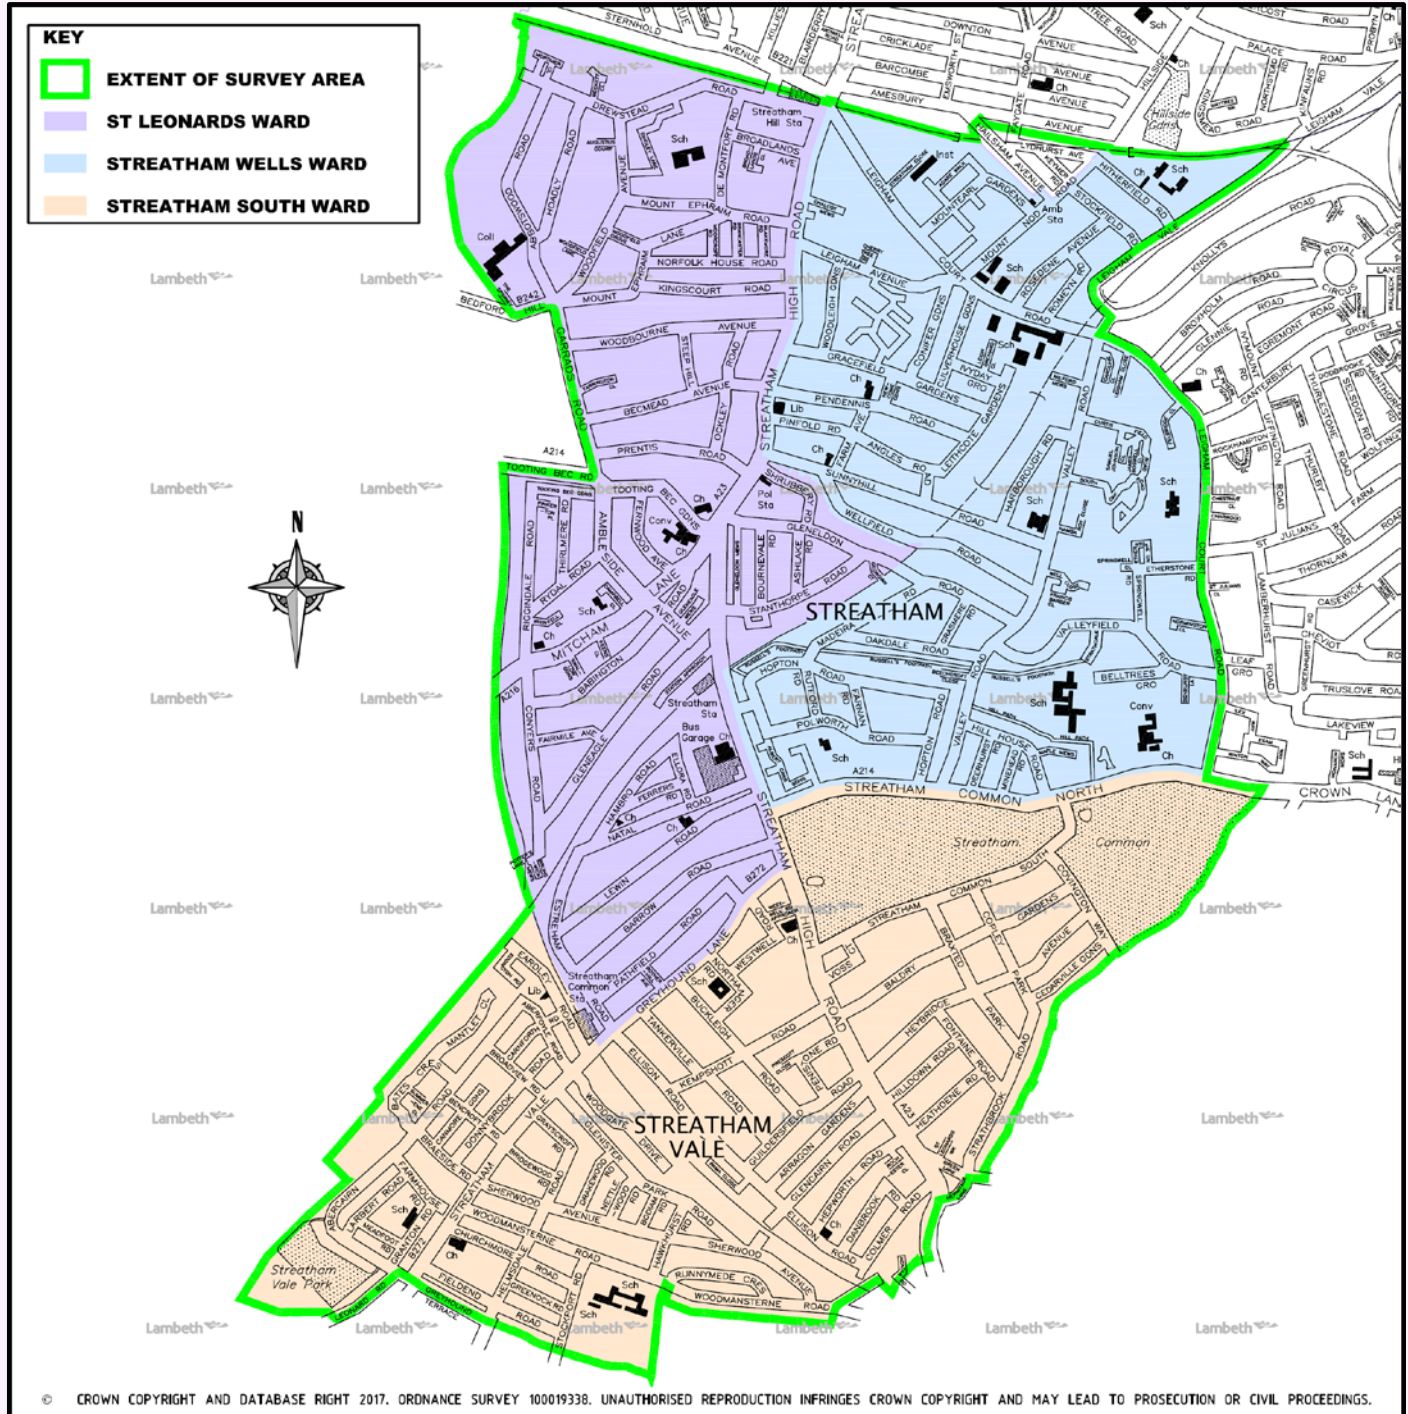

Please note, only one submission will be accepted per property.

If you're not able to get online, you can request a paper version of the survey by calling **020 7926 6799**

What happens next?

The results of the survey will be analysed and discussed with all the relevant ward councillors to develop a strategic parking programme. A report analysing the results of the survey and officers' recommendations will be presented in a report to the Cabinet Member for Housing and Environment. Once a decision is made we will let you know the outcome.

EXTENT OF SURVEY

ST LEONARDS WARD

Cllr Scott Ainslie
Cllr Robert Hill
